List of Annexes

1) A comma (,) represents a decimal point delimiter; a blank between figures represents a thousand group delimiter.

2) The information in Tables 3-14 are based on monetary statistics of CNB harmonized with monetary statistics of European System of Central Banks. The data are not seasonally adjusted and the last period data are always preliminary.

3) All the data quoted in this Publication are included in the ARAD time series system - www.cnb.cz/en/statistics/ (Time series database ARAD >> Money and financial statistics >> Monetary statistics >> Monetary Statistics Publication).

Financial markets interest rates in CR

Commentary on key interest rates (Table 1) and financial market interest rates (Table 2): July 2009

Key interest rates

The CNB's 2W repo rate has been set at 1.50% since 11 May 2009 and the ECB's key interest rate has been re-set at 1.00% since 13 May 2009. The difference between the CNB's and the ECB's key rates was thus 0.50 percentage point at the end of July.

Financial market interest rates

In July, interest rates on the Czech interbank deposit market decreased compared to the previous month (the 3M PRIBOR by 0.08 pp at most), except the CZEONIA rate which slightly increased (by 0.03 pp). A considerable decrease occurred in all interested rates within the euro area, most of the EONIA rate (by 0.34 pp). The 3M PRIBOR reached 2.09% (2.17% in June) and the 3M EURIBOR stood at 0.97% (1.23% in June).

Bond yields on the Czech capital market recorded a slight month-on-month decrease in July. In the euro area the yields decreased as well, however the drop was more visible (the 5Y bond by 0.28 pp at most). The yield on the the 10-year bond in the Czech Republic was 5.41% (5.45% in June), while the yield on the 10-year bond in the euro area reached 4.09% (4.32% in June).

¹⁾ Monetary aggregates comprise monetary liabilities of MFIs vis-à-vis non-MFI Czech residents excluding central government. M1 is the sum of currency in circulation and overnight deposits; M2 is the sum of M1, deposits with an agreed maturity of up to two years and deposits redeemable at notice of up to three months; and M3 is the sum of M2, repurchase agreements, money market fund shares/units and debt securities up to two years.

²⁾ Including all sectors without general government (S.13) and MFIs sector (S.121 and S.122).

³⁾ Net foreign assets (NFA) represent balance of financial claims and liabilities of the MFI sector vis-a-vis nonresidents

⁴⁾ Net value of flow data calculated by adjusting the difference between end-of-period levels for the effect of non-transactions-related factors.

Comments on monetary developments statistics¹⁾ (Tables 3-9): July 2009

The annual rate of growth of M3 fell from 7.9% in June to 5.3% in July. The month-on-month growth rate increased from -1.8% to -0.3%. As a result of financial transactions, the monetary aggregate M3 grew by CZK 133.8 billion year on year (falling by CZK 8.6 billion month on month) to CZK 2669.7 billion.

Main components of M3

The monetary aggregate M1 is the most important component of M3. Its contribution to the annual growth rate of M3 fell from 4.8 percentage points in June to 3.5 percentage points in July. In relative terms its share of annual M3 growth rose from 61% to 66% (Table 7).

The annual rate of growth of M1 declined to 5.4% in July (from 7.4% in June). The annual rate of overnight deposits fell to 4.8% in July from 7.2% in June. In month-on-month terms, overnight deposits declined by CZK 17.8 billion (i.e. 1.3%) due to financial transactions. Within overnight deposits, deposits of all economic sectors recorded a decrease. Deposits of insurance corporations and pension funds fell most (by 56.8%, i.e. CZK 8.4 billion). Deposits of other financial intermediaries fell by 9.7 % (CZK 2.8 billion), deposits of other government declined by 7.6% (CZK 12.1 billion) and deposits of non-financial corporations decreased by 0.9% (CZK 3.5 billion). By contrast, deposits of households rose by 1.2% (CZK 8.9 billion). The annual rate of growth of currency in circulation decreased by 0.6 percentage points, from 8.4% in June to 7.8% in July. In month-on-month terms, currency in circulation was down by 0.5% (a decline of CZK 1.9 billion) due to financial transactions.

