FOREIGN DIRECT INVESTMENT

September 2008

1. INTRODUCTION

Focus and content of the publication

The annual publication *Foreign Direct Investment* provides an in-depth statistical survey of foreign direct investment (FDI) in the Czech Republic and domestic direct investment abroad. The FDI statistics are compiled in accordance with the international standards adopted by the OECD, the European Commission and the IMF for compilation of the balance of payments, of which they are a part.

The FDI statistics provide information on international investment activities taking the form of equity participations and related loans and on income arising from such invested capital. The expansion of foreign investment is also generating rising interest in other statistical data facilitating more in-depth analysis of the activities of foreign-owned or foreign-controlled corporations. The monitored indicators include number of employees, sales, value added, exports and imports, but the list should be extended from 2007 according to EU Regulation No 716/2007 to cover other data such as gross investment in tangible goods, research and development expenditure, production value, personnel costs, purchases of goods and services etc. The indicators given for foreign-controlled corporations are part of the statistics on foreign affiliates (FATS Statistics).

The publication *Foreign Direct Investment* consists of five sections. The first two sections contain summary and cross-sectional tables with data on stocks of direct investment abroad and in the Czech Republic broken down by economic activity and territory and distribution of inward direct investment into regions. The next section presents data on direct investment flows in the reference year. The following section gives time series for FDI stocks and flows since the establishment of the Czech Republic in 1993. The last section includes selected indicators for foreign affiliates.

Definition of foreign direct investment

The CNB bases its FDI statistics on the **definition of foreign direct investment** set by the OECD in harmony with EUROSTAT and the IMF. This definition specifies that:

“Foreign direct investment reflects the objective of obtaining a lasting interest by a resident entity in one economy (“direct investor”) in an entity resident in an economy other than that of the investor (“direct investment enterprise”). The lasting interest implies the existence of a long-term relationship between the direct investor and the enterprise, and a significant degree of influence on the management of the enterprise. Direct investment involves both the initial transaction between the two entities and all subsequent capital transactions between them and among affiliated enterprises, both incorporated and unincorporated.” A direct investment enterprise is defined as “an incorporated or unincorporated enterprise in which a foreign investor owns 10 per cent or more of the ordinary shares or voting power of an incorporated enterprise or the equivalent of an unincorporated enterprise.”

A direct investment enterprise includes directly and indirectly owned affiliates. These are divided – according to the investor’s percentage ownership of the ordinary shares or voting power – into **subsidiaries** (more than 50%), **associates** (10%–50%) and **branches** (wholly-

owned permanent establishments or offices of a direct investor; land and structures directly owned by a foreign resident; or mobile equipment that operates within an economy for at least one year).

In addition to shares in equity capital, foreign direct investment covers reinvested earnings and other capital, including lending transactions with a direct investor. The composition of direct investment can thus be expressed using the following relationship:

$$\text{Direct investment} = \text{equity capital} + \text{reinvested earnings} + \text{other capital}$$

- **Equity capital** comprises nonresident investment in the equity of a company.
- **Reinvested earnings** consist of the direct investor's share (in proportion to direct equity participation) of earnings not distributed as dividends.
- **Other capital** covers the borrowing and lending of funds, including debt securities and trade credits, between direct investors and their affiliated enterprises and fellow companies in the same enterprise group. These transactions are recorded under intercompany claims and liabilities.

When recording foreign direct investments there arises the issue of their **valuation**. The direct investment flows are compiled on the basis of realized investment transactions, which implies their market valuation. Should stocks of direct investment also be reported at market values, the foreign-owned shares in all individual companies would have to be revalued on a regular basis which is not feasible. Therefore, when recording the value of direct investment stocks the *own funds at book value* is used. (This value consists of the items *equity* plus *reinvested earnings* in the following tables). To assess the informational market value of FDI stocks a method is used recording shares in listed companies at market values, whereas the shares in unlisted companies are recorded at book values (the market valuation of inward FDI is shown in the table on page 5).

In compliance with the methodology applied in the EU, the **territorial breakdown** of foreign direct investment is based on the country of the immediate investor. The ultimate owner of the investment may thus come from some other country (for example, if a parent company owns a foreign affiliate which invests in the Czech Republic, the investment is classified as originating in the home country of that affiliate). The **industrial breakdown** is based on the Branch classification of economic activities (OKEC), that corresponds to the internationally used NACE classification.

Survey results

CZECH DIRECT INVESTMENT ABROAD

Stock of domestic direct investment abroad as of 31 December 2006

	Equity capital	Reinvested earnings	Equity capital + reinvested earnings	Other capital	Total at book value
	1.	2.	1. + 2.	3.	1. + 2. + 3.
CZK billion	71,9	24,8	96,7	8,0	104,7
USD billion	3,4	1,2	4,6	0,4	5,0
EUR billion	2,6	0,9	3,5	0,3	3,8

Exchange rate as of 31 December 2006: 1 USD = 20,876 CZK

1 EUR = 27,495 CZK

The stock of Czech direct investment abroad amounted almost to CZK 105 billion at the end of 2006, up by CZK 16 billion on a year earlier. The increase in the volume of investment was due in equal measure to capital contributions and reinvested earnings, while net loans granted abroad showed a slight annual decline.

The largest volume of domestic capital was invested in financial intermediation and real estate services. The share of manufacturing increased compared to the previous year, accounting for 20% of domestic investment. However, most Czech investment abroad is allocated in services, accounting for 67%.

