FOREIGN DIRECT INVESTMENT

March 2007

1. INTRODUCTION

Focus and content of the publication

The annual publication *Foreign Direct Investment* provides an in-depth statistical survey of foreign direct investment (FDI) in the Czech Republic and domestic direct investment abroad. The FDI statistics are compiled in accordance with the international standards adopted by the OECD, the European Commission and the IMF for compilation of the balance of payments, of which they are a part.

The FDI statistics provide information on international investment activities taking the form of equity participations and related loans and on income arising from such invested capital. The expansion of foreign investment is also generating rising interest in other statistical data facilitating more in-depth analysis of the activities of foreign-owned or foreign-controlled corporations. The monitored indicators include number of employees, sales, value added, exports and imports, but the list should be extended to cover other data such as gross investment in tangible goods, research and development expenditure, production value, personnel costs, purchases of goods and services etc. The indicators given for foreign-controlled corporations are part of the statistics on foreign affiliates (FATS Statistics).

The publication *Foreign Direct Investment* consists of five sections. The first two sections contain summary and cross-sectional tables with data on stocks of direct investment abroad and in the Czech Republic broken down by economic activity and territory and distribution of inward direct investment into regions. The next section presents data on direct investment flows in the reference year. The following section gives time series for FDI stocks and flows since the establishment of the Czech Republic in 1993. The last section includes selected indicators for foreign affiliates.

Definition of foreign direct investment

The CNB bases its FDI statistics on the **definition of foreign direct investment** set by the OECD in harmony with EUROSTAT and the IMF. This definition specifies that:

“Foreign direct investment reflects the objective of obtaining a lasting interest by a resident entity in one economy (“direct investor”) in an entity resident in an economy other than that of the investor (“direct investment enterprise”). The lasting interest implies the existence of a long-term relationship between the direct investor and the enterprise, and a significant degree of influence on the management of the enterprise. Direct investment involves both the initial transaction between the two entities and all subsequent capital transactions between them and among affiliated enterprises, both incorporated and unincorporated.” A direct investment enterprise is defined as “an incorporated or unincorporated enterprise in which a foreign investor owns 10 per cent or more of the ordinary shares or voting power of an incorporated enterprise or the equivalent of an unincorporated enterprise.”

A direct investment enterprise includes directly and indirectly owned affiliates. These are divided – according to the investor’s percentage ownership of the ordinary shares or voting power – into **subsidiaries** (more than 50%), **associates** (10%–50%) and **branches** (wholly-

owned permanent establishments or offices of a direct investor; land and structures directly owned by a foreign resident; or mobile equipment that operates within an economy for at least one year).

In addition to shares in equity capital, foreign direct investment covers reinvested earnings and other capital, including lending transactions with a direct investor. The composition of direct investment can thus be expressed using the following relationship:

$$\text{Direct investment} = \text{equity capital} + \text{reinvested earnings} + \text{other capital}$$

- **Equity capital** comprises nonresident investment in the equity of a company.
- **Reinvested earnings** consist of the direct investor's share (in proportion to direct equity participation) of earnings not distributed as dividends.
- **Other capital** covers the borrowing and lending of funds, including debt securities and trade credits, between direct investors and their subsidiaries, associates and branches. These transactions are recorded under intercompany claims and liabilities.

When recording foreign direct investments there arises the issue of their **valuation**. The direct investment flows are compiled on the basis of realized investment transactions, which implies their market valuation. Should stocks of direct investment also be reported at market values, the foreign-owned shares in all individual companies would have to be revalued on a regular basis which is not feasible. Therefore, when recording the value of direct investment stocks the *own funds at book value* is used. (This value consists of the items *equity* plus *reinvested earnings* in the following tables). To assess the informational market value of FDI stocks a method is used recording shares in listed companies at market values, whereas the shares in unlisted companies are recorded at book values (the market valuation of inward FDI is shown in the table on page 5).

In compliance with the methodology applied in the EU, the **territorial breakdown** of foreign direct investment is based on the country of the immediate investor. The ultimate owner of the investment may thus come from some other country (for example, if a parent company owns a foreign affiliate which invests in the Czech Republic, the investment is classified as originating in the home country of that affiliate). The **industrial breakdown** is based on the Branch classification of economic activities (OKEC), that corresponds to the internationally used NACE classification.

Survey results

CZECH DIRECT INVESTMENT ABROAD

Stock of domestic direct investment abroad as of 31 December 2005

	Equity capital	Reinvested earnings	Equity capital + reinvested earnings	Other capital	Total at book value
	1.	2.	1. + 2.	3.	1. + 2. + 3.
CZK billion	63.5	16.6	80.1	8.7	88.8
USD billion	2.6	0.7	3.3	0.4	3.6
EUR billion	2.2	0.6	2.8	0.3	3.1

Exchange rate as of 31 December 2005: 1 USD = 24.588 CZK
1 EUR = 29.005 CZK

As of 31 December 2005, Czech direct investment abroad totalled almost CZK 89 billion, a moderate year-on-year increase of about CZK 4.7 billion. The highest volumes of funds continue to be invested in financial intermediation (41%), trade (23%) and real estate (11%). The share of the services sector grew compared to 2004, accounting for 81.5% of Czech investment abroad at the end of 2005. Manufacturing attracted less than 9% of the capital invested.

