List of Annexes

1) A comma (,) represents a decimal point delimiter; a blank between figures represents a thousand group delimiter.

2) The information in Tables 3-14 are based on monetary statistics of CNB harmonized with monetary statistics of European System of Central Banks. The data are not seasonally adjusted and the last period data are always preliminary.

3) All the data quoted in this Publication are included in the ARAD time series system - www.cnb.cz/en/statistics/ (Time series database ARAD >> Money and financial statistics >> Monetary statistics >> Monetary Statistics Publication).

Financial markets interest rates in CR

Commentary on key interest rates (Table 1) and financial market interest rates (Table 2): November 2009

Key interest rates

The CNB's 2W repo rate has been set at 1.25% since 7 August 2009 and the ECB's key interest rate has been re-set at 1.00% since 13 May 2009. The difference between the CNB's and the ECB's key rates was thus 0.25 percentage point at the end of November.

Financial market interest rates

In November, interest rates on the Czech as well as the euro area interbank deposit market decreased generally compared to the previous month, except the EONIA rate, which remained unchanged, and the 1M EURIBOR, which increased by 0.01 pp. The most visible change - the decrease by 0.08 pp - recorded the 1M PRIBOR rate. The 3M PRIBOR reached 1.80% (1.87% in October) and the 3M EURIBOR stood at 0.72% (0.74% in October).

Bond yields on the Czech capital market recorded a significant month-on-month decrease in November (the 10Y and 5Y bonds identically by 0.31 pp). In the euro area the yields only corrected their October's values. The yield on the the 10-year bond in the Czech Republic was 4.19% (4.50% in October), while the yield on the 10-year bond in the euro area reached 3.83% (3.80% in October).

¹⁾ Monetary aggregates comprise monetary liabilities of MFIs vis-à-vis non-MFI Czech residents excluding central government. M1 is the sum of currency in circulation and overnight deposits; M2 is the sum of M1, deposits with an agreed maturity of up to two years and deposits redeemable at notice of up to three months; and M3 is the sum of M2, repurchase agreements, money market fund shares/units and debt securities up to two years.

²⁾ Including all sectors without general government (S.13) and MFIs sector (S.121 and S. 122).

³⁾ Net foreign assets (NFA) represent balance of financial claims and liabilities of the MFI sector vis-a-vis nonresidents

⁴⁾ Net value of flow data calculated by adjusting the difference between end-of-period levels for the effect of non-transactions-related factors.

Comments on monetary developments statistics¹⁾ (Tables 3-9): November 2009

The annual rate of growth of M3 fell from 1.8% in October to 1.2% in November. The month-on-month growth rate decreased from 0.7% to 0.6%. As a result of financial transactions, the monetary aggregate M3 grew by CZK 32.3 billion year on year (by CZK 16.9 billion month on month) to CZK 2664.9 billion.

Main components of M3

Monetary aggregate M1 is the most important component of M3, which as the only one contributes to positive annual M3 growth. Its contribution rose to 5.1 percentage points in November, compared to 3.8 percentage points in October (Table 7). However, among other components, annual rates of growth remain negative.

The annual rate of growth of M1 grew from 6.0% in October to 8.1% in November. The annual rate of growth of overnight deposits increased from 8.6% in October to 11.5% in November. Overnight deposits grew by CZK 49.8 billion (i.e. 3.6%) month on month due to financial transactions. Within overnight deposits, the highest increase was recorded for deposits of the insurance companies and pension funds (of 122.7%, i.e. CZK 14.4 billion). Deposits of the non-financial corporations sector were up by 9.9% (CZK 39.9 billion), deposits of the other financial intermediaries sector by 2.8% (CZK 0.8 billion) and household sector deposits by 0.6% (CZK 4.5 billion). By contrast, deposits of other government decreased by 7.1% (CZK 9.9 billion).

The annual rate of growth of currency in circulation fell by 0.6 percentage point, from -3.2% in October to -3.8% in November. In month-on-month terms, currency in circulation rose by 0.3% to CZK 354.2 billion owing to financial transactions.

