List of Annexes

1) The information in Tables 3-14 are based on monetary statistics of CNB harmonized with monetary statistics of European System of Central Banks. The data are not seasonally adjusted and the last period data are always preliminary.

2) All the data quoted in this Publication are included in the ARAD database (Time series database - ARAD >> Money and banking statistics >> Monetary statistics >> Monetary Statistics Publication).

Interest rates

Commentary on key interest rates (Table 1) and financial market interest rates (Table 2): November 2007

Key interest rates

The CNB's 2W repo rate has been set at 3.50% since the end of November 2007, the ECB's key interest rate has been re-set at 4.00% since mid-June 2007. The difference between the CNB's and the ECB's key rates is thus 0.50 percentage point.

Financial market interest rates

In November the interest rates on the interbank deposit market increased in the Czech Republic (except for the reference interest rate CZEONIA which decreased), within the Eurozone they decreased moderately (except for the reference interest rate EONIA which increased). The three-month PRIBOR was 3.73% and the three-month EURIBOR was 4.64%.

Bond yields on the capital market in the Czech Republic increased in November, the most visible change was registered by the yield of the 3-year bond. The yield of such a bond has already exceeded the yield of the 5-year bond repeatedly within the last 2 months. The yields of bonds in the Eurozone decreased significantly in the all observed maturity bands in November. In November the yield of the 10-year bond in the Czech Republic was 4.54%, the yield of the 10-year bond in Eurozone was lower by 0.28 percentage point (i.e. 4.26%).

¹⁾ Monetary aggregates comprise monetary liabilities of MFIs vis-à-vis non-MFI Czech residents excluding central government. M1 is the sum of currency in circulation and overnight deposits; M2 is the sum of M1, deposits with an agreed maturity of up to two years and deposits redeemable at notice of up to three months; and M3 is the sum of M2, repurchase agreements, money market fund shares/units and debt securities up to two years.

²⁾ Including all sectors without general government (S.13) and MFIs sector (S.121 and S.122).

³⁾ Net foreign assets (NFA) represent balance of financial claims and liabilities of the MFI sector vis-a-vis nonresidents

⁴⁾ Net value of flow data calculated by adjusting the difference between end-of-period levels for the effect of non-transactions-related factors.

Comments on monetary developments statistics¹⁾ (Tables 3-9): November 2007

The annual rate of growth of M3 increased from 15.5% in October to 16.7% in November. In month-on-month terms, M3 grew by 2.0%. As a result of financial transactions, M3 grew by CZK 336.3 billion year on year (and by CZK 45.9 billion month on month), to CZK 2,332.2 billion.

Main components of M3

With the largest contribution to M3 growth, the monetary aggregate M1 is the most important component of M3, accounting for almost two-thirds of the annual M3 growth (Table 7).

The annual rate of growth of M1 fell from 15.3% in October to 14.1% in November. The annual rate of growth of overnight deposits decreased as well, from 16.7% in October to 15.0% in November. In month-on-month comparison, overnight deposits fell by 0.4% owing to financial transactions. Within overnight deposits, almost all sectors recorded month-on-month decreases (with deposits of insurance corporations and pension funds showing the largest decline, of 56.5%, or CZK 12.5 billion). The only exceptions were non-financial corporations (up by 0.6%, or CZK 2.5 billion), and households (up by 1.14%, or CZK 6.9 billion).

The annual rate of growth of currency in circulation increased from 10.5% in October to 10.9% in November. In month-on-month terms, currency in circulation rose by 2.1% (an increase of CZK 6.5 billion due to financial transactions).

Other short-term deposits (excluding overnight deposits) grew by CZK 45.9 billion (i.e. 6.5%) month on month, owing to financial transactions. In November, the annual rate of growth of these deposits increased by 6.9 percentage points to 23.5% (from 16.6% in October). Deposits redeemable at notice of up to three months (the smaller component) have long been recording strong annual growth. Their annual growth rate in November was 30.8%. The annual rate of growth of deposits with maturity of up to two years, which are the dominant component of short-term deposits, increased significantly compared to the previous month, up by 9.2 percentage points to 20.6%.