Other short-term deposits (excluding overnight deposits) grew by CZK 11.6 billion (i.e. 1.3 %) month on month, owing to financial transactions. The annual rate of growth of these deposits fell by 3.8 percentage points in July to 9.3% (from 13.1% in June). The annual rate of growth of deposits with maturity of up to two years, which are from the point of view of the volume the dominant component of short-term deposits, decreased by 2.7 percentage points compared to the previous month, reaching -5.5 %. Deposits redeemable at notice of up to three months (the smaller component) have long been recording strong annual growth. Their annual growth rate in July was 37.7%.

Within other short-term deposits, deposits of almost all economic sectors recorded an increase month on month. Deposits of other financial intermediaries rose most (by 18.1%, i.e. CZK 3.2 billion). Deposits of other government rose by 9.5% (CZK 3.6 billion), deposits of insurance corporations and pension funds increased by 4.6% (CZK 1.6 billion) and deposits of non-financial corporations were up by 3.8 % (CZK 7.4 billion). By contrast, deposits of households were down by 0.7% (CZK 4.2 billion).

Marketable instruments, which consist of repos, money market fund shares/units and debt securities with maturities of up to two years, declined by 0.8% month on month, from CZK 57.5 billion in June to 57.1 billion in July. The annual growth rate of marketable instruments fell by 3.6 percentage points to -37.3% (from -33.7% in June).

Main counterparts of M3

The annual rate of growth of loans to general government rose to 5.0% in July (from 3.0% in June). The annual rate of growth of purchased government bonds fell to 36.6% in July (from 38.1% in June).

The annual rate of growth of loans to the private sector declined to 5.8% in July (from 6.6 % in June). As in June, households were the only contributor to the positive annual growth rate of loans to the private sector in July (Table 8). The annual growth rate of loans to households fell by 1.1 percentage point to 15.9% in July (from 17.0% in June). The annual growth rates for all other sectors also recorded a decline in July, reaching negative figures (e.g. the annual growth rate of loans to non-financial corporations decreased from -0.5% in June to -0.9% in July).

The annual rate of growth of net external assets fell from -3.1% in June to -6.9% in July. The annual growth rate of longer-term financial liabilities grew from -3.8% in June to 0.4% in July. The annual growth rate of deposits from central government dropped from 13.5% to 10.8%.

¹⁾ All increases and decreases referred to in this commentary relate only to financial transactions adjusted for non-transaction effects.

¹⁾ The interest rates that are applied by MFIs to CZK-denominated deposits and loans vis-à-vis households and non-financial corporations resident in the Czech Republic. New business refers to any new agreement between the customer and the MFI within given period.

²⁾ Including households (S.14) and non-profit institutions serving households (S.15) according to the classification of the economic sectors ESA95.

³⁾ Households deposits liabilities redeemable at notice include similar deposits of non-financial corporations of which volumes are negligible in this category.

⁴⁾ Including deposit liabilities redeemable at notice of non-financial corporations (which are also included in item 1.3).

⁵⁾ Bank overdrafts include provided bank overdrafts, debit balance on bank accounts and credit card credits.

⁶⁾ Since 2009, the amendment to Act No. 190/2004 Coll., on Bonds, as amended, has been fully applied, under which a mortgage loan is a loan whose redemption, including appurtenances (i.e. interest etc.), is secured by lien (right of pledge) over real estate (property), including property under construction, where the claim arising from the loan does not exceed twice the pledge value of the mortgaged property (Article 28(3)).

⁷⁾ The initial period of fixations is a predetermined period of time at the start of the contract during which the value of the interest rate cannot change. Period up to 1 year includes floating rates.

⁸⁾ Annual percentage rate of charge (APRC) covers total costs of the credit to the client including charges etc

¹⁾ The interest rates that are applied by MFIs to CZK-denominated deposits and loans vis-à-vis households and non-financial corporations resident in the Czech Republic. Interest rates on outstanding amounts refer to the stock of all deposits and all loans at a specific moment.

