Financial markets interest rates in CR

Commentary on key interest rates (Table 1) and financial market interest rates (Table 2): April 2009

Key interest rates

The CNB's 2W repo rate has been set at 1.75% since 6 February 2009 and the ECB's key interest rate has been reset at 1.25% since 8 April 2009. The difference between the CNB's and the ECB's key rates was thus 0.50 percentage point at the end of April.

Financial market interest rates

In April, interest rates on the Czech interbank deposit market remained almost the same values compared to the previous month. In the euro area occurred a decline in all observed rates with the highest decrease in 1M EURIBOR (by 0.26 percentage point). The 3M PRIBOR reached 2.50% (2.49% in March) and the 3M EURIBOR stood at 1.42% (1.64% in March).

Bond yields on the Czech capital market recorded a month-on-month increase in April (3Y bond by 0.14 pp), except bond yield of 5Y bond which decreased (by 0.18 pp). In the euro area was only a slight correction of the original March. In April, the yield on the 10-year bond in the Czech Republic was 5.25% (5.16% in March), while the yield on the 10-year bond in the euro area reached 4.09% (4.15% in March).

¹⁾ Monetary aggregates comprise monetary liabilities of MFIs vis-à-vis non-MFI Czech residents excluding central government. M1 is the sum of currency in circulation and overnight deposits; M2 is the sum of M1, deposits with an agreed maturity of up to two years and deposits redeemable at notice of up to three months; and M3 is the sum of M2, repurchase agreements, money market fund shares/units and debt securities up to two years.

²⁾ Including all sectors without general government (S.13) and MFIs sector (S.121 and S. 122).

³⁾ Net foreign assets (NFA) represent balance of financial claims and liabilities of the MFI sector vis-a-vis nonresidents

⁴⁾ Net value of flow data calculated by adjusting the difference between end-of-period levels for the effect of non-transactions-related factors.

Comments on monetary developments statistics¹⁾ (Tables 3-9): April 2009

The annual rate of growth of M3 declined from 10.9% in March to 10.1% in April. The month-on-month growth rate increased from -0.7% to 0.9%. As a result of financial transactions, the monetary aggregate M3 grew by CZK 246.4 billion year on year (by CZK 24.2 billion month on month) to CZK 2,718.8 billion.

Main components of M3

The monetary aggregate M1 is the most important component of M3. Its contribution to M3 growth increased against March, accounting for more than one-half of the annual M3 growth (Table 7).

The annual rate of growth of M1 increased from 7.8% in March to 9.0% in April. Similarly the annual rate of growth of overnight deposits rose from 6.9% in March to 8.6% in April. In month-on-month comparison, overnight deposits declined by CZK 2.4 billion (i.e. 0.2%), owing to financial transactions. Within overnight deposits, month-on-month decline was recorded for deposits of insurance corporations and pension funds (of 31.1%, or CZK 3.6 billion), other financial intermediaries (of 21.1%, or CZK 6.8 billion) and non-financial corporations (of 4.3%, or CZK 17.1 billion). By contrast, other government deposits increased by 7.4%, or CZK 10.6 billion and deposits of households rose by 1.9%, or CZK 14.5 billion. The annual rate of growth of currency in circulation decreased by 1%, from 11.4% in March to 10.4% in April. In month-on-month terms, currency in circulation rose by 0.3% (an increase of CZK 1.1 billion) due to financial transactions.

Other short-term deposits (excluding overnight deposits) grew by CZK 34.5 billion (i.e. 3.7%) month on month, owing to financial transactions. However, the annual rate of growth of these deposits decreased from 19.6% in March to 15.5% in April, i.e. by 4.1 percentage points. The annual rate of growth of deposits with maturity of up to two years, which are the predominating component of short-term deposits, decreased by 3.3 percentage points, compared to the previous month, reaching -1.4%. Deposits redeemable at notice of up to three months (the smaller component) have long been recording a high annual growth. Their annual growth rate in April was 50.2%.

Within other short-term deposits, a month-on-month increase was recorded in all economic sectors: in other financial intermediaries (of 22.4%, or CZK 4.6 billion), non-financial corporations (of 12.2%, or CZK 25.1 billion), insurance corporations and pension funds (of 5.3%, or CZK 2.1 billion), other government (of 5.0%, or CZK 2.1 billion) and households (of 0.1 %, or CZK 0.6 billion).