Other short-term deposits (excluding overnight deposits) fell by CZK 34.1 billion (i.e. 4.0%) month on month due to financial transactions. In November, the annual rate of growth of these deposits declined by 5.4 percentage points to -8.2% (from -2.8% in October). The annual rate of growth of deposits with maturity of up to two years, which are the dominant component of short-term deposits, fell by 5.1 percentage points compared to the previous month, reaching -21.6%. The annual rate of growth of deposits redeemable at notice of up to 3 months, which had been previously recording high increases year on year, is currently falling. It declined from 21.9% in October to 14.4% in November.

Within other short-term deposits, deposits of all sectors of the economy recorded a month-on-month fall. Deposits of insurance companies and pension funds recorded the biggest decline, of 16.8% (CZK 5.7 billion). Deposits of non-financial corporations decreased by 11.6% (CZK 22.1 billion), deposits of other financial intermediaries by 9.0% (CZK 1.8 billion), deposits of other government by 3.1% (CZK 1.2 billion) and deposits of households by 0.6% (CZK 3.4 billion).

Marketable instruments, which consist of repos, money market fund shares/units and debt securities with maturities of up to two years, grew by 0.5% to CZK 57.8 billion month on month (from CZK 57.5 billion in October). The annual rate of growth of marketable instruments rose by 0.1 percentage point to -34.3% (from -34.4% in October).

Main counterparts of M3

The annual rate of growth of loans granted to the government sector grew from 10.1% in October to 12.9% in November. The annual rate of growth of purchased government bonds fell to 18.8% in November from 37.8% in October.

The annual rate of growth of loans granted to the private sector fell further to 1.5% in November (from 1.6% in October). As in previous months, positive annual growth of loans to the private sector was fostered solely by the household sector (Table 8). The annual rate of growth of loans to households declined by 0.7 percentage point to 12.9% (from 13.6% in October). The decline in annual rates of growth of loans to other sectors of the economy, which deepened in previous months, stopped in November and annual growth rates of these loans recorded a slight increase (e.g. annual rate of growth of loans to non-financial corporations rose from -7.5% in October to -7.4% in November).

Net external assets recorded a rise in the annual growth rate from -4.6% in October to -1.8% in November. The annual growth rate of longer-term financial liabilities increased from 8.8% in October to 16.8% in November. The annual growth rate of deposits by central government declined from 14.7% to -3.3%.

¹⁾ All increases and decreases referred to in this commentary relate only to financial transactions adjusted for non-transaction effects.

¹⁾ The interest rates that are applied by MFIs to CZK-denominated deposits and loans vis-à-vis households and non-financial corporations resident in the Czech Republic. New business refers to any new agreement between the customer and the MFI within given period.

²⁾ Including households (S.14) and non-profit institutions serving households (S.15) according to the classification of the economic sectors ESA95.

³⁾ Households deposits liabilities redeemable at notice include similar deposits of non-financial corporations of which volumes are negligible in this category.

⁴⁾ Including deposit liabilities redeemable at notice of non-financial corporations (which are also included in item 1.3).

⁵⁾ Bank overdrafts include provided bank overdrafts, debit balance on bank accounts and credit card credits.

⁶⁾ Since 2009, the amendment to Act No. 190/2004 Coll., on Bonds, as amended, has been fully applied, under which a mortgage loan is a loan whose redemption, including appurtenances (i.e. interest etc.), is secured by lien (right of pledge) over real estate (property), including property under construction, where the claim arising from the loan does not exceed twice the pledge value of the mortgaged property (Article 28(3)).

⁷⁾ The initial period of fixations is a predetermined period of time at the start of the contract during which the value of the interest rate cannot change. Period up to 1 year includes floating rates.