In terms of geographical breakdown, the major recipient of domestic investment is Slovakia (32%), followed by the Netherlands (almost 22%) and Bulgaria (almost 10% of the volume of investment capital abroad).

In 2006, the sectoral orientation of domestic investment continued to broaden beyond manufacturing and sales activities, mainly into energy sectors. Geographically, domestic investors maintained their traditional links with neighbouring Slovakia and invested in countries with favourable tax regimes, but they also focused on countries with large market potential, such as Russia and Bulgaria.

The major areas in which domestic investors allocate their capital abroad remain as follows:

- sales and production/sales activities;
- foreign activity management and tax optimisation;
- provision of financial and credit services;
- the energy sector.

FOREIGN DIRECT INVESTMENT IN THE CZECH REPUBLIC

Stock of foreign direct investment in the Czech Republic as of 31 December 2006

	Equity capital	Reinvested earnings	Equity capital + reinvested earnings = own funds at book value	Equity at market value	Other capital	Total at book value
	1.	2.	1. + 2.	3.	4.	1.+2.+4.
CZK billion	972,6	524,9	1 497,5	1 631,7	169,3	1 666,8
USD billion	46,6	25,1	71,7	78,2	8,1	79,8
EUR billion	35,4	19,1	54,5	59,3	6,1	60,6

Exchange rate as of 31 December 2006: 1 USD = 20,876 CZK
1 EUR = 27,495 CZK

Note: Equity + reinvested earnings represent foreign share in equity at book value.
Equity at market value includes foreign shares in listed companies at market values plus foreign shares in unlisted companies at book values (own funds at book value). Market valuation concerns seventeen companies with foreign participation listed at Prague Stock Exchange as of 31 December 2006.

By the end of 2006, the stock of FDI in the Czech Republic had reached CZK 1,666.8 billion, which represents a year-on-year increase of around CZK 175 billion. Investment in equity capital showed an annual increase of CZK 64 billion. 2006 saw no major investment projects of the type associated in previous years with privatisation or the entry of strategic partners. The inflow of investment capital consisted of new smaller-scale investment and, in particular, capital increases in existing foreign-owned businesses.

Reinvested earnings form another component of the value of FDI, representing the part of profits that belong to foreign owners but are not paid out in the form of dividends or profit shares and are left on the corporation's accounts in the Czech Republic. Reinvested earnings accounted for most of the annual increase in FDI, rising by CZK 118 billion compared to a year earlier. At the same time, dividends paid to parent companies abroad increased in 2006 to CZK 111 billion, the highest ever annual amount of earnings repatriated abroad. This implies considerable growth in the profitability of foreign-controlled corporations.

Other capital, representing the net stock of loans within groups linked by equity participations, declined by CZK 6 billion year on year. This reflects a decline in the credit burden of domestic foreign-owned businesses as well as the increasingly common practice of transferring free funds to financial centres within multinational companies.

As regards the sector structure of the capital invested in the Czech Republic, financial intermediation and insurance still account for most of the total direct investment (almost 17%). The second largest volume of direct investment was allocated into real estate and business services, followed by wholesale and retail trade and repairs and manufacture of motor vehicles. Services account for almost 51% of the total capital invested, while manufacturing records a 36% share.

As for the geographical breakdown, the Netherlands accounts for the largest volume of FDI (27% of the capital invested), followed by Germany (21%). The other countries whose total volume of capital invested exceeds CZK 100 billion include Austria and Luxembourg.

The share of foreign investment from EU countries remains at 88%, and almost 93% of foreign investment is from Europe generally. Only 8% of the foreign capital comes from countries outside Europe, with the USA and Japan being the most significant investors.

The geographical breakdown of investment described above is based on the registered addresses of corporations investing directly in the Czech Republic. However, for tax optimisation reasons many multinational companies invest in the Czech Republic through third countries, in particular through subsidiaries founded in the Netherlands, Luxembourg or Cyprus.

**Foreign direct investment in the Czech Republic
as of 31 December 2006 - by economic activity**

Foreign direct investment in the Czech Republic as of 31 December 2006 - by country

In addition to the stock of capital invested and the related income, the share of foreign-owned businesses in the domestic economy is characterised by a number of other indicators, such as *turnover, number of employees, value added, and exports and imports of goods and services*.

The annual survey conducted by the CNB for 2006 suggests positive developments in foreign-owned businesses. The values of all the indicators monitored recorded annual increases – value added generated by foreign-owned businesses increased by CZK 137 billion compared to 2005, sales grew by CZK 655 billion and the number of employees of foreign-owned corporations amounted to more than 636,000. In foreign trade, foreign-owned businesses generated a trade surplus of almost CZK 147 billion, compared to CZK 129 billion in 2005.

Foreign investors still have a dominant influence in most companies. Of the total of almost 4,000 foreign-owned companies monitored, 77% are wholly owned by foreign investors, and in 17% the share of foreign capital exceeds 50% of the domestic company's equity.

Most foreign investment is channelled into large enterprises. If one assesses company size by number of employees, 62% of the investment in equity capital is allocated in large enterprises with more than 250 employees, and 14% of the foreign capital is channelled into medium-sized enterprises with 51–250 employees, while companies with 50 employees or less and companies with no employees account for the remaining 24%. When the overall stock of direct investment in the Czech Republic is taken into consideration, i.e. not only funds invested in equity, but also reinvested earnings and loans granted by foreign investors, the share of companies with more than 250 employees rises to 66% of the total investment capital.