Marketable instruments, which consist of repos, money market fund shares/units and debt securities with maturities of up to two years, fell by 12.4% month on month, to CZK 63.1 billion (compared to CZK 72.1 billion in March). The annual rate of growth of marketable instruments fell by 11.1 percentage points to -27.4% (- 16.3% in March).

x

Main counterparts of M3

The annual rate of growth of loans extended to general government reached 3.4% in April (compared to -1.3% in March). The annual rate of growth of purchased government bonds increased to 25.7% in April, from 19.2% in March.

The annual rate of growth of loans extended to the private sector fell to 11.0% in April (12.5% in March). This growth is mostly attributable to households, which accounted for more than three-quarters of it (Table 8). The annual rate of growth of loans to households fell to 19.1% in April, by 1 percentage point compared to March. Non-financial corporations are another sector accounting significantly for the annual rate of growth of loans to the private sector. Their annual rate of growth decreased from 7.5% in March to 5.2% in April.

The annual rate of growth of net external assets rose from -1.1% in March to -0.5% in April. The annual rate of growth of longer-term financial liabilities increased from -12.6 % in March to -6.1 % in April. The annual growth rate of deposits of central government fell from 33.7% to 30.7%.

¹⁾ All increases and decreases referred to in this commentary relate only to financial transactions adjusted for non-transaction effects.

¹⁾ The interest rates that are applied by MFIs to CZK-denominated deposits and loans vis-à-vis households and non-financial corporations resident in the Czech Republic. New business refers to any new agreement between the customer and the MFI within given period.

²⁾ Including households (S.14) and non-profit institutions serving households (S.15) according to the classification of the economic sectors ESA95.

³⁾ Households deposits liabilities redeemable at notice include similar deposits of non-financial corporations of which volumes are negligible in this category.

⁴⁾ Including deposit liabilities redeemable at notice of non-financial corporations (which are also included in item 1.3).

⁵⁾ Bank overdrafts include provided bank overdrafts, debit balance on bank accounts and credit card credits.

⁶⁾ Since 2009, the amendment to Act No. 190/2004 Coll., on Bonds, as amended, has been fully applied, under which a mortgage loan is a loan whose redemption, including appurtenances (i.e. interest etc.), is secured by lien (right of pledge) over real estate (property), including property under construction, where the claim arising from the loan does not exceed twice the pledge value of the mortgaged property (Article 28(3)).

⁷⁾ The initial period of fixations is a predetermined period of time at the start of the contract during which the value of the interest rate cannot change. Period up to 1 year includes floating rates.

⁸⁾ Annual percentage rate of charge (APRC) covers total costs of the credit to the client including charges etc

¹⁾ The interest rates that are applied by MFIs to CZK-denominated deposits and loans vis-à-vis households and non-financial corporations resident in the Czech Republic. Interest rates on outstanding amounts refer to the stock of all deposits and all loans at a specific moment.

²⁾ Including households (S.14) and non-profit institutions serving households (S.15) according to the classification of the economic sectors ESA95.

³⁾ Including overnight deposits and deposits with agreed maturity presented in Table 10. For this instrument category, new business and outstanding amounts coincide.

⁴⁾ Since 2009, the amendment to Act No. 190/2004 Coll., on Bonds, as amended, has been fully applied, under which a mortgage loan is a loan whose redemption, including appurtenances (i.e. interest etc.), is secured by lien (right of pledge) over real estate (property), including property under construction, where the claim arising from the loan does not exceed twice the pledge value of the mortgaged property (Article 28(3)).

⁵⁾ Consumer credit and other lending include bank overdrafts presented in Table 10.

MFI interest rates, outstanding amounts, deposits

MFI interest rates, outstanding amounts, loans

Commentary on interest rates of monetary financial institutions (Tables 10 and 11): April 2009

Interest rates on new business

Interest rates on **new deposits** of households and non-financial corporations remained roughly at the March level. The average interest rate on total new deposits of **households** decreased only slightly and stabilised at 1.25%. Similarly, the rate on overnight deposits saw no major changes and remained roughly at the previous month's level (0.69%). The rate on deposits with agreed maturity fell by 0.04 percentage point to 1.70%. The interest rate on deposits redeemable at notice decreased slightly, down by 0.02 percentage point to 2.12%. The overall interest rate on new deposits of **non-financial corporations** remained almost unchanged, at 1.08%. The rate on overnight deposits declined by 0.06 percentage point to 0.63%. The rate on deposits with agreed maturity of up to two years (these deposits usually account for 100% of all deposits with agreed maturity in this sector) was the same as in March, at 1.50%.

