List of Annexes

1) The information in Tables 3-14 are based on monetary statistics of CNB harmonized with monetary statistics of European System of Central Banks. The data are not seasonally adjusted and the last period data are always preliminary. When processing data of monetary and banking statistics as of 31 August 2008, the revision for the period from 31 December 2007 until 31 July 2008 was made.

2) All the data quoted in this Publication are included in the ARAD database (Time series database - ARAD >> Money and banking statistics >> Monetary statistics >> Monetary Statistics Publication).

Financial markets interest rates in CR

Commentary on key interest rates (Table 1) and financial market interest rates (Table 2): August 2008

Key interest rates

The CNB's 2W repo rate has been set at 3.50% since August 8, 2008, the ECB's key interest rate has been re-set at 4.25% since July 8, 2008. The difference between the CNB's and the ECB's key rates is therefore nowadays 0.75 percentage point.

Financial market interest rates

In August in comparison with the previous month the observed interest rates on the interbank deposit market decreased in the Czech Republic (3M PRIBOR, 6M PRIBOR and 1Y PRIBOR by 0.30 percentage point and more), as well as the reference interest rate CZEONIA (the decrease by 0.12 percentage point). Within the Eurozone the interest rates insignificantly increased, the growth was more distinct in the EONIA (by 0.11 percentage point). The 3M PRIBOR reached in August the value of 3.81% (in July 4.11%) and the 3M EURIBOR 4.97% (in July 4.96%).

Bond yields on the capital market in the Czech Republic continued in decreasing trend with the strong evidence. The similar movement in the same direction was recognized in the Eurozone too. The yield of the 10-year bond in the Czech Republic was 4.47%, the yield of the 10-year bond in the Eurozone was 4.50%.

¹⁾ Monetary aggregates comprise monetary liabilities of MFIs vis-à-vis non-MFI Czech residents excluding central government. M1 is the sum of currency in circulation and overnight deposits; M2 is the sum of M1, deposits with an agreed maturity of up to two years and deposits redeemable at notice of up to three months; and M3 is the sum of M2, repurchase agreements, money market fund shares/units and debt securities up to two years.

²⁾ Including all sectors without general government (S.13) and MFIs sector (S.121 and S.122).

³⁾ Net foreign assets (NFA) represent balance of financial claims and liabilities of the MFI sector vis-a-vis nonresidents

⁴⁾ Net value of flow data calculated by adjusting the difference between end-of-period levels for the effect of non-transactions-related factors.

Comments on monetary developments statistics¹⁾ (Tables 3-9): August 2008

The annual rate of growth of M3 fell from 14.3% in July to 13.7% in August. The month-on-month growth rate decreased from 2.2% to 1.0%. As a result of financial transactions, the monetary aggregate M3 grew by CZK 308.4 billion year on year (by CZK 25.1 billion month on month) to CZK 2,543.6 billion.

Main components of M3

With the largest contribution to M3 growth, the monetary aggregate M1 remains the most important component of M3, accounting for almost one half of the annual M3 growth (Table 7).

The annual rate of growth of M1 increased from 9.6% in July to 9.9% in August. At the same time, the annual rate of overnight deposits rose from 10.9% in July to 11.2% in August. Overnight deposits fell by 1.4% month on month, owing to financial transactions. Within overnight deposits, deposits of insurance corporations and pension funds recorded the largest decline of 13.8% (CZK 1.9 billion). In addition, deposits of non-financial corporations declined by 4.9% (CZK 19.8 billion), deposits of other government sector by 3.2% (CZK 5.1 billion) and deposits of other financial intermediaries by 3.1% (CZK 0.9 billion). Conversely, household sector deposits increased by 1.5%, i.e. CZK 10.1 billion.

The annual rate of growth of currency in circulation dropped slightly from 5.0% in July to 4.9% in August. In month-on-month terms, currency in circulation rose by 0.7% (an increase of CZK 2.4 billion due to financial transactions). Other short-term deposits (excluding overnight deposits) grew by CZK 41.8 billion (i.e. 5.1%) month on month, owing to financial transactions. In August, the annual rate of growth of these deposits fell by 2.2 percentage point to 22.8% (25.0% in July). Deposits redeemable at notice of up to three months (the smaller component) have long been recording strong annual growth. This annual growth rate in August was 39.7%. The annual rate of growth of deposits with maturity of up to two years, which are the dominant component of short-term deposits in terms of their volume, decreased by 2.9 percentage points compared to the previous month, reaching 15.9%.

