FOREIGN DIRECT INVESTMENT

March 2005

1. INTRODUCTION

Focus and content of the publication

The annual publication *Foreign Direct Investment* provides an in-depth statistical survey of foreign direct investment (FDI) in the Czech Republic and domestic direct investment abroad. The FDI statistics are compiled in accordance with the international standards adopted by the OECD, the European Commission and the IMF for compilation of the balance of payments, of which they are a part.

Closely linked with FDI reporting is the issue of quantifying the globalisation process and the statistics on foreign affiliates. In 1998, the Czech National Bank changed its FDI reporting methodology to harmonise the Czech FDI statistics with international standards. Starting with the data for 1997 the reporting duty to international organisations in the area of FDI stocks has been met to the full extent for all required indicators. In 1999, the Czech Republic became one of the first OECD and IMF member countries to start submitting data on foreign affiliates (FATS Statistics).

The publication *Foreign Direct Investment* consists of five sections. The first two sections contain summary and cross-sectional tables with data on stocks of direct investment abroad and in the Czech Republic broken down by economic activity and territory. The next section presents data on direct investment flows in the reference year. The following section gives time series for FDI stocks and flows since the establishment of the Czech Republic in 1993. The last section includes selected indicators for foreign affiliates.

Definition of foreign direct investment

The CNB bases its FDI statistics on the definition of foreign direct investment set by the OECD in harmony with EUROSTAT and the IMF. This definition specifies that:

“Foreign direct investment reflects the objective of obtaining a lasting interest by a resident entity in one economy (“direct investor”) in an entity resident in an economy other than that of the investor (“direct investment enterprise”). The lasting interest implies the existence of a long-term relationship between the direct investor and the enterprise, and a significant degree of influence on the management of the enterprise. Direct investment involves both the initial transaction between the two entities and all subsequent capital transactions between them and among affiliated enterprises, both incorporated and unincorporated.” A direct investment enterprise is defined as “an incorporated or unincorporated enterprise in which a foreign investor owns 10 per cent or more of the ordinary shares or voting power of an incorporated enterprise or the equivalent of an unincorporated enterprise.”

A direct investment enterprise includes directly and indirectly owned affiliates. These are divided – according to the investor’s percentage ownership of the ordinary shares or voting power – into subsidiaries (more than 50%), associates (10%–50%) and branches (wholly-owned permanent establishments or offices of a direct investor; land and structures directly

owned by a foreign resident; or mobile equipment that operates within an economy for at least one year).

In addition to shares in equity capital, foreign direct investment covers reinvested earnings and other capital, including lending transactions with a direct investor. The composition of direct investment can thus be expressed using the following relationship:

$$\text{Direct investment} = \text{equity capital} + \text{reinvested earnings} + \text{other capital}$$

- **Equity capital** comprises nonresident investment in the equity of a company and all shares in subsidiaries and associates.
- **Reinvested earnings** consist of the direct investor's share (in proportion to direct equity participation) of earnings not distributed as dividends.
- **Other capital** covers the borrowing and lending of funds, including debt securities and trade credits, between direct investors and their subsidiaries, associates and branches. These transactions are recorded under intercompany claims and liabilities.

In compliance with the methodology applied in the EU, the territorial breakdown of foreign direct investment is based on the country of the immediate investor. The ultimate owner of the investment may thus come from some other country (for example, if a parent company owns a foreign affiliate which invests in the Czech Republic, the investment is classified as originating in the home country of that affiliate). The industrial breakdown is based on the Branch classification of economic activities (OKEC), that corresponds to the internationally used NACE classification.

Survey results

CZECH DIRECT INVESTMENT ABROAD

Stock of domestic direct investment abroad as of 31 December 2003

	Equity capital	Reinvested earnings	Equity capital + reinvested earnings	Other capital	Total
CZK billion	48,5	2,5	51,0	7,6	58,6
USD billion	1,9	0,1	2,0	0,3	2,3
EUR billion	1,5	0,1	1,6	0,2	1,8

Exchange rate as of 31 December 2003: 1 USD = 25,654 CZK

1 EUR = 32,405 CZK

Foreign direct investment by Czech investors reached CZK 58.6 billion as of 31 December 2003, an increase of CZK 14 billion compared to 2002. The biggest rises in investment were recorded in real estate and business activities, mining and quarrying and financial intermediation. However, most foreign subsidiaries of Czech investors were founded as vehicles for investing free funds and securing sales abroad; far fewer production units have been set up abroad.

In services, the highest volumes of funds are regularly invested in financial intermediation and insurance. This sector accounts for almost 53% of the total capital invested abroad. Investment in real estate and in trade and repair was also significant. Overall, more than 80% of Czech investment was channelled into the services sector, whereas only 14% was invested in the manufacturing sector.