The interest rate on **new loans** to households saw a more pronounced increase in April whereas that on new loans to non-financial corporations remained roughly at the March level.

The overall interest rate on new loans to **households** decreased by 0.33 percentage point to 13.65%. The interest rate on bank overdrafts rose more markedly (by 0.85 percentage point) to 18.20%. The rate on consumer credit was 13.71%, down by 0.18 percentage point, whereas the rate on loans for house purchase was almost the same as in the previous month, standing at 5.46%. The rate on other loans dropped more markedly, down by 0.32 percentage point to 6.81%.

The interest rate on total loans to **non-financial corporations** remained almost at the March level (4.35%). The rate on bank overdrafts saw only a slight increase of 0.02 percentage point to 4.69%. By contrast, the rate on other loans of up to CZK 30 million increased slightly, by 0.05 percentage point to 5.08 %. The rate on other loans of over CZK 30 million was 0.02 percentage point higher, standing at 3.52%.

The overall annual percentage rate of charge on loans to households fell more markedly, by 0.34 percentage point to 8.38%, as a result of a decline in the APRC on consumer credit (of 0.06 percentage point) to 14.75% and the APRC on loans for house purchase (of 0.04 percentage point) to 5.72%.

Interest rates on outstanding amounts

The average interest rate on **outstanding amounts of deposits** of households and non-financial corporations recorded only a modest decline in April.

The interest rate on total deposits of **households** remained almost at the previous month's level (1.42%). The rate on deposits redeemable at notice decreased just slightly, down by 0.02 percentage point to 2.12%. The interest rate on loans with agreed maturity stabilised at 2.09% and the rate on overnight deposits at 0.69%.

The interest rate on total deposits of **non-financial corporations** fell modestly, down by 0.02 percentage point to 1.09%. The rate on overnight deposits saw a decrease of 0.06 percentage point to 0.63%. The overall interest rate on deposits with agreed maturity dropped slightly, by 0.06 percentage point to 1.73%.

The average interest rate on **outstanding amounts of loans** to households stabilised at the March level. In the case of non-financial corporations the rate showed a modest decrease.

The overall interest rate on loans to **households** saw no changes and remained at 6.95%. The rate on loans for house purchase did not change either and stood at 5.20%. The interest rate on consumer credit and other loans fell slightly, to 11.11%.

The average interest rate on outstanding amounts of loans to **non-financial corporations** decreased slightly (by 0.06 percentage point) to 4.70%. The rate on loans to non-financial corporations dropped at all maturities, down by 0.04 percentage point to 4.46% for maturities of up to one year, by 0.10 percentage point to 4.79% for maturities of over one year and up to five years and by 0.08 percentage point to 4.87% for maturities of over five years.

¹⁾ Financial corporations engaged in lending - corporations classified within sector S.123 other financial intermediaries which are predominantly engaged in granting credit or loans or entering into agreements of similar nature, for example financial leasing, factoring, consumer credit, hire purchase, etc. (see Decree No. 307/2004 Coll.). Data are published by the last working day of the second month following the reference period.

Commentary on the aggregated balance sheet of collective investment funds (Table 12): March 2009

At the end of March 2009, collective investment funds (CIFs) administered assets worth CZK 82.2 billion. These administered assets thus continued to decline. The value of assets in funds fell by CZK 0.17 billion compared to February this year, i.e. a decline of 0.21%.

In March 2009, the largest decline was recorded by bond funds, whose assets fell from CZK 33.9 billion to CZK 33.1 billion, i.e. a monthly decrease of 2.48%. A decline was recorded also by mixed funds (from CZK 34.3 billion to CZK 34.2 billion). Conversely, equity funds recorded an increase. The value of their assets rose from CZK 8.4 billion to CZK 9.2 billion month on month, i.e. a rise of 9.06%.

Collective investment funds invested most in debt securities. The total volume of purchased debt securities declined by CZK 2.25 billion to CZK 39.7 billion month on month, i.e. a fall of 5.38%. Compared to February this year, the share of debt securities in funds' own funds fell from 50.90% to 48.27%, which is a decline of 2.64 percentage points. By contrast, funds in March were increasing the share of equity in their portfolios. The total volume of equity securities rose by CZK 0.28 billion to CZK 28.9 billion month on month, i.e. a rise of 0.97%.

As of the end of March this year, 139 resident collective investment funds were active in the Czech Republic. Of this total, 27 were equity funds, 26 bond funds, 57 mixed funds and 29 real estate funds.