²⁾ Including households (S.14) and non-profit institutions serving households (S.15) according to the classification of the economic sectors ESA95.

³⁾ Including overnight deposits and deposits with agreed maturity presented in Table 10. For this instrument category, new business and outstanding amounts coincide.

⁴⁾ Since 2009, the amendment to Act No. 190/2004 Coll., on Bonds, as amended, has been fully applied, under which a mortgage loan is a loan whose redemption, including appurtenances (i.e. interest etc.), is secured by lien (right of pledge) over real estate (property), including property under construction, where the claim arising from the loan does not exceed twice the pledge value of the mortgaged property (Article 28(3)).

⁵⁾ Consumer credit and other lending include bank overdrafts presented in Table 10.

Commentary on interest rates of monetary financial institutions (Tables 10 and 11): July 2009

Interest rates on new business

Interest rates on **new deposits** of households decreased slightly compared to June. Interest rates on new deposits of non-financial corporations also recorded a slight decline.

The average interest rate on total new deposits of **households** declined by 0.05 percentage point to 1.18%. Similarly, the rate on overnight deposits recorded a slight decline of 0.03 percentage point to 0.68%. The rate on deposits with agreed maturity fell more sharply by 0.20 percentage point to 1.45%. The interest rate on deposits redeemable at notice fell slightly by 0.04 percentage point to 2.01%.

The overall interest rate on new deposits of **non-financial corporations** declined slightly by 0.07 percentage point to 0.84%. The rate on overnight deposits recorded a decline of 0.13 percentage point to 0.45%. The rate on deposits with agreed maturity of up to two years (these deposits usually account for 100% of all deposits with agreed maturity in this sector) fell by 0.05 percentage point to 1.23%.

New loans to households recorded a significant increase in the interest rate in July, but the rate on new loans to non-financial corporations declined.

The overall interest rate on new loans to **households** rose by 0.59 percentage point to 14.53%, due to an increase in the interest rate on consumer credit of 0.38 percentage point, to 13.97%. Bank overdrafts recorded only a slight increase of 0.01 percentage point, to 18.84%. The rate on other loans was lower by 0.06 percentage point, standing at 6.52%. The interest rate on loans for house purchase picked up only modestly by 0.04 percentage point to 5.53%.

The overall interest rate on loans to **non-financial corporations** decreased by 0.10 percentage point to 4.32%. The rate on bank overdrafts was down by 0.18 percentage point to 4.54%. A slight decline was recorded for the rate on other loans of up to CZK 30 million (0.06 percentage point, to 4.60%). Similarly, the rate on other loans of over CZK 30 million was lower by 0.07 percentage point, standing at 3.68%.

The overall annual percentage rate of charge on loans to households grew sharply, by 0.31 percentage point to 8.62%, as a result of growth in the APRC on consumer credit of 0.46 percentage point to 15.09% in July. The APRC on house purchase loans rose only slightly by 0.03 percentage point to 5.77%.

Interest rates on outstanding amounts

The average interest rate on **outstanding amounts of deposits** of households and non-financial corporations recorded only a modest decline in July.

The overall rate on deposits of **households** declined by 0.05 percentage point to 1.35% compared to June. Similarly, the rate on overnight deposits stood at 0.68%. The rate on deposits redeemable at notice fell moderately to 2.01%. The interest rate on deposits with agreed maturity fell slightly by 0.06 percentage point to 2.04%.

The overall interest rate on deposits of **non-financial corporations** fell by 0.13 percentage point to 0.85%. The rate on overnight deposits also recorded a decline of 0.13 percentage point to 0.45%. The interest rate on deposits with agreed maturity also fell by 0.16 percentage point to 1.45%.

The average interest rate on **outstanding amounts of loans** was almost unchanged from a month earlier in the case of households, but it declined slightly in the case of non-financial corporations.