⁸⁾ Annual percentage rate of charge (APRC) covers total costs of the credit to the client including charges etc

¹⁾ The interest rates that are applied by MFIs to CZK-denominated deposits and loans vis-à-vis households and non-financial corporations resident in the Czech Republic. Interest rates on outstanding amounts refer to the stock of all deposits and all loans at a specific moment.

²⁾ Including households (S.14) and non-profit institutions serving households (S.15) according to the classification of the economic sectors ESA95.

³⁾ Including overnight deposits and deposits with agreed maturity presented in Table 10. For this instrument category, new business and outstanding amounts coincide.

⁴⁾ Since 2009, the amendment to Act No. 190/2004 Coll., on Bonds, as amended, has been fully applied, under which a mortgage loan is a loan whose redemption, including appurtenances (i.e. interest etc.), is secured by lien (right of pledge) over real estate (property), including property under construction, where the claim arising from the loan does not exceed twice the pledge value of the mortgaged property (Article 28(3)).

⁵⁾ Consumer credit and other lending include bank overdrafts presented in Table 10.

Commentary on interest rates of monetary financial institutions (Tables 10 and 11): November 2009

Interest rates on new business

Interest rates on **new** household **deposits** recorded no change in November, while interest rates on new deposits of non-financial corporations decreased slightly.

The average interest rate on total new deposits of **households** remained the same as in October, at 1.13%. Likewise, the rate on overnight deposits recorded almost no change and stabilised at 0.66%. The interest rate on deposits with agreed maturity recorded a slight rise of 0.04 percentage point to 1.34%. The interest rate on deposits redeemable at notice remained at the previous month's level, at 1.94%.

The overall interest rate on new deposits of **non-financial corporations** declined slightly by 0.05 percentage point to 0.64%. However, the rate on overnight deposits decreased only slightly by 0.02 percentage point to 0.41%. The rate on deposits with agreed maturity of up to two years (these deposits as a rule account for 100% of all deposits with agreed maturity in this sector) fell only very modestly, by 0.02 percentage point to 0.98%.

Rates on **new loans** to households recorded only a slight increase in November, while rates on new loans provided to non-financial corporations remained unchanged compared to the previous month.

The overall interest rate on new loans to **households** rose slightly by 0.03 percentage point to 15.01%. The interest rate on bank overdrafts recorded only a more moderate rise of 0.03 percentage point to 19.22%. The interest rate on consumer credit declined slightly by 0.05 percentage point to 14.48%. The interest rate on new loans for house purchase increased only slightly by 0.02 percentage point to 5.53%. The rate on other loans was lower by 0.04 percentage point, standing at 6.48%.

Total loans to **non-financial corporations** were unchanged and the rate remained at 4.11%. The rate on bank overdrafts rose by 0.09 percentage point to 4.58%. The rate on other loans of up to CZK 30 million recorded only a modest rise of 0.02 percentage point to 4.30%. However, rates on other loans of over CZK 30 million were lower by 0.13 percentage point, standing at 3.25%.

The overall annual percentage rate of charge on loans to households grew slightly by 0.02 percentage point to 8.65%. The APRC on consumer credit recorded almost no change in November and stabilised at 15.58%. The APRC on house purchase loans increased slightly by 0.04 percentage point to 5.81%.

Interest rates on outstanding amounts

The average interest rates on **outstanding amounts** of household **deposits** recorded no change in November, while the average interest rate on outstanding amounts of deposits of non-financial corporation decreased slightly.

The interest rate on total **household** deposits remained unchanged compared to October, standing at 1.30%. Likewise, the rate on overnight deposits recorded almost no change and stabilised at 0.66%. The interest rate on deposits redeemable at notice remained also at 1.94%. The interest rate on deposits with agreed maturity followed almost the previous month's level of 2.00%.

The interest rate on total deposits of **non-financial corporations** declined only by 0.05 percentage point to 0.68%. The interest rate on overnight deposits recorded only a decrease of 0.02 percentage point to 0.41%. The interest rate on deposits with agreed maturity remained almost unchanged, standing at 1.25%.