As for the geographical breakdown, the largest part of Czech investment traditionally goes to Slovakia, where around one third of the total investment capital was allocated. The companies set up in Slovakia and other Central and Eastern European countries are generally production and sales businesses. Companies in other territories are more often founded in order to manage foreign activities or to optimise tax burdens, as is usually the case for investment going to Cyprus, the British Virgin Islands and Liechtenstein, but also the Netherlands and Luxembourg. Czech investment in these countries represents 50% of the total volume. Domestic companies also set up special purpose entities abroad, which are used, for example, to manage assets or to obtain funds from foreign capital markets.

FOREIGN DIRECT INVESTMENT IN THE CZECH REPUBLIC

Stock of foreign direct investment in the Czech Republic as of 31 December 2003

	Equity capital	Reinvested earnings	Equity capital + reinvested earnings	Other capital	Total
CZK billion	767,0	242,4	1 009,4	152,4	1 161,8
USD billion	29,9	9,5	39,4	5,9	45,3
EUR billion	23,7	7,5	31,2	4,7	35,9
Exchange rate as of 31 December 2003:			1 USD = 25,654 CZK		
			1 EUR = 32,405 CZK		

Total foreign direct investment in the Czech Republic reached CZK 1,161.8 billion at the end of 2003. This is an annual decrease of around CZK 3.7 billion, due mainly to the repurchase of Eurotel shares from a foreign investor and the sale of a foreign-owned share in Český Telecom to portfolio investors, mainly from the United States and the United Kingdom. These transactions had a significant impact on all components of foreign direct investment and caused the share of the transport and telecommunications sector in total foreign direct investment to drop under 6%, compared to 11% the year before.

The financial intermediation and insurance sector had the largest proportion of foreign direct investment, at almost 17%. By comparison with the previous year, wholesale and retail trade and repair, which had been the largest recipient of foreign investment, recorded a smaller share. This reflects a trend towards corporate dissolution and mergers and optimisation of the amounts of capital invested in this sector following a period of rapid development, especially in the case of retail chains.

It is still true that most direct investment comes to the Czech Republic from the Netherlands and Germany, which account for over 50% of the capital invested. As in the previous year, Austria was the third-largest investor, with a 12% share. The eight largest investor countries also include France, the United States, the United Kingdom, Belgium and Switzerland. EU countries account for 88% of the inflow of investment into the Czech Republic, with the “old” EU countries representing as much as 85%. The territorial allocation of already existing investments can change due to transfers of investor’s company to other country.

As for the breakdown by economic sector, there was a rise in investment in manufacturing, which received 42% of the total inflow. The fastest growth rate within the manufacturing sector was recorded by motor vehicle manufacture. By comparison, the share of the services sector dropped to 47%, due mainly to the aforementioned sale of shares in Český Telecom and Eurotel.

**Foreign direct investment in the Czech Republic
as of 31 December 2003 - by economic activity**

**Foreign direct investment in the Czech Republic
as of 31 December 2003 - by country**

The selected indicators characterising the performance of domestic foreign-owned businesses include sales, number of employees, value added and exports and imports of goods and services. All these indicators grew in 2003, with the exception of value added, which declined by CZK 14 billion in terms of volume compared to 2002. This result, along with sales, which recorded only moderate annual growth of CZK 8 billion, was significantly affected by the exclusion of telecommunications companies from direct investment. The rise in manufacturing sales was thus offset by a decrease in services sales.

However, the overall trade surplus generated by foreign-owned companies was almost CZK 45 billion, which is a dramatic rise compared to the surplus of CZK 4 billion recorded in 2002. This result was influenced above all by dynamic growth in exports in 2003, generated by the manufacturing sector, most notably manufacture of electronics, motor vehicles, plastics and food products.

An analysis of the attractiveness of domestic companies to foreign investors by company size shows that the largest volume of direct investment (around 62% of the capital invested) is channelled into large companies with more than 250 employees. 15% of the foreign capital is allocated in medium-sized enterprises with 51–250 employees, while companies with 50 employees or less and companies reporting no employees account for the remaining 23%. When the overall stock of direct investment in the Czech Republic is taken into consideration, i.e. not only funds invested in registered capital, but also reinvested earnings and loans granted by foreign investors, the share of companies with more than 250 employees rises to 67% of total investment capital.

Foreign investors have a dominant influence in most companies. Of the total number of about 3,900 foreign-owned companies, more than 70% are wholly owned by foreign investors and in 21% the share of foreign capital exceeds 50% of registered capital.