Within other short-term deposits, a month-on-month decrease was recorded solely for deposits by other government (down by 12.2%, or CZK 3.6 billion). Deposits of the other sectors increased month on month: the largest growth in terms of volume was recorded by non-financial corporations (up by CZK 23.0 billion, or 12.0%), followed by insurance corporations and pension funds (up by CZK 12.2 billion, or 55.3%) and households (up by CZK 11.7 billion, or 2.6%).

Marketable instruments, which consist of repos, money market fund shares/units and debt securities with maturities of up to two years, fell by 2.5% to CZK 72.3 billion (from CZK 74.2 billion in October). The annual rate of growth of marketable instruments decreased by 1.7 percentage point to 6.8% (from 8.5% in October).

Main counterparts of M3

The annual rate of growth of loans extended to general government was -11.2% in November (-15.3% in October). The annual rate of growth of purchased government bonds dropped to 10.5% in November (from 12.7% in October).

In November, the annual growth rate of credit to the private sector decreased slightly, to 25.5% (from 25.9% in October). This growth rate was mostly attributable to households. They account for more than one-half of the annual rate of growth of loans granted to the private sector (Table 8). The annual growth rates of loans to households have long been high (33.6% in November). Non-financial corporations are another sector accounting for a large proportion of the annual rate of growth of loans to the private sector. Their annual rate of growth decreased from 22.1% in October to 18.9% in November.

The annual rate of increase of net external assets grew from 2.3% in October to 5.6% in November. The annual rate of growth of long-term financial liabilities fell from 9.5% in October to 9.1% in November. The annual rate of growth of deposits from central government grew from 16.5% to 22.3%.

¹⁾ All increases and decreases referred to in this commentary relate only to financial transactions adjusted for non-transaction effects.

Commentary on interest rates of monetary financial institutions (Tables 10 and 11): November 2007

Interest rates on new business

Interest rates on **new deposits** of households and non-financial corporations increased slightly again in November, continuing a moderate upward trend observed since mid-2007.

As in the previous month, the overall average interest rate on new deposits of **households** edged up, by 0.03 percentage point to 1.14%. The interest rate on overnight deposits recorded a modest rise of 0.05 percentage point to 0.54%. The interest rate on deposits redeemable at notice was up by 0.02 percentage point to 2.11% and the interest rate on deposits with agreed maturity remained unchanged from the previous month at 2.52%.

The overall average interest rate on new deposits of **non-financial corporations** and the interest rate on deposits with agreed maturity remained broadly unchanged at 1.82% and 2.97%, respectively. At 1.06%, the interest rate on overnight deposits was up by 0.10 percentage point.

The interest rate on **new loans** provided by banks to households increased significantly in November. However, the rate on new bank loans to non-financial corporations was almost unchanged.

On average, loans to **households** were remunerated at 11.73%, which represents an increase in the interest rate of 0.31 percentage point. The rise in the interest rates on bank overdrafts and consumer credit was also strong. They picked up by 0.47 percentage point to 16.59% and 0.35 percentage point to 13%, respectively. Thus, the interest rate on consumer credit was only slightly below the level recorded at the beginning of year 2007. By contrast, the interest rate on housing loans grew at a more moderate pace to 5.19% (an increase of 0.08 percentage point), continuing an upward trend visible since June 2007. Other loans recorded a stronger increase in the interest rate to 6.60%, up by 0.19 percentage point.

Only marginal growth was recorded for the interest rate on new loans to **non-financial corporations**, which rose by 0.01 percentage point to 5.10%. The rate on bank overdrafts remained the same as in the previous month (5.40%), the rate on other loans up to CZK 30 million picked up by 0.08 percentage point to 5.50% and that on other loans over CZK 30 million edged down by 0.05 percentage point to 4.34%.

The overall APRC on loans to households grew strongly by 0.23 percentage point on a month earlier (to 7.65%). This was due mainly to the APRC on consumer credit, which increased by 0.32 percentage point to 13.55%. At 0.09 percentage point, the increase in the APRC on housing loans was more moderate (to 5.42%).

Interest rates on outstanding amounts

The interest rate on **outstanding amounts** of household **deposits** grew only modestly in November, whereas the rate on outstanding amounts on deposits of non-financial corporations showed a higher increase.