In terms of geographical breakdown, Slovakia is the largest recipient of Czech investment, with one-quarter of the capital invested. Second position is held by the Netherlands, whose share in the total investment almost doubled to 21% compared to the previous year. The shares of the United Arab Emirates, Russia and Liechtenstein in investment abroad also exceed 5%.

The branch orientation of domestic investment continued to broaden to include energy and credit services in addition to manufacturing and sales activities. Geographically, domestic investors maintained the traditional link with neighbouring Slovakia and invested in countries with favourable tax regimes, but they also focused on countries with large market potential such as Russia and Bulgaria.

The analysis of the targets of Czech investment abroad reveals several main areas of capital allocation:

- corporations focusing on sales or production/sales activities,
- corporations focusing on foreign activity management and tax optimisation,
- corporations specialising in the provision of financial and credit services,
- corporations operating in the energy sector.

Domestic investors also set up special purpose entities, which are used, for example, to manage assets or to obtain funds from foreign capital markets.

FOREIGN DIRECT INVESTMENT IN THE CZECH REPUBLIC

Stock of foreign direct investment in the Czech Republic as of 31 December 2005

	Equity capital	Reinvested earnings	Equity capital + reinvested earnings = own funds at book value	Equity at market value	Other capital	Total at book value
	1.	2.	1. + 2.	3.	4.	1.+2.+4.
CZK billion	908.8	407.3	1 316.1	1 471.8	175.5	1 491.6
USD billion	37.0	16.6	53.6	59.9	7.1	60.7
EUR billion	31.3	14.0	45.4	50.7	6.0	51.4

Exchange rate as of 31 December 2005: 1 USD = 24.588 CZK

1 EUR = 29.005 CZK

Note: Equity + reinvested earnings represent foreign share in equity at book value.

Equity at market value includes foreign shares in listed companies at market values plus foreign shares in unlisted companies at book values (own funds at book value). Market valuation concerns twenty companies with foreign participation listed at Prague Stock Exchange as of 31 December 2005.

By the end of 2005, the total amount of FDI in the Czech Republic had reached CZK 1,491.6 billion, which represents a year-on-year increase of around CZK 211 billion. More than one-half of this increase was due to investment in equity, of which the sales of the state-owned stakes in Český Telecom and Unipetrol were the largest investment transactions. However, the expansion of existing foreign investments and the foundation of new foreign-owned corporations also accounted for a considerable share of the foreign capital inflow.

Reinvested earnings, which represent the share of foreign investors in profit left on the accounts of companies in the Czech Republic, rose by CZK 86 billion year on year. The volume of dividends paid abroad reached almost CZK 73 billion. Other capital, representing net lending within groups linked by equity participations, grew by CZK 16.7 billion year on year, the highest rise in internally provided credit capital in foreign-owned corporations since 2001.

As regards industry, the highest volumes of investment continue to be channelled into financial intermediation and insurance, which account for almost 19% of total foreign investment, followed by the real estate and business services industry and transport and telecommunications. With regard to economic sector, the inflow of foreign investment is higher in the services sector (54%) than in manufacturing, which accounts for 38% of total investment.

From the geographical perspective, the Netherlands is the largest source of foreign direct investment, with 29%, followed by Germany (20%), Austria (11%) and France (6%). Spain entered the group of eight largest investors in the Czech Republic as a result of its investment in telecommunications. Behind it are the United States, Belgium and the United Kingdom.

The share of foreign investment from EU countries is 89%, and 92% of foreign investment in the Czech Republic comes from Europe. The United States and Japan are the largest non-European investors. Only 8% of foreign capital is from countries outside Europe; however, some foreign investors from the United States, Japan and other countries invest in the Czech Republic through third countries (in particular subsidiaries founded in the Netherlands, Luxembourg or Cyprus).

**Foreign direct investment in the Czech Republic
as of 31 December 2005 - by economic activity**

**Foreign direct investment in the Czech Republic
as of 31 December 2005 - by country**

The selected indicators characterising the share of foreign-owned businesses in the domestic economy include *sales, number of employees, value added and exports and imports of goods and services*. Sales of foreign-owned companies increased by CZK 159 billion year on year in 2005. Manufacturing and services contributed to this increase in comparable measure.

According to the CNB's annual survey, a positive trend was recorded for the balance of trade of foreign-owned companies. The trade surplus of these companies amounted to CZK 129 billion in 2005, compared to CZK 56 billion a year earlier. There was particularly buoyant growth in exports of motor vehicles, machinery and transport and telecommunications.

The allocation of foreign capital from the point of view of company size measured by the number of employees remains stable. Over 63% of equity investment is concentrated in large companies with more than 250 employees. 13% of the foreign capital is allocated in medium-sized enterprises with 51–250 employees, while companies with 50 employees or less and companies reporting no employees account for the remaining 24%. When the overall stock of direct investment in the Czech Republic is taken into consideration, i.e. not only funds invested in equity, but also reinvested earnings and loans granted by foreign investors, the share of companies with more than 250 employees rises to 66% of total investment capital.

Foreign investors have a dominant influence in most companies. Of the total number of almost 4,000 foreign-owned companies, 74% are wholly owned by foreign investors and in 19% the share of foreign capital exceeds 50% of the domestic company's equity.