The overall interest rate on loans to **households** recorded a marginal decline of 0.01 percentage point to 7.03%. At 5.23%, the rate on house purchase loans was also little changed. The rate on consumer credit and other loans remained the same as in June (11.38%).

The average interest rate on outstanding amounts of loans to **non-financial corporations** declined by 0.06 percentage point to 4.48%. The rate on loans to non-financial corporations fell across all maturities. For maturities of up to one year it declined by 0.08 percentage point to 4.29%, while for maturities of over one year and up to five years it was down by 0.08 percentage point to 4.47% and for maturities of over five years it dropped by 0.05 percentage point to 4.63%.

¹⁾ Financial corporations engaged in lending - corporations classified within sector S.123 other financial intermediaries which are predominantly engaged in granting credit or loans or entering into agreements of similar nature, for example financial leasing, factoring, consumer credit, hire purchase, etc. (see Decree No. 307/2004 Coll.). Data are published by the last working day of the second month following the reference period.

Commentary on the aggregated balance sheet of collective investment funds (Table 12): June 2009

As of the end of June 2009, collective investment funds (CIFs) administered assets worth CZK 86.7 billion. The value of the administered assets thus continued to grow, by CZK 1.57 billion, or 1.84%, compared to May 2009.

In June 2009, the largest growth was recorded by bond funds, whose assets rose from CZK 32.8 billion to CZK 34.4 billion, which represents a month-on-month increase of 4.72%. By contrast, equity funds recorded a decline. The value of their assets decreased from CZK 12.3 billion to CZK 12.1 billion, which represents a month-on-month decline of 1.82%. A decline in assets was also recorded by mixed funds (from CZK 35.9 billion to CZK 35.3 billion) and real estate funds (from CZK 6.7 billion to CZK 6.6 billion).

Collective investment funds invested most in debt securities. The total volume of debt securities purchased remained unchanged from the previous month. However, the share of debt securities in equity capital fell compared to May, from 48.48% to 47.61% (by 0.86 percentage point). The funds reduced the share of equity securities in their portfolios in June. The volume of equity securities decreased by CZK 0.74 billion month on month to CZK 31.2 billion, down by 2.33%.

At the end of June 2009, a total of 144 resident collective investment funds were operating in the Czech Republic, of which 27 were equity funds, 28 bond funds, 57 mixed funds, 31 real estate funds and 1 other fund.

Commentary on the quarterly aggregated balance sheet of financial corporations engaged in lending¹⁾ (Tables 13 and 14): June 2009

As of 30 June 2009, financial corporations engaged in lending had total assets of CZK 423.6 billion. Compared to the previous quarter, total assets decreased by CZK 17.1 billion, which represents a quarter-on-quarter decline of 3.88%. In year-on-year comparison they fell by CZK 2.1 billion, i.e. 0.01%. Financial leasing companies accounted for the largest share of total assets (CZK 295.3 billion). The contribution of other lending companies was CZK 106.2 billion and that of corporations engaged in factoring and forfaiting was CZK 22 billion.

The largest asset item was loans, which amounted to CZK 331.8 billion. Loans recorded a decrease of CZK 20.2 billion (5.75%) in 2009 Q1 compared to the previous period. The year-on-year decline in loans was CZK 6.1 billion, or 1.8%. Most loans (97.9%) were granted to resident entities. Short-term loans amounted to CZK 90.7 billion at the end of Q1 and accounted for 21.41% of total assets. Long-term loans amounted to CZK 241.1 billion, i.e. 56.91% of total assets.

The largest part of the loans provided to residents consisted of loans to non-financial corporations, which amounted to CZK 182.9 billion, i.e. 56.31% of loans to residents. Loans provided to non-financial corporations dropped by CZK 9.7 billion quarter on quarter (down by 5.04%) and increased by CZK 0.8 billion year on year (up by 0.01%). CZK 160.7 billion was provided by financial leasing companies, CZK 5.1 billion by other lending companies and CZK 17 billion by factoring and forfaiting companies. These loans are made up predominantly of loans with an original maturity of one to five years, which amounted to CZK 108.6 billion.