Commentary on the quarterly aggregated balance sheet of financial corporations engaged in lending¹⁾ (Tables 13 and 14): March 2009

As of 31 March 2009, financial corporations engaged in lending had total assets of CZK 441.0 billion. Total assets decreased by CZK 7.9 billion (1.76%) compared to the previous quarter. In year-on-year terms, total assets increased by CZK 26.6 billion, i.e. 6.41%. This was mostly due to corporations providing financial leasing, which also account for the largest share of total assets (CZK 350 billion). Other lending companies accounted for CZK 113.2 billion of total assets and companies engaged in factoring and forfaiting for CZK 22.7 billion.

The largest asset item was loans which amounted to CZK 352.1 billion. Loans recorded a decline of CZK 5.5 billion in Q1 2009, down by 1.55% compared to the previous period. In year-on-year comparison, loans increased by CZK 25.3 billion, i.e. by 7.74%. Most of this amount, i.e. 98.07% of loans, was provided to residents. Short-term loans stood at CZK 100.1 billion at the end of Q1, accounting for 22.7% of total assets. Long-term loans amounted to CZK 252 billion, i.e. 57.1% of total assets.

The largest part of loans provided to residents consisted of loans to non-financial corporations, which amounted to CZK 192.7 billion, i.e. 55.81% of loans to residents. Loans provided to non-financial corporations fell by CZK 3.1 billion compared to the previous quarter, which means a decrease of 1.56%. In year-on-year terms, loans provided to non-financial corporations were up by CZK 14.7 billion, i.e. 8.24%. Financial leasing companies provided CZK 169.8 billion, other lending companies CZK 5.6 billion and factoring and forfaiting companies provided CZK 17.2 billion. These loans are made up predominantly of loans with an original maturity of one to five years, which amounted to CZK 112.5 billion.

The second largest group of loans provided to residents consists of loans to households amounting to CZK 148.7 billion, which fell by CZK 5.6 billion compared to the previous quarter, i.e. by 3.63%. Consumer credit amounting to CZK 132.3 billion, i.e. 88.97% of total loans provided to households, represented the largest part of loans to households. In year-on-year terms, loans provided to non-financial corporations were up by CZK 7.4 billion, i.e. 5.26%. Loans provided to households account for 43.06% of loans granted to residents. CZK 65.7 billion was provided by financial leasing companies and CZK 83 billion by other lending companies. Loans with an original maturity of one to five years amounted to CZK 86.3 billion, giving them the largest share in loans to households.

Glossary

Harmonisation of statistics: the Treaty establishing the European Community tasked the European Central Bank (ECB) with ensuring harmonised statistics according to Article 5 of the Statute of the European System of Central Banks. The national central banks of EC Member States therefore collect statistical information according to a uniform definition, from which the ECB then compiles aggregate data for euro area monetary policy. Although Council Regulation No 2533/98, which specifies the requirements for statistical data collection, only concerns euro area countries, the ECB also receives full data sets from the non-participating countries (e.g. the Czech Republic) in order to monitor their economic and financial development.

Monetary statistics: financial macrostatistics of sectors S.121, S.122 and S.123 based exclusively on the "host country" principle. According to this principle, a resident reporting unit is an institution resident in a given economic territory. The reporting population includes 1) institutions incorporated and located in the territory, including subsidiaries of parent companies located outside that territory, and 2) branches of institutions that have their head office outside that territory.

APRC: annual percentage rate of charge, i.e. the rate including interest expenses and all related costs of the credit to the client (fees etc.).

Collective investment funds: for the purposes of monetary and banking statistics, collective investment funds comprise unit trusts and investment funds other than money market funds which are resident in the Czech Republic. These are undertakings the sole object of which is collective investment, i.e. pooling investor funds and investing them under conditions stipulated in the Act on Collective Investment (No. 189/2004 Coll.). Such undertakings may be constituted under the Act either as unit trust managed by an investment company or as investment funds.

Consolidated balance sheet of the MFI sector: the basic statistical tool of monetary statistics. It is based on the residency principle and is obtained by netting out inter-MFI positions on their aggregated balance sheet.

Consumer credit: loans granted to households for personal use in the consumption of goods and services.

Contribution to annual growth rate: the growth rate of a selected component weighted by its share in the total growth rate.

Deposits redeemable at notice: deposits that can be withdrawn by clients only after the expiry of a period of notice agreed in advance, which starts at the moment of notification of the intention to withdraw the deposit.