The average interest rate on **outstanding amounts of loans** to households dropped only slightly, while the rate for non-financial corporations recorded a modest rise.

The overall interest rate on loans to **households** fell slightly by 0.04 percentage point to 7.01%. The rate on loans for house purchase remained almost unchanged and stabilised at 5.25%. However, the interest rate on loans on consumer credit and other loans declined more markedly by 0.17 percentage point to 11.27%.

The average interest rate on outstanding amounts of loans to **non-financial corporations** rose only slightly to 4.36%. The rate on loans to non-financial corporations remained at the previous month's level for maturity of over five years, standing at 4.50%. The rate on loans with maturity of over one year and up to five years recorded a modest fall to 4.35% and, while that on loans with maturity of up to one year increased to 4.18%.

¹⁾ Financial corporations engaged in lending - corporations classified within sector S.123 other financial intermediaries which are predominantly engaged in granting credit or loans or entering into agreements of similar nature, for example financial leasing, factoring, consumer credit, hire purchase, etc. (see Decree No. 307/2004 Coll.). Data are published by the last working day of the second month following the reference period.

Commentary on the aggregated balance sheet of collective investment funds (Table 12): October 2009

At the end of October 2009, collective investment funds (CIFs) administered assets worth CZK 93.9 billion. The value of assets in the funds thus increased further, up by CZK 1.51 billion (i.e. 1.64%) compared to September.

In October 2009, the largest growth in the volume of assets was recorded by bond funds, whose assets increased from CZK 35.6 billion to CZK 36.7 billion, which represents a month-on-month increase of 3.16%. Growth in the value of assets was also recorded by equity funds (from CZK 15.7 billion to CZK 16.2 billion) and mixed funds (from CZK 35.9 billion to CZK 36.4 billion). The value of assets of real estate funds was the same as in September, at CZK 7.5 billion.

The CFIs invested most in debt securities. The total volume of purchased debt securities increased by CZK 0.58 billion compared to the previous month, to CZK 41.8 billion. However, the share of debt securities in the equity capital of funds declined compared to September, from 44.66% to 44.56% (a decrease of 0.11 percentage point). The share of equity securities in funds' portfolios increased in October. The volume of equity securities grew by CZK 1.23 billion month on month, to CZK 38 billion (up by 3.35%).

At the end of October 2009, 148 resident collective investment funds were active in the Czech Republic, of which 28 were equity funds, 29 bond funds, 57 mixed funds, 33 real estate funds and 1 other fund.

Commentary on the quarterly aggregated balance sheet of financial corporations engaged in lending¹⁾ (Tables 13 and 14): September 2009

As of 30 September 2009, financial corporations engaged in lending had total assets of CZK 412.3 billion. Compared to the previous quarter, total assets decreased by CZK 9.9 billion, which represents a quarter-on-quarter decline of 2.35%. In year-on-year comparison they fell by CZK 23.4 billion. Financial leasing companies accounted for the largest share of total assets (CZK 289.7 billion). The contribution of other lending companies was CZK 100.9 billion and that of corporations engaged in factoring and forfaiting was CZK 21.7 billion.

The largest asset item was loans, which amounted to CZK 309.6 billion. Loans recorded a decrease of CZK 20.2 billion (6.36%) in 2009 Q3 compared to the previous period. The year-on-year decline in loans was CZK 37.2 billion, or 10.73%. Most loans (97.96%) were granted to resident entities. Short-term loans amounted to CZK 83.6 billion at the end of Q3 and accounted for 20.27% of total assets. Long-term loans amounted to CZK 226.8 billion, i.e. 54.81% of total assets.

The largest part of loans provided to residents consisted of loans to non-financial corporations, which amounted to CZK 171.1 billion, i.e. 56.41% of loans to residents. Loans provided to non-financial corporations dropped by CZK 10.8 billion quarter on quarter (down by 5.93%) and by CZK 20.2 billion year on year (down by 10.54%). CZK 148.9 billion was provided by financial leasing companies, CZK 5.3 billion by other lending companies and CZK 16.9 billion by factoring and forfaiting companies. These loans are made up predominantly of loans with an original maturity of one to five years, which amounted to CZK 98.5 billion.

