

2008

FOREIGN DIRECT INVESTMENT

March 2010

1. INTRODUCTION

Focus and content of the publication

The annual publication *Foreign Direct Investment* provides a detailed overview of foreign direct investment (FDI) statistics in the Czech Republic and domestic direct investment abroad. The publication also includes indicators of FATS statistics focusing on the structure and activity of foreign affiliates.

The publication consists of five sections. The first two sections contain summary and cross-sectional tables with data on stocks of direct investment abroad and in the Czech Republic broken down by economic activity and territory and distribution of inward direct investment into regions. The next section presents data on direct investment flows in the reference year. The following section gives time series for FDI stocks and flows since the establishment of the Czech Republic in 1993. The last section covers indicators of foreign affiliates statistics (FATS), describing activity of domestically controlled foreign companies.

FDI Statistics

The FDI statistics are compiled in accordance with the international standards adopted by the OECD, the European Commission and the IMF for compilation of the balance of payments, of which they are a part. The FDI indicators provide information on international investment activities taking the form of equity participations and related loans and on income arising from such invested capital.

The CNB bases its FDI statistics on the **definition of foreign direct investment** set by the OECD in harmony with EUROSTAT and the IMF. This definition specifies that:

“Foreign direct investment reflects the objective of obtaining a lasting interest by a resident entity in one economy (“direct investor”) in an entity resident in an economy other than that of the investor (“direct investment enterprise”). The lasting interest implies the existence of a long-term relationship between the direct investor and the enterprise, and a significant degree of influence on the management of the enterprise. Direct investment involves both the initial transaction between the two entities and all subsequent capital transactions between them and among affiliated enterprises, both incorporated and unincorporated.” A direct investment enterprise is defined as “an incorporated or unincorporated enterprise in which a foreign investor owns 10 per cent or more of the ordinary shares or voting power of an incorporated enterprise or the equivalent of an unincorporated enterprise.”

A direct investment enterprise includes directly and indirectly owned affiliates. These are divided – according to the investor’s percentage ownership of the ordinary shares or voting power – into **subsidiaries** (more than 50%), **associates** (10%–50%) and **branches** (wholly-owned permanent establishments or offices of a direct investor; land and structures directly owned by a foreign resident; or mobile equipment that operates within an economy for at least one year).

In addition to shares in equity capital, foreign direct investment covers reinvested earnings and other capital, including lending transactions with a direct investor. The composition of direct investment can thus be expressed using the following relationship:

$$\text{Direct investment} = \text{equity capital} + \text{reinvested earnings} + \text{other capital}$$

- **Equity capital** comprises nonresident investment in the equity of a company.
- **Reinvested earnings** consist of the direct investor's share (in proportion to direct equity participation) of earnings not distributed as dividends.
- **Other capital** covers the borrowing and lending of funds, including debt securities and trade credits, between direct investors and their affiliated enterprises and fellow companies in the same enterprise group. These transactions are recorded under intercompany claims and liabilities.

When recording foreign direct investments there arises the issue of their **valuation**. The direct investment flows are compiled on the basis of realized investment transactions, which implies their market valuation. Should stocks of direct investment also be reported at market values, the foreign-owned shares in all individual companies would have to be revalued on a regular basis which is not feasible. Therefore, when recording the value of direct investment stocks the *own funds at book value* is used. (This value consists of the items *equity* plus *reinvested earnings* in the following tables).

In compliance with the methodology applied in the EU, the **territorial breakdown** of foreign direct investment is based on the country of the immediate investor. The ultimate owner of the investment may thus come from some other country (for example, if a parent company owns a foreign affiliate which invests in the Czech Republic, the investment is classified as originating in the home country of that affiliate). The **industrial breakdown** is based on the Branch classification of economic activities (OKEC) that corresponds to the internationally used NACE classification.

FATS Statistics

The growth in foreign investment and its impact on the world economy globalisation has created interest in additional information permitting a deeper analysis of the activities of foreign-controlled corporations. Providing this type of information is the goal of the statistics on the structure and activity of foreign affiliates (FATS).

In 2007, the Regulation (EC) No 716/2007 came into force, stipulating the unified content, definitions and indicators for statistics of foreign affiliates in the European Union. The implementation of this Regulation has led to substantial changes in the FATS statistics prepared and published by the Czech National Bank. Until 2006, the so called selected indicators (turnover, number of employees, value added, exports and imports) were compiled and published for all direct investment companies **with foreign ownership interest** reaching at least 10 % of voting power, for both Czech direct investment abroad and foreign direct investment in the Czech Republic.

Since 2007, in line with the principles of Regulation (EC) No 716/2007, the FATS variables have been reported only by the companies **under foreign control** which is defined as the direct or indirect control of more than half of the voting power or more than half of the shares. The controlling country is determined according to the registered office of the “ultimate controlling institutional unit” which means the company, proceeding up a chain of control, which is not controlled by another institutional unit.

Since 2007 there has also been a division of competencies – the Czech National Bank reports data for outward statistics on foreign affiliates (i.e. foreign companies under domestic ultimate control), while inward statistics on foreign affiliates (for domestic companies under foreign control) is compiled by the Czech Statistical Office.

The structure of the disseminated tables has also been changed and is now closer to the activity and territorial breakdowns of FDI data. The scope of reported indicators has been expanded to include *personnel cost* and *gross investment in tangible goods*.