Deposits with agreed maturity: deposits that cannot be withdrawn by clients before a predefined maturity.

Financial corporations engaged in lending (FCLs):

Definition: FCLs mean corporations classified within sector S.123 other financial intermediaries which are predominantly engaged in granting credit or loans or entering into agreements of similar nature, for example financial leasing, factoring, consumer credit, hire purchase, etc. (see Decree No. 307/2004 Coll.)

Type of services:

1. Financial leasing - It is financial service, when lessee acquires the right to use good in exchange for rental payment over predetermined term. All risk and rewards of ownership are transferred from lessor to lessee. After lapse of predetermined term ownership of good is transferred from lessor to lessee.
2. Factoring - It is financial service consisting in purchase of short-term receivables (with maturity 30-90 days) before their maturity date. Receivables are transferred on factoring company – factor- by supplier of goods or services.
3. Other lending - This category encompasses granting credit or loans or agreements of similar nature different from financial leasing and factoring. It deals especially with consumer credit, hire purchase, consumption loans, etc.

Growth rate: the percentage change in the monitored variable over the reference period, calculated from the volumes of monthly financial transactions and the outstanding amounts at the beginning of each month.

Household sector: institutional units included in the sectors of households (S.14) and non-profit institutions serving households (S.15) under ESA 95.

Glossary (cont'd)

Housing loans: Loans granted to households for the purpose of purchasing/investing in housing, including building and home improvements.

Interest rate fixation: a period of interest rate fixation, i.e. a period at the beginning of a contract for which the agreed interest rate cannot be changed. Period up to 1 year includes floating rates.

MFI longer-term financial liabilities: comprise deposits with an agreed maturity of over two years, deposits redeemable at a period of notice of over three months, debt securities issued with an original maturity of more than two years and the capital and reserves of the Czech MFI sector.

Monetary aggregates: comprise the monetary liabilities of monetary financial institutions to non-MFI Czech residents except central government. The narrow monetary aggregate M1 includes currency in circulation (excluding cash at banks' cash desks) and overnight deposits. The intermediate monetary aggregate M2 comprises M1, deposits redeemable at a period of notice of up to and including three months and deposits with a maturity of up to and including two years. The broad monetary aggregate M3 comprises M2, money market fund shares/units, debt securities with a maturity of up to two years and repurchase agreements.

Monetary financial institutions (MFIs): financial institutions forming the money-issuing sector. Under Community law, these include the central bank, resident credit institutions, and all other resident financial institutions whose business is to receive deposits and/or close substitutes for deposits from entities other than MFIs and, for their own account (at least in economic terms), to grant credit and/or invest in securities. In the Czech Republic, MFIs include the central bank, banks, money market funds and credit unions.

Money-holding sector: all institutional units except central government (S.1311) and monetary financial institutions (S.121 and S.122) under ESA 95.

Money-issuing sector: all institutional units included in the sectors of the central bank (S.121) and other monetary financial institutions (S.122) under ESA 95.

Money-neutral sector: an institutional sector comprising the central government sector (S.1311) under ESA 95.

Money market funds: MMFs are defined as those collective investment funds of which the units are, in terms of liquidity, close substitutes for deposits and which primarily invest in money market instruments and/or in MMF shares/units and/or in other transferable debt instruments with a residual maturity of up to and including one year, and/or in bank deposits, and/or which pursue a rate of return that approaches the interest rates of money market instruments. The criteria applied in order to identify MMFs shall be derived from the public prospectus as well as fund rules, instruments of incorporation, established statutes or by-laws, subscription documents or investment contracts, marketing documents, or any other statement with similar effects, of the collective investment undertaking.

Net external assets: comprise external assets of Czech MFIs (such as monetary gold, non-koruna banknotes, securities issued by non-residents and loans granted to non-residents) minus external liabilities of the Czech MFI sector (such as non-residents' holdings of deposits, repurchase agreements, money market fund shares and units, and debt securities with a maturity of up to and including two years issued by MFIs and held by non-residents).

Non-MFIs: all resident sectors excluding MFIs, i.e. general government (S.13), non-financial corporations (S.11), financial institutions other than MFIs (S.123 and S.124) and households and non-profit institutions serving households (S.14 and S.15) under ESA 95.

Other financial intermediaries (OFIs): entities included in the sectors of other financial intermediaries except insurance corporations and pension funds (S. 123), financial auxiliaries (S.124) and insurance corporations and pensions funds (S.125) under ESA 95.