Loans to households, which totalled CZK 130.3 billion, were the second largest group of loans to residents. They decreased by CZK 8.7 billion (or 6.2%) compared to the previous quarter. In year-on-year terms, the value of loans to households decreased by CZK 18.5 billion, i.e. 12.41%. These loans accounted for 42.96% of loans granted to residents. CZK 60.7 billion was provided by financial leasing companies and CZK 69.6 billion by other lending companies. Loans with an original maturity of one to five years amounted to CZK 79.5 billion, giving them the largest share in loans to households.

1) Under Decree No. 307/2004 Coll. financial corporations engaged in lending are companies whose main or major business activity involves providing credit or loans or entering into agreement of similar nature, e.g. financial leasing, factoring, consumer credit, hire-purchase financing, etc.

Glossary

Harmonisation of statistics: the Treaty establishing the European Community tasked the European Central Bank (ECB) with ensuring harmonised statistics according to Article 5 of the Statute of the European System of Central Banks. The national central banks of EC Member States therefore collect statistical information according to a uniform definition, from which the ECB then compiles aggregate data for euro area monetary policy. Although Council Regulation No 2533/98, which specifies the requirements for statistical data collection, only concerns euro area countries, the ECB also receives full data sets from the non-participating countries (e.g. the Czech Republic) in order to monitor their economic and financial development.

Monetary statistics: financial macrostatistics of sectors S.121, S.122 and S.123 based exclusively on the "host country" principle. According to this principle, a resident reporting unit is an institution resident in a given economic territory. The reporting population includes 1) institutions incorporated and located in the territory, including subsidiaries of parent companies located outside that territory, and 2) branches of institutions that have their head office outside that territory.

APRC: annual percentage rate of charge, i.e. the rate including interest expenses and all related costs of the credit to the client (fees etc.).

Collective investment funds: for the purposes of monetary and banking statistics, collective investment funds comprise unit trusts and investment funds other than money market funds which are resident in the Czech Republic. These are undertakings the sole object of which is collective investment, i.e. pooling investor funds and investing them under conditions stipulated in the Act on Collective Investment (No. 189/2004 Coll.). Such undertakings may be constituted under the Act either as unit trust managed by an investment company or as investment funds.

Consolidated balance sheet of the MFI sector: the basic statistical tool of monetary statistics. It is based on the residency principle and is obtained by netting out inter-MFI positions on their aggregated balance sheet.

Consumer credit: loans granted to households for personal use in the consumption of goods and services.

Contribution to annual growth rate: the growth rate of a selected component weighted by its share in the total growth rate.

Deposits redeemable at notice: deposits that can be withdrawn by clients only after the expiry of a period of notice agreed in advance, which starts at the moment of notification of the intention to withdraw the deposit.

Deposits with agreed maturity: deposits that cannot be withdrawn by clients before a predefined maturity.

Financial corporations engaged in lending (FCLs):

Definition: FCLs mean corporations classified within sector S.123 other financial intermediaries which are predominantly engaged in granting credit or loans or entering into agreements of similar nature, for example financial leasing, factoring, consumer credit, hire purchase, etc. (see Decree No. 307/2004 Coll.)

Type of services:

1. Financial leasing - It is financial service, when lessee acquires the right to use good in exchange for rental payment over predetermined term. All risk and rewards of ownership are transferred from lessor to lessee. After lapse of predetermined term ownership of good is transferred from lessor to lessee.
2. Factoring - It is financial service consisting in purchase of short-term receivables (with maturity 30-90 days) before their maturity date. Receivables are transferred on factoring company – factor- by supplier of goods or services.
3. Other lending - This category encompasses granting credit or loans or agreements of similar nature different from financial leasing and factoring. It deals especially with consumer credit, hire purchase, consumption loans, etc.