Within other short-term deposits, all components recorded a rise. Deposits of insurance corporations and pension funds recorded the largest month-on-month increase of 16.9% (CZK 5.9 billion). In addition, deposits of non-financial corporations rose by 11.7% (CZK 25 billion), deposits of other government by 5.3% (CZK 1.9 billion), deposits of other financial intermediaries by 4.8% (CZK 0.9 billion) and deposits of households by 1.6% (CZK 8.1 billion).

Marketable instruments, which consist of repos, money market fund shares/units and debt securities with maturities of up to two years, fell by 2.1% month on month to CZK 75.6 billion (CZK 77.4 billion in July), due to financial transactions. The annual rate of growth of marketable instruments dropped by 8.5 percentage point to 3.3% (11.8% in July).

Main counterparts of M3

The annual growth rate of loans extended to general government was - 14.4% in August (-14.1% in July). The annual rate of growth of purchased government bonds increased from - 10.2% in July to -7.0% in August .

The annual growth rate of loans extended to the private sector fell from 24.0% in July to 23.3% in August. This growth was mostly attributable to households. They account for more than one-half of the annual rate of growth of loans granted to the private sector (Table 8). The annual growth rates of loans to households have long been high; in August this figure was 27.8%. Non-financial corporations are another sector accounting for a striking proportion of the annual rate of growth of loans to the private sector. Their annual rate of growth dropped from 18.1% in July to 17.9% in August.

The annual growth rate of net external assets rose from 8.6% in July to 14.4% in August. The annual rate of longer-term financial liabilities fell from 5.0% in July to 1.7% in August. The annual growth rate of deposits by central government increased from 27.9% to 55.4%.

¹⁾ All increases and decreases referred to in this commentary relate only to financial transactions adjusted for non-transaction effects.

¹⁾ The interest rates that are applied by MFIs to CZK-denominated deposits and loans vis-à-vis households and non-financial corporations resident in the Czech Republic. New business refers to any new agreement between the customer and the MFI within given period.

²⁾ Including households (S. 14) and non-profit institutions serving households (S. 15) according to the classification of the economic sectors ESA95.

³⁾ Households deposits liabilities redeemable at notice include similar deposits of non-financial corporations of which volumes are negligible in this category.

⁴⁾ Including deposit liabilities redeemable at notice of non-financial corporations (which are also included in item 1.3).

⁵⁾ Bank overdrafts include provided bank overdrafts, debit balance on bank accounts and credit card credits.

⁶⁾ The initial period of fixations is a predetermined period of time at the start of the contract during which the value of the interest rate cannot change. Period up to 1 year includes floating rates.

⁷⁾ Annual percentage rate of charge (APRC) covers total costs of the credit to the client including charges etc.

¹⁾ The interest rates that are applied by MFIs to CZK-denominated deposits and loans vis-à-vis households and non-financial corporations resident in the Czech Republic. Interest rates on outstanding amounts refer to the stock of all deposits and all loans at a specific moment.

²⁾ Including households (S.14) and non-profit institutions serving households (S.15) according to the classification of the economic sectors ESA95.

³⁾ Including overnight deposits and deposits with agreed maturity presented in Table 10. For this instrument category, new business and outstanding amounts coincide.

⁴⁾ Consumer credit and other lending include bank overdrafts presented in Table 10.

Commentary on interest rates of monetary financial institutions (Tables 10 and 11): August 2008

Interest rates on new business

Interest rates on **new deposits** of households and non-financial corporations continued the slightly upward trend in August.

The average interest rate on total new deposits of **households** increased only very slightly, to 1.40%. Although the rate on overnight deposits rose again negligibly by 0.02 percentage point to 0.86%, that on deposits with agreed maturity dropped by 0.13 percentage point, to 2.95%. The interest rate on deposits redeemable at notice stood at 2.18% for the fourth consecutive month.

The overall interest rate on new deposits of **non-financial corporations** increased slightly to 2.16%. However, the rate on overnight deposits declined by 0.16 percentage point to 1.13%. The rate on deposits with agreed maturity of up to two years (these deposits usually account for 100% of all deposits with agreed maturity in this sector) also fell, by 0.16 percentage point to 3.33%

The interest rate on **new loans** to households and non-financial corporations recorded a decline in August.