Private sector: a sector comprising all institutional sectors except general government (S.13) and monetary financial institutions (S.121 and S.122) under ESA 95.

Glossary (cont'd)

Rates on new business: interest rates agreed by the bank and the client for all agreements negotiated during the reference period.

Rates on outstanding amounts: interest rates applied to end-of-period balances.

Reclassifications: comprise any changes in the MFI balance sheet resulting from changes in the reporting population, corporate restructuring, reclassifications of assets and liabilities, and corrections of reported errors.

Residents: all domestic and foreign legal entities and natural persons, including branches of foreign banks and foreign owners of buildings and land, whose centre of economic interest is in the given territory. Foreign legal entities and natural persons are considered residents after at least one year of economic activity in the territory, with the exception of foreign bank branches and owners of buildings and land, who become residents at the moment they perform a valid legal act (in the case of foreign owners of buildings and land, this only applies in connection with transactions relating to the building or land in question).

Transaction (flow) data: values related to the whole period which are calculated as the difference between the balances at the end of the current and the previous period adjusted for non-transaction effects, i.e. effects connected with reclassifications, valuation changes and exchange rate variations over the period. These factors result in breaks in time series, thereby affecting the comparability of end-of-period balances. Transaction (flow) data only reflect those changes that arise from transactions, i.e. from accepting financial assets or providing financial liabilities.

Unit trusts other than money market funds:

1. *equity funds and funds of funds* – funds that constantly invest 66% or more of their assets on the equity market (i.e. in shares and instruments bearing equity risk) and/or funds that constantly invest 66% or more of their assets in the units and shares of other unit trusts/investment funds. Equity funds also include index funds and guaranteed funds linked to stock indices.
2. *bond funds* – funds that constantly invest on the bond market. Additional investment in equities is allowed, but the share of equities must not exceed 10% of the fund's assets. Bond funds also include index funds and guaranteed funds linked to bond indices.
3. *mixed funds* – funds that invest in various assets (equities and bonds) on various markets and do not have limits on the share of equities or bonds.

Technical Notes

A. Calculation of growth rates

The growth rate for the reference period is calculated from the volumes of monthly financial transactions and the outstanding amounts at the beginning of each month. Monthly transactions are calculated from differences in outstanding amounts adjusted for reclassifications, other revaluations, exchange rate variations and other changes which do not arise from transactions. This data thus reflects only those changes that arise from accepting financial assets or providing financial liabilities. Reclassifications and other non-transaction corrections are introduced into the transaction statistics to preserve the comparability of the gradual monitoring results, thereby enabling calculation of the indices of expected outstanding balances of the monitored variables and determination of their growth rates.

Method of calculation

1. The month-on-month percentage change a_t^M for month t is calculated as:

$$(a) \quad a_t^M = \left(\frac{F_t^M}{L_{t-1}} \right) \times 100$$

2. The annual growth rate for month t , i.e. the change for the last 12 months ending with month t , is calculated as the product of the twelve coefficients for each previous month. The calculation of the annual growth rate from the month-on-month growth rates thus enables transaction changes and non-transaction effects in the individual months to be taken into account.

$$(b) \quad a_t = \left[\prod_{i=0}^{11} \left(1 + \frac{F_{t-i}^M}{L_{t-1-i}} \right) - 1 \right] \times 100$$

where

F_t^M - transactions in month t

$F_t^M = (L_t - L_{t-1}) - C_t^M - E_t^M - V_t^M$

and

L_t - outstanding amount at the end of month t

C_t^M - reclassifications in month t

E_t^M - exchange rate variations in month t

V_t^M - valuation changes in month t

Growth rates for other reference periods are derived from formula (b).

B. Calculation of the contribution to the annual growth rate of a monitored variable (e.g. M3)

If $a_t(M3)$ represents the annual growth rate of M3 for the year ending with month t , and $F_{t-i}(M1)$, $F_{t-i}(M2-M1)$, $F_{t-i}(M3-M2)$ are the monthly transactions of the components M1, M2-M1 and M3-M2 in month $t-i$, the contribution of M1 to the annual growth rate of M3, for example, is calculated as:

$$\frac{\sum_{i=0}^{11} F_{t-i}(M1)}{\sum_{i=0}^{11} [F_{t-i}(M1) + F_{t-i}(M2-M1) + F_{t-i}(M3-M2)]} \times a_t(M3)$$