The overall average interest rate on deposits of **households** picked up slightly again (up by 0.03 percentage point to 1.36%), while the interest rate on deposits with agreed maturity rose by 0.02 percentage point to 2.05%.

The overall average interest rate on deposits of **non-financial corporations** recorded stronger growth. At 1.67%, it stood 0.11 percentage point higher than a month earlier. At 2.77%, the interest rate on outstanding amounts of deposits with agreed maturity was up by 0.05 percentage point.

Interest rates on **outstanding amounts of loans** to households remained unchanged from the previous month, with rates on outstanding amounts of loans to non-financial corporations showing a moderate increase.

The overall average interest rate on outstanding amounts of loans to **households** was unchanged at 6.61%. The rate for housing loans was 4.87% and that for consumer credit and other loans reached 10.91%.

As in the previous month, the overall interest rate on outstanding amounts of loans to **non-financial corporations** grew by 0.08 percentage point, reaching 5.24%. At 5.27%, loans with agreed maturity for over one year and up to five years recorded the largest increase of 0.16 percentage point. Loans with agreed maturity of up to one year were remunerated at 5.14%, up by 0.04 percentage point. Rates on loans for over five years picked up by 0.09 percentage point to 5.35%.

¹⁾ Financial corporations engaged in lending - corporations classified within sector S.123 other financial intermediaries which are predominantly engaged in granting credit or loans or entering into agreements of similar nature, for example financial leasing, factoring, consumer credit, hire purchase, etc. (see Decree No. 307/2004 Coll.). Data are published by the 75th calendar day following the reference period.

Commentary on the quarterly aggregated balance sheet of collective investment funds (Table 12): September 2007

As of the end of Q3, collective investment funds (CIFs) administered assets worth CZK 102.5 billion. This means that the value of assets administered by these funds rose by CZK 6.8 billion in Q3, which represents a quarter-on-quarter increase of 7.1%. Compared to the same period of 2006, the increase was 37.93%, or CZK 28.2 billion.

In Q3, the largest growth was recorded by funds of funds, whose assets grew from CZK 17.1 billion to CZK 19.5 billion, which represents a quarter-on-quarter increase of 14.21%. Growth was also recorded by mixed funds (from CZK 32.7 billion to CZK 33.9 billion), equity funds (from CZK 13.3 billion to CZK 15.2 billion) and the so-called other funds (from CZK 9.4 billion to CZK 11.4 billion). By contrast, bond funds recorded a fall in assets of CZK 0.7 billion to CZK 22.5 billion. Bond funds thus see a continuing downward trend in the value of administered assets.

Despite the fall in bond funds, the collective investment funds most frequently invested in debt securities, particularly those issued by the general government of the Czech Republic. The total volume of purchased debt securities was CZK 35.9 billion, accounting for 35.04% of CIF equity capital. Compared to the previous quarter, the share of debt securities in equity capital decreased by 2.23 percentage points and dropped by 12.03 percentage points in year-on-year comparison. The largest increase in the volume compared to the previous quarter was recorded by shares and other equity. Investment in shares grew by CZK 1.2 billion to CZK 27.7 billion, which represents a quarter-on-quarter increase of 4.69%. The highest annual growth was recorded for investments in collective investment shares and units. The volume of funds invested in this kind of assets grew by CZK 7.1 billion, up by 55.32%. Funds thus continued to invest in more risky assets compared to relatively certain bonds.

At the end of Q3, 100 resident investment funds were active in the Czech Republic, of which 14 were equity funds, 25 funds of funds, 33 mixed funds, 13 bond funds, 14 funds of qualified investors and 1 real estate fund.

Commentary on the quarterly aggregated balance sheet of financial corporations engaged in lending (Table 13 and 14): September 2007

As of 30 September 2007, financial corporations engaged in lending had total assets of CZK 372.7 billion, which represents a rise of CZK 8.4 billion (or 2.3%) compared to the previous quarter. In year-on-year terms, total assets increased by CZK 38.1 billion, i.e. 11.4%. This growth was mostly attributable to financial leasing companies, which also have the largest share in total assets (CZK 257.1 billion). Other lending companies and corporations engaged in factoring and forfaiting accounted for CZK 92.9 billion and CZK 22.7 billion respectively.