Growth rate: the percentage change in the monitored variable over the reference period, calculated from the volumes of monthly financial transactions and the outstanding amounts at the beginning of each month.

Household sector: institutional units included in the sectors of households (S.14) and non-profit institutions serving households (S.15) under ESA 95.

Glossary (cont'd)

Housing loans: Loans granted to households for the purpose of purchasing/investing in housing, including building and home improvements.

Interest rate fixation: a period of interest rate fixation, i.e. a period at the beginning of a contract for which the agreed interest rate cannot be changed. Period up to 1 year includes floating rates.

MFI longer-term financial liabilities: comprise deposits with an agreed maturity of over two years, deposits redeemable at a period of notice of over three months, debt securities issued with an original maturity of more than two years and the capital and reserves of the Czech MFI sector.

Monetary aggregates: comprise the monetary liabilities of monetary financial institutions to non-MFI Czech residents except central government. The narrow monetary aggregate M1 includes currency in circulation (excluding cash at banks' cash desks) and overnight deposits. The intermediate monetary aggregate M2 comprises M1, deposits redeemable at a period of notice of up to and including three months and deposits with a maturity of up to and including two years. The broad monetary aggregate M3 comprises M2, money market fund shares/units, debt securities with a maturity of up to two years and repurchase agreements.

Monetary financial institutions (MFIs): financial institutions forming the money-issuing sector. Under Community law, these include the central bank, resident credit institutions, and all other resident financial institutions whose business is to receive deposits and/or close substitutes for deposits from entities other than MFIs and, for their own account (at least in economic terms), to grant credit and/or invest in securities. In the Czech Republic, MFIs include the central bank, banks, money market funds and credit unions.

Money-holding sector: all institutional units except central government (S.1311) and monetary financial institutions (S.121 and S.122) under ESA 95.

Money-issuing sector: all institutional units included in the sectors of the central bank (S.121) and other monetary financial institutions (S.122) under ESA 95.

Money-neutral sector: an institutional sector comprising the central government sector (S.1311) under ESA 95.

Money market funds: MMFs are defined as those collective investment funds of which the units are, in terms of liquidity, close substitutes for deposits and which primarily invest in money market instruments and/or in MMF shares/units and/or in other transferable debt instruments with a residual maturity of up to and including one year, and/or in bank deposits, and/or which pursue a rate of return that approaches the interest rates of money market instruments. The criteria applied in order to identify MMFs shall be derived from the public prospectus as well as fund rules, instruments of incorporation, established statutes or by-laws, subscription documents or investment contracts, marketing documents, or any other statement with similar effects, of the collective investment undertaking.

Net external assets: comprise external assets of Czech MFIs (such as monetary gold, non-koruna banknotes, securities issued by non-residents and loans granted to non-residents) minus external liabilities of the Czech MFI sector (such as non-residents' holdings of deposits, repurchase agreements, money market fund shares and units, and debt securities with a maturity of up to and including two years issued by MFIs and held by non-residents).

Non-MFIs: all resident sectors excluding MFIs, i.e. general government (S.13), non-financial corporations (S.11), financial institutions other than MFIs (S.123 and S.124) and households and non-profit institutions serving households (S.14 and S.15) under ESA 95.

Other financial intermediaries (OFIs): entities included in the sectors of other financial intermediaries except insurance corporations and pension funds (S. 123), financial auxiliaries (S.124) and insurance corporations and pensions funds (S.125) under ESA 95.

Private sector: a sector comprising all institutional sectors except general government (S.13) and monetary financial institutions (S.121 and S.122) under ESA 95.

Glossary (cont'd)

Rates on new business: interest rates agreed by the bank and the client for all agreements negotiated during the reference period.

Rates on outstanding amounts: interest rates applied to end-of-period balances.

Reclassifications: comprise any changes in the MFI balance sheet resulting from changes in the reporting population, corporate restructuring, reclassifications of assets and liabilities, and corrections of reported errors.