The overall interest rate on new loans to **households** declined by 0.61 percentage point to 11.41%, due to a decline in the interest rate on bank overdrafts of 1.82 percentage point, to 14.52%. The rate on consumer credit was also lower by 0.05 percentage point, standing at 13.48%. By contrast, the interest rate on house purchase loans increased slightly by 0.07 percentage point to 5.60%, while the rate on other loans declined by 0.12 percentage point to 6.79%.

The interest rate on loans to **non-financial corporations** declined by 0.16 percentage point, to 5.44%, and the rate on bank overdrafts also fell by 0.16 percentage point, to 5.72%. The biggest decline was recorded for the rate on other loans of up to CZK 30 million (0.57 percentage point, to 5.08%). The rate on other loans of over CZK 30 million also showed a slighter decline of 0.05 percentage point, to 4.89%.

The overall APRC on loans to households swung up by 0.16 percentage point, to 8.09%. The APRC on consumer credit rose by 0.17 percentage point to 14.32%. The APRC on house purchase loans recorded a slighter rise of 0.09 percentage point to 5.86%.

Interest rates on outstanding amounts

The average interest rate on **outstanding amounts of deposits** of households remained at the July level. The rate on deposits of non-financial corporations recorded a decline.

The interest rate on total deposits of **households** stabilised at 1.58%. The rate on deposits redeemable at notice remained at the previous month's level (2.18%). The interest rate on deposits with agreed maturity declined only slightly by 0.03 percentage point to 2.25%, while the rate on overnight deposits increased slightly by 0.02 percentage point to 0.86%.

The interest rate on total deposits of **non-financial corporations** fell by 0.11 percentage point to 1.92%, while that on overnight deposits declined by 0.16 percentage point to 1.13%. The overall interest rate on deposits with agreed maturity recorded a decline of 0.15 percentage point to 3.13%.

The average interest rate on **outstanding amounts of loans** to households and non-financial corporations declined slightly compared to the previous month.

The overall interest rate on loans to **households** recorded a slight decline to 6.78%. The interest rate on house purchase loans was slightly higher, standing at 5.10%. The interest rate on consumer credit and other loans fell to 10.92%.

The average interest rate on outstanding amounts of loans to **non-financial corporations** declined to 5.58%. The interest rate on loans of up to one year recorded the most visible decline to 5.38%. The rate on loans with maturity of over one year and up to five years recorded a slighter fall to 5.70%, while that on loans with maturity of over five years declined to 5.75%.

¹⁾ Financial corporations engaged in lending - corporations classified within sector S.123 other financial intermediaries which are predominantly engaged in granting credit or loans or entering into agreements of similar nature, for example financial leasing, factoring, consumer credit, hire purchase, etc. (see Decree No. 307/2004 Coll.). Data are published by the last working day of the second month following the reference period.

Commentary on the quarterly aggregated balance sheet of collective investment funds (Table 12): June 2008

As of the end of Q2, collective investment funds (CIFs) administered assets worth CZK 101.5 billion. The value of assets thus continued falling in Q2, down by CZK 1.5 billion, or 1.46% compared to the previous quarter. Compared to the same period of 2007, the value of assets increased by 6.01%, or CZK 5.8 billion.

In Q2, the largest decrease was recorded by bond funds, whose assets fell from CZK 17.8 billion to CZK 16.7 billion, which represents a quarter-on-quarter decline of 6.47%. Decrease was also recorded by equity funds (from CZK 13.4 billion to CZK 13.1 billion) and mixed funds (from CZK 30.8 billion to CZK 30.2 billion). By contrast, funds of funds recorded growth (from CZK 22.8 billion to CZK 23 billion) and other funds (from CZK 18.1 billion to CZK 18.6 billion).

Collective investment funds invested most in debt securities. The total volume of purchased debt securities was CZK 43.6 billion at the end of Q2, accounting for 43.01% of CIFs equity capital. Compared to the previous quarter, the share of debt securities in equity capital increased by 2.78 percentage points. In year-on-year comparison it was up by 5.73 percentage points. By contrast, the proportion of shares and other equity in the funds' portfolio decreased. The volume of shares and other equity fell by CZK 0.6 billion, or 1.42%.

At the end of Q2, 126 resident collective investment funds were active in the Czech Republic, of which 17 were equity funds, 13 bond funds, 35 mixed funds, 31 funds of funds, 27 funds of qualified investors and 3 real estate funds.