Survey results

CZECH DIRECT INVESTMENT ABROAD

Stock of domestic direct investment abroad as of 31 December 2008

	Equity capital	Reinvested earnings	Equity capital + reinvested earnings	Other capital	Total at book value
	1.	2.	1. + 2.	3.	1. + 2. + 3.
CZK billion	122,1	107,2	229,3	13,2	242,4
USD billion	6,3	5,5	11,8	0,7	12,5
EUR billion	4,5	4,0	8,5	0,5	9,0

Exchange rate as of 31 December 2008: 1 USD = 19,346 CZK
1 EUR = 26,930 CZK

Note 1: Because of rounding to one decimal place, the sum of the individual items in this table may not correspond to totals at book value.

Note 2: Equity capital + reinvested earnings represent the value of foreign shares in equity capital at book value.

At the end of 2008 the stock of domestic direct investment abroad rose in comparison with the year before by CZK 87,7 billion to reach CZK 242,4 billion. The growth in investment volume was partly composed of an increase in reinvested earnings (primarily earnings of the current year) and partly of non-monetary deposits in equity capital. By contrast, the volume of net credits provided abroad within direct investment fell by CZK 1,3 billion year on year.

The largest volume of domestic capital was invested in real estate and business activities. Investment in construction increased from CZK 2,1 billion to CZK 6 billion. The volume of investment in the manufacturing sector rose by almost CZK 6 billion in comparison with the previous year.

As regards the territorial breakdown of capital under domestic influence abroad, the Netherlands was again the most attractive country for foreign investment and accounted for 43,5 % of the volume of total direct investment abroad. The capital invested in Slovakia makes up 16,6 % of foreign investment, followed by investment in Cyprus which overtook Bulgaria compared to the previous year.

The focal point of domestic investment abroad is gradually shifting from enterprises with sales and production/sales activities to areas such as foreign activity management, provision of financial and credit services and tax optimisation. Specific is the rise in investment in the energy sector.

Apart from the amount of invested capital and the income associated with it, the share of domestic enterprises in foreign economies is characterised through FATS statistics indicators, including *turnover, number of employees, value added, personnel costs, gross investment in tangible goods and exports and imports of goods and services.*

USD billion	58,3	42,5	100,8	12,3	113,2
EUR billion	41,9	30,5	72,4	8,9	81,3

Exchange rate as of 31 December 2008: 1 USD = 19,346 CZK

1 EUR = 26,930 CZK

Note 1: Because of rounding to one decimal place, the sum of the individual items in this table may not correspond to totals at book value.

Note 2: Equity capital + reinvested earnings represent the value of foreign shares in equity capital at book value.

At the end of 2008 foreign direct investment in the Czech Republic was almost CZK 2,2 trillion, which represents a year-on-year rise of CZK 157,4 billion. The inflow of investment capital was made up mainly of loans accepted from abroad (from subsidiaries, associates and affiliates), an increase in the capital of existing enterprises with foreign participation and smaller-scale new investments. Reinvested earnings also contributed to the year-on-year growth in direct investment, representing the income from operations of an enterprise accruing to the foreign owners and not yet paid in the form of dividends or profit shares. The stock of reinvested earnings grew in comparison with the previous year by CZK 75 billion. At the same time, the volume of dividends paid out to parent enterprises abroad also rose, to reach CZK 183 billion in the monitored year.

The sector structure of direct investment in the Czech Republic remains stable in comparison with the previous period. The financial intermediation and insurance enjoy the greatest share of foreign capital (18,8 %), followed by real estate and business activities (16,3 %), trade and repairs and manufacture of motor vehicles. Services account for 53,7 % of the total volume of invested capital, while manufacturing records a 34,6 % share.

From a geographic perspective, the greatest share of capital invested in the Czech Republic comes from the Netherlands (31,6 %), Germany (14,4 %) and Austria (12,1 %). Countries with a total volume of invested capital exceeding CZK 100 billion also include Luxembourg and France.

The share of foreign investment from EU countries increased to 89,2 %, and almost 94,5 % of foreign investment is from Europe generally. Only 5,5 % of the foreign capital comes from countries outside Europe, with the USA and Japan being the most significant investors.

**Foreign direct investment in the Czech Republic
as of 31 December 2008 - by economic activity**

**Foreign direct investment in the Czech Republic
as of 31 December 2008 - by country**

The geographical breakdown of investment described above is based on the registered addresses of corporations investing directly in the Czech Republic. However, for tax optimisation reasons many multinational companies invest in the Czech Republic via third countries, in particular via subsidiaries established in the Netherlands, Luxembourg or Cyprus.

It remains the case that foreign investors have a decisive influence in the majority of companies. Of the total of almost 6,000 foreign-owned companies monitored, 77,8 % are wholly owned by foreign investors, and in 15,8 % the share of foreign entities exceeds 50 % of the domestic company's equity.

Most foreign investment is channelled into large enterprises. When assessing company size by number of employees, 58 % of the investment in equity capital is allocated in large enterprises with more than 250 employees, and 18,7 % of the foreign capital is channelled into medium-sized enterprises with 51–250 employees. Companies with 50 employees or less and companies with no employees account for the remaining 23,3 %.