Loans to households, which totalled CZK 138.9 billion, were the second largest group of loans to residents. They decreased by CZK 9.8 billion (6.60%) compared to the previous quarter. This fall was chiefly due to the sale of consumer credit abroad. Consumer credit accounts for 87.22% of the total value of loans provided to households. This decrease also affected the sizeable fall in total assets compared to the previous quarter. In year-on-year terms, the value of loans to households decreased by CZK 9.6 billion, i.e. 6.47%. These loans accounted for 42.76% of loans granted to residents. CZK 64 billion was provided by financial leasing companies and CZK 74.9 billion by other lending companies. Loans with an original maturity of one to five years amounted to CZK 85 billion, giving them the largest share in loans to households.

1) Under Decree No. 307/2004 Coll. financial corporations engaged in lending are companies whose main or major business activity involves providing credit or loans or entering into agreement of similar nature, e.g. financial leasing, factoring, consumer credit, hire-purchase financing, etc.

Glossary

Harmonisation of statistics: the Treaty establishing the European Community tasked the European Central Bank (ECB) with ensuring harmonised statistics according to Article 5 of the Statute of the European System of Central Banks. The national central banks of EC Member States therefore collect statistical information according to a uniform definition, from which the ECB then compiles aggregate data for euro area monetary policy. Although Council Regulation No 2533/98, which specifies the requirements for statistical data collection, only concerns euro area countries, the ECB also receives full data sets from the non-participating countries (e.g. the Czech Republic) in order to monitor their economic and financial development.

Monetary statistics: financial macrostatistics of sectors S.121, S.122 and S.123 based exclusively on the "host country" principle. According to this principle, a resident reporting unit is an institution resident in a given economic territory. The reporting population includes 1) institutions incorporated and located in the territory, including subsidiaries of parent companies located outside that territory, and 2) branches of institutions that have their head office outside that territory.

APRC: annual percentage rate of charge, i.e. the rate including interest expenses and all related costs of the credit to the client (fees etc.).

Collective investment funds: for the purposes of monetary and banking statistics, collective investment funds comprise unit trusts and investment funds other than money market funds which are resident in the Czech Republic. These are undertakings the sole object of which is collective investment, i.e. pooling investor funds and investing them under conditions stipulated in the Act on Collective Investment (No. 189/2004 Coll.). Such undertakings may be constituted under the Act either as unit trust managed by an investment company or as investment funds.

Consolidated balance sheet of the MFI sector: the basic statistical tool of monetary statistics. It is based on the residency principle and is obtained by netting out inter-MFI positions on their aggregated balance sheet.

Consumer credit: loans granted to households for personal use in the consumption of goods and services.

Contribution to annual growth rate: the growth rate of a selected component weighted by its share in the total growth rate.

Deposits redeemable at notice: deposits that can be withdrawn by clients only after the expiry of a period of notice agreed in advance, which starts at the moment of notification of the intention to withdraw the deposit.

Deposits with agreed maturity: deposits that cannot be withdrawn by clients before a predefined maturity.

Financial corporations engaged in lending (FCLs):

Definition: FCLs mean corporations classified within sector S.123 other financial intermediaries which are predominantly engaged in granting credit or loans or entering into agreements of similar nature, for example financial leasing, factoring, consumer credit, hire purchase, etc. (see Decree No. 307/2004 Coll.)

Type of services:

1. Financial leasing - It is financial service, when lessee acquires the right to use good in exchange for rental payment over predetermined term. All risk and rewards of ownership are transferred from lessor to lessee. After lapse of predetermined term ownership of good is transferred from lessor to lessee.

2. Factoring - It is financial service consisting in purchase of short-term receivables (with maturity 30-90 days) before their maturity date. Receivables are transferred on factoring company – factor- by supplier of goods or services.