Commentary on the quarterly aggregated balance sheet of financial corporations engaged in lending (Tables 13 and 14): June 2008

As of 30 June 2008, financial corporations engaged in lending had total assets¹⁾ of CZK 418.3 billion, up by CZK 11.3 billion, or 2.77 % compared to the previous quarter. In year-on-year terms, total assets grew by CZK 44.1 billion, i.e. 11.79%. This was mostly attributable to financial leasing companies which accounted for the largest share in total assets (CZK 286.8 billion). Other lending companies contributed CZK 104.4 billion and factoring and forfaiting companies CZK 27 billion to the total assets.

The largest asset item was loans, which amounted to CZK 332.1 billion. In Q2, loans saw a rise of CZK 11 billion, or 3.43 % compared to the previous period. In year-on-year terms, they were up by CZK 40.1 billion, or 13.73%. Most of the loan volume (98.43 %) was provided to residents. Short-term loans stood at CZK 99.9 billion at the end of Q2, accounting for 23.9 % of total assets. Long-term loans amounted to CZK 232.2 billion, i.e. 55.5% of total assets.

The largest part of the loans provided to residents consisted of loans to non-financial corporations, which totalled CZK 179.4 billion, i.e. 54.88 % of loans to residents. Loans provided to non-financial corporations rose by CZK 4.1 billion (2.33 %) compared to the previous quarter and by CZK 20.4 billion (12.85 %) year on year. CZK 153.1 billion was provided by financial leasing companies, CZK 4.7 billion by other lending companies and CZK 21.6 billion by factoring and forfaiting companies. These loans are made up predominantly of loans with original maturities of one to five years, which amounted to CZK 109.6 billion.

Loans to households were the second largest group of loans to residents, amounting to CZK 145.4 billion, which represents an increase of CZK 7.1 billion (or 5.1%) compared to the previous quarter. In year-on-year terms, loans to households grew by CZK 18.8 billion, i.e. 14.8%. These loans accounted for 44.5% of loans granted to residents. CZK 70.4 billion was provided by financial leasing companies and CZK 75.1 billion by other lending companies. Loans with original maturities of one to five years amounted to CZK 88.7 billion, giving them the largest share in loans to households.

¹⁾ Under Decree No. 307/2004 Coll. financial corporations engaged in lending are companies whose main or major business activity involves providing credit or loans or entering into agreement of similar nature, e.g. financial leasing, factoring, consumer credit, hire-purchase financing, etc.

Glossary

Harmonisation of statistics: the Treaty establishing the European Community tasked the European Central Bank (ECB) with ensuring harmonised statistics according to Article 5 of the Statute of the European System of Central Banks. The national central banks of EC Member States therefore collect statistical information according to a uniform definition, from which the ECB then compiles aggregate data for euro area monetary policy. Although Council Regulation No 2533/98, which specifies the requirements for statistical data collection, only concerns euro area countries, the ECB also receives full data sets from the non-participating countries (e.g. the Czech Republic) in order to monitor their economic and financial development.

Monetary statistics: financial macrostatistics of sectors S.121, S.122 and S.123 based exclusively on the "host country" principle. According to this principle, a resident reporting unit is an institution resident in a given economic territory. The reporting population includes 1) institutions incorporated and located in the territory, including subsidiaries of parent companies located outside that territory, and 2) branches of institutions that have their head office outside that territory.

APRC: annual percentage rate of charge, i.e. the rate including interest expenses and all related costs of the credit to the client (fees etc.).

Collective investment funds: for the purposes of monetary and banking statistics, collective investment funds comprise unit trusts and investment funds other than money market funds which are resident in the Czech Republic. These are undertakings the sole object of which is collective investment, i.e. pooling investor funds and investing them under conditions stipulated in the Act on Collective Investment (No. 189/2004 Coll.). Such undertakings may be constituted under the Act either as unit trust managed by an investment company or as investment funds.

Consolidated balance sheet of the MFI sector: the basic statistical tool of monetary statistics. It is based on the residency principle and is obtained by netting out inter-MFI positions on their aggregated balance sheet.

Consumer credit: loans granted to households for personal use in the consumption of goods and services.

Contribution to annual growth rate: the growth rate of a selected component weighted by its share in the total growth rate.

Deposits redeemable at notice: deposits that can be withdrawn by clients only after the expiry of a period of notice agreed in advance, which starts at the moment of notification of the intention to withdraw the deposit.