The largest asset item was loans, which amounted to CZK 298.9 billion. In Q3, loans increased by CZK 14.8 billion, or 5.2%. In year-on-year comparison, loans grew by CZK 35.4 billion, or 13.4%. Most of these loans (98%) were granted to resident entities. At the end of Q3, short-term loans granted to residents amounted to CZK 87.8 billion. Short-term loans to residents thus accounted for 23.6% of total assets. Long-term loans to residents totalled CZK 205.6 billion, i.e. 55.2% of total assets.

The largest part of loans provided to residents consisted of loans to non-financial corporations, which amounted to CZK 161.9 billion, i.e. 55.2 % of loans to residents. Loans provided to non-financial corporations rose by CZK 7.9 billion (5.1%) compared to the previous quarter. In year-on-year terms, loans to non-financial corporations increased by CZK 14.1 billion, i.e. 9.5%. Financial leasing companies, other lending companies and factoring and forfaiting companies provided loans amounting to CZK 138.3 billion, CZK 4.2 billion and CZK 19.5 billion respectively. These loans are made up predominantly of loans with original maturity of one to five years, which amounted to CZK 98.7 billion.

The second largest group of loans to residents are loans to households totalling CZK 129.2 billion, up by CZK 5.4 billion (4.3%) from the previous quarter. In year-on-year terms, loans provided to households increased by CZK 20.2 billion, i.e. 18.5%. These loans account for 44 % of loans granted to residents. Financial leasing companies provided CZK 64 billion and other lending companies CZK 65.2 billion. Loans with original maturity of one to five years amounted to CZK 81.8 billion, giving them the largest share in loans to households.

¹⁾ Under Decree No. 307/2004 Coll. these are companies whose main or major business activity involves providing credit or loans or entering into agreement of similar nature, e.g. financial leasing, factoring, consumer credit, hire-purchase financing, etc.

Glossary

Harmonisation of statistics: the Treaty establishing the European Community tasked the European Central Bank (ECB) with ensuring harmonised statistics according to Article 5 of the Statute of the European System of Central Banks. The national central banks of EC Member States therefore collect statistical information according to a uniform definition, from which the ECB then compiles aggregate data for euro area monetary policy. Although Council Regulation No 2533/98, which specifies the requirements for statistical data collection, only concerns euro area countries, the ECB also receives full data sets from the non-participating countries (e.g. the Czech Republic) in order to monitor their economic and financial development.

Monetary statistics: financial macrostatistics of sectors S.121, S.122 and S.123 based exclusively on the "host country" principle. According to this principle, a resident reporting unit is an institution resident in a given economic territory. The reporting population includes 1) institutions incorporated and located in the territory, including subsidiaries of parent companies located outside that territory, and 2) branches of institutions that have their head office outside that territory.

APRC: annual percentage rate of charge, i.e. the rate including interest expenses and all related costs of the credit to the client (fees etc.).

Collective investment funds: for the purposes of monetary and banking statistics, collective investment funds comprise unit trusts and investment funds other than money market funds which are resident in the Czech Republic. These are undertakings the sole object of which is collective investment, i.e. pooling investor funds and investing them under conditions stipulated in the Act on Collective Investment (No. 189/2004 Coll.). Such undertakings may be constituted under the Act either as unit trust managed by an investment company or as investment funds.

Consolidated balance sheet of the MFI sector: the basic statistical tool of monetary statistics. It is based on the residency principle and is obtained by netting out inter-MFI positions on their aggregated balance sheet.

Consumer credit: loans granted to households for personal use in the consumption of goods and services.

Contribution to annual growth rate: the growth rate of a selected component weighted by its share in the total growth rate.

Deposits redeemable at notice: deposits that can be withdrawn by clients only after the expiry of a period of notice agreed in advance, which starts at the moment of notification of the intention to withdraw the deposit.

Deposits with agreed maturity: deposits that cannot be withdrawn by clients before a predefined maturity.

Financial corporations engaged in lending (FCLs):

Definition: FCLs mean corporations classified within sector S.123 other financial intermediaries which are predominantly engaged in granting credit or loans or entering into agreements of similar nature, for example financial leasing, factoring, consumer credit, hire purchase, etc. (see Decree No. 307/2004 Coll.)