3. Other lending - This category encompasses granting credit or loans or agreements of similar nature different from financial leasing and factoring. It deals especially with consumer credit, hire purchase, consumption loans, etc.

Growth rate: the percentage change in the monitored variable over the reference period, calculated from the volumes of monthly financial transactions and the outstanding amounts at the beginning of each month.

Household sector: institutional units included in the sectors of households (S.14) and non-profit institutions serving households (S.15) under ESA 95.

Glossary (cont'd)

Housing loans: Loans granted to households for the purpose of purchasing/investing in housing, including building and home improvements.

Interest rate fixation: a period of interest rate fixation, i.e. a period at the beginning of a contract for which the agreed interest rate cannot be changed. Period up to 1 year includes floating rates.

MFI longer-term financial liabilities: comprise deposits with an agreed maturity of over two years, deposits redeemable at a period of notice of over three months, debt securities issued with an original maturity of more than two years and the capital and reserves of the Czech MFI sector.

Monetary aggregates: comprise the monetary liabilities of monetary financial institutions to non-MFI Czech residents except central government. The narrow monetary aggregate M1 includes currency in circulation (excluding cash at banks' cash desks) and overnight deposits. The intermediate monetary aggregate M2 comprises M1, deposits redeemable at a period of notice of up to and including three months and deposits with a maturity of up to and including two years. The broad monetary aggregate M3 comprises M2, money market fund shares/units, debt securities with a maturity of up to two years and repurchase agreements.

Monetary financial institutions (MFIs): financial institutions forming the money-issuing sector. Under Community law, these include the central bank, resident credit institutions, and all other resident financial institutions whose business is to receive deposits and/or close substitutes for deposits from entities other than MFIs and, for their own account (at least in economic terms), to grant credit and/or invest in securities. In the Czech Republic, MFIs include the central bank, banks, money market funds and credit unions.

Money-holding sector: all institutional units except central government (S.1311) and monetary financial institutions (S.121 and S.122) under ESA 95.

Money-issuing sector: all institutional units included in the sectors of the central bank (S.121) and other monetary financial institutions (S.122) under ESA 95.

Money-neutral sector: an institutional sector comprising the central government sector (S.1311) under ESA 95.

Money market funds: MMFs are defined as those collective investment funds of which the units are, in terms of liquidity, close substitutes for deposits and which primarily invest in money market instruments and/or in MMF shares/units and/or in other transferable debt instruments with a residual maturity of up to and including one year, and/or in bank deposits, and/or which pursue a rate of return that approaches the interest rates of money market instruments. The criteria applied in order to identify MMFs shall be derived from the public prospectus as well as fund rules, instruments of incorporation, established statutes or by-laws, subscription documents or investment contracts, marketing documents, or any other statement with similar effects, of the collective investment undertaking.

Net external assets: comprise external assets of Czech MFIs (such as monetary gold, non-koruna banknotes, securities issued by non-residents and loans granted to non-residents) minus external liabilities of the Czech MFI sector (such as non-residents' holdings of deposits, repurchase agreements, money market fund shares and units, and debt securities with a maturity of up to and including two years issued by MFIs and held by non-residents).

Non-MFIs: all resident sectors excluding MFIs, i.e. general government (S.13), non-financial corporations (S.11), financial institutions other than MFIs (S.123 and S.124) and households and non-profit institutions serving households (S.14 and S.15) under ESA 95.

Other financial intermediaries (OFIs): entities included in the sectors of other financial intermediaries except insurance corporations and pension funds (S. 123), financial auxiliaries (S.124) and insurance corporations and pensions funds (S.125) under ESA 95.

Private sector: a sector comprising all institutional sectors except general government (S.13) and monetary financial institutions (S.121 and S.122) under ESA 95.

Glossary (cont'd)

Rates on new business: interest rates agreed by the bank and the client for all agreements negotiated during the reference period.

Rates on outstanding amounts: interest rates applied to end-of-period balances.