Deposits with agreed maturity: deposits that cannot be withdrawn by clients before a predefined maturity.

Financial corporations engaged in lending (FCLs):

Definition: FCLs mean corporations classified within sector S.123 other financial intermediaries which are predominantly engaged in granting credit or loans or entering into agreements of similar nature, for example financial leasing, factoring, consumer credit, hire purchase, etc. (see Decree No. 307/2004 Coll.)

Type of services:

1. Financial leasing - It is financial service, when lessee acquires the right to use good in exchange for rental payment over predetermined term. All risk and rewards of ownership are transferred from lessor to lessee. After lapse of predetermined term ownership of good is transferred from lessor to lessee.

2. Factoring - It is financial service consisting in purchase of short-term receivables (with maturity 30-90 days) before their maturity date. Receivables are transferred on factoring company – factor- by supplier of goods or services.

3. Other lending - This category encompasses granting credit or loans or agreements of similar nature different from financial leasing and factoring. It deals especially with consumer credit, hire purchase, consumption loans, etc.

Growth rate: the percentage change in the monitored variable over the reference period, calculated from the volumes of monthly financial transactions and the outstanding amounts at the beginning of each month.

Household sector: institutional units included in the sectors of households (S.14) and non-profit institutions serving households (S.15) under ESA 95.

Glossary (cont'd)

Housing loans: Loans granted to households for the purpose of purchasing/investing in housing, including building and home improvements.

Interest rate fixation: a period of interest rate fixation, i.e. a period at the beginning of a contract for which the agreed interest rate cannot be changed. Period up to 1 year includes floating rates.

MFI longer-term financial liabilities: comprise deposits with an agreed maturity of over two years, deposits redeemable at a period of notice of over three months, debt securities issued with an original maturity of more than two years and the capital and reserves of the Czech MFI sector.

Monetary aggregates: comprise the monetary liabilities of monetary financial institutions to non-MFI Czech residents except central government. The narrow monetary aggregate M1 includes currency in circulation (excluding cash at banks' cash desks) and overnight deposits. The intermediate monetary aggregate M2 comprises M1, deposits redeemable at a period of notice of up to and including three months and deposits with a maturity of up to and including two years. The broad monetary aggregate M3 comprises M2, money market fund shares/units, debt securities with a maturity of up to two years and repurchase agreements.

Monetary financial institutions (MFIs): financial institutions forming the money-issuing sector. Under Community law, these include the central bank, resident credit institutions, and all other resident financial institutions whose business is to receive deposits and/or close substitutes for deposits from entities other than MFIs and, for their own account (at least in economic terms), to grant credit and/or invest in securities. In the Czech Republic, MFIs include the central bank, banks, money market funds and credit unions.

Money-holding sector: all institutional units except central government (S.1311) and monetary financial institutions (S.121 and S.122) under ESA 95.

Money-issuing sector: all institutional units included in the sectors of the central bank (S.121) and other monetary financial institutions (S.122) under ESA 95.

Money-neutral sector: an institutional sector comprising the central government sector (S.1311) under ESA 95.

Money market funds: MMFs are defined as those collective investment funds of which the units are, in terms of liquidity, close substitutes for deposits and which primarily invest in money market instruments and/or in MMF shares/units and/or in other transferable debt instruments with a residual maturity of up to and including one year, and/or in bank deposits, and/or which pursue a rate of return that approaches the interest rates of money market instruments. The criteria applied in order to identify MMFs shall be derived from the public prospectus as well as fund rules, instruments of incorporation, established statutes or by-laws, subscription documents or investment contracts, marketing documents, or any other statement with similar effects, of the collective investment undertaking.

Net external assets: comprise external assets of Czech MFIs (such as monetary gold, non-koruna banknotes, securities issued by non-residents and loans granted to non-residents) minus external liabilities of the Czech MFI sector (such as non-residents' holdings of deposits, repurchase agreements, money market fund shares and units, and debt securities with a maturity of up to and including two years issued by MFIs and held by non-residents).

Non-MFIs: all resident sectors excluding MFIs, i.e. general government (S.13), non-financial corporations (S.11), financial institutions other than MFIs (S.123 and S.124) and households and non-profit institutions serving households (S.14 and S.15) under ESA 95.

Other financial intermediaries (OFIs): entities included in the sectors of other financial intermediaries except insurance corporations and pension funds (S. 123), financial auxiliaries (S.124) and insurance corporations and pensions funds (S.125) under ESA 95.