Type of services:

1. Financial leasing - It is financial service, when lessee acquires the right to use good in exchange for rental payment over predetermined term. All risk and rewards of ownership are transferred from lessor to lessee. After lapse of predetermined term ownership of good is transferred from lessor to lessee.
2. Factoring - It is financial service consisting in purchase of short-term receivables (with maturity 30-90 days) before their maturity date. Receivables are transferred on factoring company – factor- by supplier of goods or services.
3. Other lending - This category encompasses granting credit or loans or agreements of similar nature different from financial leasing and factoring. It deals especially with consumer credit, hire purchase, consumption loans, etc.

Growth rate: the percentage change in the monitored variable over the reference period, calculated from the volumes of monthly financial transactions and the outstanding amounts at the beginning of each month.

Household sector: institutional units included in the sectors of households (S.14) and non-profit institutions serving households (S.15) under ESA 95.

Glossary (cont'd)

Housing loans: Loans granted to households for the purpose of purchasing/investing in housing, including building and home improvements.

Interest rate fixation: a period of interest rate fixation, i.e. a period at the beginning of a contract for which the agreed interest rate cannot be changed. Period up to 1 year includes floating rates.

MFI longer-term financial liabilities: comprise deposits with an agreed maturity of over two years, deposits redeemable at a period of notice of over three months, debt securities issued with an original maturity of more than two years and the capital and reserves of the Czech MFI sector.

Monetary aggregates: comprise the monetary liabilities of monetary financial institutions to non-MFI Czech residents except central government. The narrow monetary aggregate M1 includes currency in circulation (excluding cash at banks' cash desks) and overnight deposits. The intermediate monetary aggregate M2 comprises M1, deposits redeemable at a period of notice of up to and including three months and deposits with a maturity of up to and including two years. The broad monetary aggregate M3 comprises M2, money market fund shares/units, debt securities with a maturity of up to two years and repurchase agreements.

Monetary financial institutions (MFIs): financial institutions forming the money-issuing sector. Under Community law, these include the central bank, resident credit institutions, and all other resident financial institutions whose business is to receive deposits and/or close substitutes for deposits from entities other than MFIs and, for their own account (at least in economic terms), to grant credit and/or invest in securities. In the Czech Republic, MFIs include the central bank, banks, money market funds and credit unions.

Money-holding sector: all institutional units except central government (S.1311) and monetary financial institutions (S.121 and S.122) under ESA 95.

Money-issuing sector: all institutional units included in the sectors of the central bank (S.121) and other monetary financial institutions (S.122) under ESA 95.

Money-neutral sector: an institutional sector comprising the central government sector (S.1311) under ESA 95.

Money market funds: MMFs are defined as those collective investment funds of which the units are, in terms of liquidity, close substitutes for deposits and which primarily invest in money market instruments and/or in MMF shares/units and/or in other transferable debt instruments with a residual maturity of up to and including one year, and/or in bank deposits, and/or which pursue a rate of return that approaches the interest rates of money market instruments. The criteria applied in order to identify MMFs shall be derived from the public prospectus as well as fund rules, instruments of incorporation, established statutes or by-laws, subscription documents or investment contracts, marketing documents, or any other statement with similar effects, of the collective investment undertaking.

Net external assets: comprise external assets of Czech MFIs (such as monetary gold, non-koruna banknotes, securities issued by non-residents and loans granted to non-residents) minus external liabilities of the Czech MFI sector (such as non-residents' holdings of deposits, repurchase agreements, money market fund shares and units, and debt securities with a maturity of up to and including two years issued by MFIs and held by non-residents).

Non-MFIs: all resident sectors excluding MFIs, i.e. general government (S.13), non-financial corporations (S.11), financial institutions other than MFIs (S.123 and S.124) and households and non-profit institutions serving households (S.14 and S.15) under ESA 95.

Other financial intermediaries (OFIs): entities included in the sectors of other financial intermediaries except insurance corporations and pension funds (S. 123), financial auxiliaries (S.124) and insurance corporations and pensions funds (S.125) under ESA 95.

Private sector: a sector comprising all institutional sectors except general government (S.13) and monetary financial institutions (S.121 and S.122) under ESA 95.