Residents: all domestic and foreign legal entities and natural persons, including branches of foreign banks and foreign owners of buildings and land, whose centre of economic interest is in the given territory. Foreign legal entities and natural persons are considered residents after at least one year of economic activity in the territory, with the exception of foreign bank branches and owners of buildings and land, who become residents at the moment they perform a valid legal act (in the case of foreign owners of buildings and land, this only applies in connection with transactions relating to the building or land in question).

Transaction (flow) data: values related to the whole period which are calculated as the difference between the balances at the end of the current and the previous period adjusted for non-transaction effects, i.e. effects connected with reclassifications, valuation changes and exchange rate variations over the period. These factors result in breaks in time series, thereby affecting the comparability of end-of-period balances. Transaction (flow) data only reflect those changes that arise from transactions, i.e. from accepting financial assets or providing financial liabilities.

Unit trusts other than money market funds:

1. *equity funds and funds of funds* – funds that constantly invest 66% or more of their assets on the equity market (i.e. in shares and instruments bearing equity risk) and/or funds that constantly invest 66% or more of their assets in the units and shares of other unit trusts/investment funds. Equity funds also include index funds and guaranteed funds linked to stock indices.
2. *bond funds* – funds that constantly invest on the bond market. Additional investment in equities is allowed, but the share of equities must not exceed 10% of the fund's assets. Bond funds also include index funds and guaranteed funds linked to bond indices.
3. *mixed funds* – funds that invest in various assets (equities and bonds) on various markets and do not have limits on the share of equities or bonds.

Technical Notes

A. Calculation of growth rates

The growth rate for the reference period is calculated from the volumes of monthly financial transactions and the outstanding amounts at the beginning of each month. Monthly transactions are calculated from differences in outstanding amounts adjusted for reclassifications, other revaluations, exchange rate variations and other changes which do not arise from transactions. This data thus reflects only those changes that arise from accepting financial assets or providing financial liabilities. Reclassifications and other non-transaction corrections are introduced into the transaction statistics to preserve the comparability of the gradual monitoring results, thereby enabling calculation of the indices of expected outstanding balances of the monitored variables and determination of their growth rates.

Method of calculation

1. The month-on-month percentage change a_t^M for month t is calculated as:

$$(a) \quad a_t^M = \left(\frac{F_t^M}{L_{t-1}} \right) \times 100$$

2. The annual growth rate for month t , i.e. the change for the last 12 months ending with month t , is calculated as the product of the twelve coefficients for each previous month. The calculation of the annual growth rate from the month-on-month growth rates thus enables transaction changes and non-transaction effects in the individual months to be taken into account.

$$(b) \quad a_t = \left[\prod_{i=0}^{11} \left(1 + \frac{F_{t-i}^M}{L_{t-1-i}} \right) - 1 \right] \times 100$$

where

F_t^M - transactions in month t

$F_t^M = (L_t - L_{t-1}) - C_t^M - E_t^M - V_t^M$

and

L_t - outstanding amount at the end of month t

C_t^M - reclassifications in month t

E_t^M - exchange rate variations in month t

V_t^M - valuation changes in month t

Growth rates for other reference periods are derived from formula (b).

B. Calculation of the contribution to the annual growth rate of a monitored variable (e.g. M3)

If $a_t(M3)$ represents the annual growth rate of M3 for the year ending with month t , and $F_{t-i}(M1)$, $F_{t-i}(M2-M1)$, $F_{t-i}(M3-M2)$ are the monthly transactions of the components M1, M2-M1 and M3-M2 in month $t-i$, the contribution of M1 to the annual growth rate of M3, for example, is calculated as:

$$\frac{\sum_{i=0}^{11} F_{t-i}(M1)}{\sum_{i=0}^{11} [F_{t-i}(M1) + F_{t-i}(M2-M1) + F_{t-i}(M3-M2)]} \times a_t(M3)$$