Private sector: a sector comprising all institutional sectors except general government (S.13) and monetary financial institutions (S.121 and S.122) under ESA 95.

Glossary (cont'd)

Rates on new business: interest rates agreed by the bank and the client for all agreements negotiated during the reference period.

Rates on outstanding amounts: interest rates applied to end-of-period balances.

Reclassifications: comprise any changes in the MFI balance sheet resulting from changes in the reporting population, corporate restructuring, reclassifications of assets and liabilities, and corrections of reported errors.

Residents: all domestic and foreign legal entities and natural persons, including branches of foreign banks and foreign owners of buildings and land, whose centre of economic interest is in the given territory. Foreign legal entities and natural persons are considered residents after at least one year of economic activity in the territory, with the exception of foreign bank branches and owners of buildings and land, who become residents at the moment they perform a valid legal act (in the case of foreign owners of buildings and land, this only applies in connection with transactions relating to the building or land in question).

Transaction (flow) data: values related to the whole period which are calculated as the difference between the balances at the end of the current and the previous period adjusted for non-transaction effects, i.e. effects connected with reclassifications, valuation changes and exchange rate variations over the period. These factors result in breaks in time series, thereby affecting the comparability of end-of-period balances. Transaction (flow) data only reflect those changes that arise from transactions, i.e. from accepting financial assets or providing financial liabilities.

Unit trusts other than money market funds:

1. *equity funds and funds of funds* – funds that constantly invest 66% or more of their assets on the equity market (i.e. in shares and instruments bearing equity risk) and/or funds that constantly invest 66% or more of their assets in the units and shares of other unit trusts/investment funds. Equity funds also include index funds and guaranteed funds linked to stock indices.

2. *bond funds* – funds that constantly invest on the bond market. Additional investment in equities is allowed, but the share of equities must not exceed 10% of the fund's assets. Bond funds also include index funds and guaranteed funds linked to bond indices.

3. *mixed funds* – funds that invest in various assets (equities and bonds) on various markets and do not have limits on the share of equities or bonds.

Technical Notes

A. Calculation of growth rates

The growth rate for the reference period is calculated from the volumes of monthly financial transactions and the outstanding amounts at the beginning of each month. Monthly transactions are calculated from differences in outstanding amounts adjusted for reclassifications, other revaluations, exchange rate variations and other changes which do not arise from transactions. This data thus reflects only those changes that arise from accepting financial assets or providing financial liabilities. Reclassifications and other non-transaction corrections are introduced into the transaction statistics to preserve the comparability of the gradual monitoring results, thereby enabling calculation of the indices of expected outstanding balances of the monitored variables and determination of their growth rates.

Method of calculation

1. The month-on-month percentage change a_t^M for month t is calculated as:

$$(a) \quad a_t^M = \left(\frac{F_t^M}{L_{t-1}} \right) \times 100$$

2. The annual growth rate for month t , i.e. the change for the last 12 months ending with month t , is calculated as the product of the twelve coefficients for each previous month. The calculation of the annual growth rate from the month-on-month growth rates thus enables transaction changes and non-transaction effects in the individual months to be taken into account.

$$(b) \quad a_t = \left[\prod_{i=0}^{11} \left(1 + \frac{F_{t-i}^M}{L_{t-1-i}} \right) - 1 \right] \times 100$$

where

F_t^M - transactions in month t

$F_t^M = (L_t - L_{t-1}) - C_t^M - E_t^M - V_t^M$

and

L_t - outstanding amount at the end of month t

C_t^M - reclassifications in month t

E_t^M - exchange rate variations in month t

V_t^M - valuation changes in month t

Growth rates for other reference periods are derived from formula (b).

B. Calculation of the contribution to the annual growth rate of a monitored variable (e.g. M3)

If $a_t(M3)$ represents the annual growth rate of M3 for the year ending with month t , and $F_{t-i}(M1)$, $F_{t-i}(M2-M1)$, $F_{t-i}(M3-M2)$ are the monthly transactions of the components M1, M2-M1 and M3-M2 in month $t-i$, the contribution of M1 to the annual growth rate of M3, for example, is calculated as:

$$\frac{\sum_{i=0}^{11} F_{t-i}(M1)}{\sum_{i=0}^{11} [F_{t-i}(M1) + F_{t-i}(M2-M1) + F_{t-i}(M3-M2)]} \times a_t(M3)$$