Glossary (cont'd)

Rates on new business: interest rates agreed by the bank and the client for all agreements negotiated during the reference period.

Rates on outstanding amounts: interest rates applied to end-of-period balances.

Reclassifications: comprise any changes in the MFI balance sheet resulting from changes in the reporting population, corporate restructuring, reclassifications of assets and liabilities, and corrections of reported errors.

Residents: all domestic and foreign legal entities and natural persons, including branches of foreign banks and foreign owners of buildings and land, whose centre of economic interest is in the given territory. Foreign legal entities and natural persons are considered residents after at least one year of economic activity in the territory, with the exception of foreign bank branches and owners of buildings and land, who become residents at the moment they perform a valid legal act (in the case of foreign owners of buildings and land, this only applies in connection with transactions relating to the building or land in question).

Transaction (flow) data: values related to the whole period which are calculated as the difference between the balances at the end of the current and the previous period adjusted for non-transaction effects, i.e. effects connected with reclassifications, valuation changes and exchange rate variations over the period. These factors result in breaks in time series, thereby affecting the comparability of end-of-period balances. Transaction (flow) data only reflect those changes that arise from transactions, i.e. from accepting financial assets or providing financial liabilities.

Unit trusts other than money market funds:

1. *equity funds and funds of funds* – funds that constantly invest 66% or more of their assets on the equity market (i.e. in shares and instruments bearing equity risk) and/or funds that constantly invest 66% or more of their assets in the units and shares of other unit trusts/investment funds. Equity funds also include index funds and guaranteed funds linked to stock indices.

2. *bond funds* – funds that constantly invest on the bond market. Additional investment in equities is allowed, but the share of equities must not exceed 10% of the fund's assets. Bond funds also include index funds and guaranteed funds linked to bond indices.

3. *mixed funds* – funds that invest in various assets (equities and bonds) on various markets and do not have limits on the share of equities or bonds.

Technical Notes

A. Calculation of growth rates

The growth rate for the reference period is calculated from the volumes of monthly financial transactions and the outstanding amounts at the beginning of each month. Monthly transactions are calculated from differences in outstanding amounts adjusted for reclassifications, other revaluations, exchange rate variations and other changes which do not arise from transactions. This data thus reflects only those changes that arise from accepting financial assets or providing financial liabilities. Reclassifications and other non-transaction corrections are introduced into the transaction statistics to preserve the comparability of the gradual monitoring results, thereby enabling calculation of the indices of expected outstanding balances of the monitored variables and determination of their growth rates.

Method of calculation

1. The month-on-month percentage change a_t^M for month t is calculated as:

$$(a) \quad a_t^M = \left(\frac{F_t^M}{L_{t-1}} \right) \times 100$$

2. The annual growth rate for month t , i.e. the change for the last 12 months ending with month t , is calculated as the product of the twelve coefficients for each previous month. The calculation of the annual growth rate from the month-on-month growth rates thus enables transaction changes and non-transaction effects in the individual months to be taken into account.

$$(b) \quad a_t = \left[\prod_{i=0}^{11} \left(1 + \frac{F_{t-i}^M}{L_{t-1-i}} \right) - 1 \right] \times 100$$

where

F_t^M - transactions in month t

$F_t^M = (L_t - L_{t-1}) - C_t^M - E_t^M - V_t^M$

and

L_t - outstanding amount at the end of month t

C_t^M - reclassifications in month t

E_t^M - exchange rate variations in month t

V_t^M - valuation changes in month t

Growth rates for other reference periods are derived from formula (b).

B. Calculation of the contribution to the annual growth rate of a monitored variable (e.g. M3)

If $a_t(M3)$ represents the annual growth rate of M3 for the year ending with month t , and $F_{t-i}(M1)$, $F_{t-i}(M2-M1)$, $F_{t-i}(M3-M2)$ are the monthly transactions of the components M1, M2-M1 and M3-M2 in month $t-i$, the contribution of M1 to the annual growth rate of M3, for example, is calculated as:

$$\frac{\sum_{i=0}^{11} F_{t-i}(M1)}{\sum_{i=0}^{11} [F_{t-i}(M1) + F_{t-i}(M2-M1) + F_{t-i}(M3-M2)]} \times a_t(M3)$$