Reclassifications: comprise any changes in the MFI balance sheet resulting from changes in the reporting population, corporate restructuring, reclassifications of assets and liabilities, and corrections of reported errors.

Residents: all domestic and foreign legal entities and natural persons, including branches of foreign banks and foreign owners of buildings and land, whose centre of economic interest is in the given territory. Foreign legal entities and natural persons are considered residents after at least one year of economic activity in the territory, with the exception of foreign bank branches and owners of buildings and land, who become residents at the moment they perform a valid legal act (in the case of foreign owners of buildings and land, this only applies in connection with transactions relating to the building or land in question).

Transaction (flow) data: values related to the whole period which are calculated as the difference between the balances at the end of the current and the previous period adjusted for non-transaction effects, i.e. effects connected with reclassifications, valuation changes and exchange rate variations over the period. These factors result in breaks in time series, thereby affecting the comparability of end-of-period balances. Transaction (flow) data only reflect those changes that arise from transactions, i.e. from accepting financial assets or providing financial liabilities.

Unit trusts other than money market funds:

1. *equity funds and funds of funds* – funds that constantly invest 66% or more of their assets on the equity market (i.e. in shares and instruments bearing equity risk) and/or funds that constantly invest 66% or more of their assets in the units and shares of other unit trusts/investment funds. Equity funds also include index funds and guaranteed funds linked to stock indices.

2. *bond funds* – funds that constantly invest on the bond market. Additional investment in equities is allowed, but the share of equities must not exceed 10% of the fund's assets. Bond funds also include index funds and guaranteed funds linked to bond indices.

3. *mixed funds* – funds that invest in various assets (equities and bonds) on various markets and do not have limits on the share of equities or bonds.

Technical Notes

A. Calculation of growth rates

The growth rate for the reference period is calculated from the volumes of monthly financial transactions and the outstanding amounts at the beginning of each month. Monthly transactions are calculated from differences in outstanding amounts adjusted for reclassifications, other revaluations, exchange rate variations and other changes which do not arise from transactions. This data thus reflects only those changes that arise from accepting financial assets or providing financial liabilities. Reclassifications and other non-transaction corrections are introduced into the transaction statistics to preserve the comparability of the gradual monitoring results, thereby enabling calculation of the indices of expected outstanding balances of the monitored variables and determination of their growth rates.

Method of calculation

1. The month-on-month percentage change a_t^M for month t is calculated as:

$$(a) \quad a_t^M = \left(\frac{F_t^M}{L_{t-1}} \right) \times 100$$

2. The annual growth rate for month t , i.e. the change for the last 12 months ending with month t , is calculated as the product of the twelve coefficients for each previous month. The calculation of the annual growth rate from the month-on-month growth rates thus enables transaction changes and non-transaction effects in the individual months to be taken into account.

$$(b) \quad a_t = \left[\prod_{i=0}^{11} \left(1 + \frac{F_{t-i}^M}{L_{t-1-i}} \right) - 1 \right] \times 100$$

where

F_t^M - transactions in month t

$F_t^M = (L_t - L_{t-1}) - C_t^M - E_t^M - V_t^M$

and

L_t - outstanding amount at the end of month t

C_t^M - reclassifications in month t

E_t^M - exchange rate variations in month t

V_t^M - valuation changes in month t

Growth rates for other reference periods are derived from formula (b).

B. Calculation of the contribution to the annual growth rate of a monitored variable (e.g. M3)

If $a_t(M3)$ represents the annual growth rate of M3 for the year ending with month t , and $F_{t-i}(M1)$, $F_{t-i}(M2-M1)$, $F_{t-i}(M3-M2)$ are the monthly transactions of the components M1, M2-M1 and M3-M2 in month $t-i$, the contribution of M1 to the annual growth rate of M3, for example, is calculated as:

$$\frac{\sum_{i=0}^{11} F_{t-i}(M1)}{\sum_{i=0}^{11} [F_{t-i}(M1) + F_{t-i}(M2-M1) + F_{t-i}(M3-M2)]} \times a_t(M3)$$
