List of Annexes

1) A comma (,) represents a decimal point delimiter; a blank between figures represents a thousand group delimiter.

2) The information in Tables 3-14 are based on monetary statistics of CNB harmonized with monetary statistics of European System of Central Banks. The data are not seasonally adjusted and the last period data are always preliminary.

3) All the data quoted in this Publication are included in the ARAD time series system - www.cnb.cz/en/statistics/ (Time series database ARAD >> Money and financial statistics >> Monetary statistics >> Monetary Statistics Publication).

LIST OF ABBREVIATIONS AND CODES

Codes

CNB	Czech National Bank
ECB	European Central Bank
ESA95	European System of Accounts
Eurozone	The European Union member states that have adopted the EUR
IF	investment funds excluding money market funds
MMF	money market funds
LTIR	yield of the 10-year bond
M1, M2, M3	monetary aggregates
MFI	monetary financial institutions
NFA	net foreign assets
NISH	non-profit institutions serving households
Non-MFI	all institutions excluding MFIs
OFI	other financial intermediaries
FCL	financial corporations engaged in lending (financial leasing, hire purchase and provision of personal or commercial finance, factoring and forfaiting)

Financial markets interest rates in CR

Commentary on key interest rates (Table 1) and financial market interest rates (Table 2): April 2010

Key interest rates

The CNB's 2W repo rate has been re-set at 1.00% since 17 December 2009. Therefore the CNB's key interest rate is on the same level as the ECB's key rate from this moment.

Financial market interest rates

In April, interest rates on the Czech as well as the euro area interbank deposit market recorded the correction of March figures. The 3M PRIBOR reached 1.42% (1.43% in March) and the 3M EURIBOR stood at 0.64% (0.64% in March).

Bond yields on the Czech capital market recorded the most considerable month-on-month decrease in April on the 3Y bond (by 0.41 pp) following by the decrease on the 5Y yield (by 0.34 pp). On the other hand in the euro area the all monitored yields recorded month-on-month increase in April (10Y by 0.19 pp at most). The yield on the the 10Y bond in the Czech Republic was 3.84% (4.02% in March), while the yield on the 10-year bond in the euro area reached 4.17% (3.98% in March).

¹⁾ Monetary aggregates comprise monetary liabilities of MFIs vis-à-vis non-MFI Czech residents excluding central government. M1 is the sum of currency in circulation and overnight deposits; M2 is the sum of M1, deposits with an agreed maturity of up to two years and deposits redeemable at notice of up to three months; and M3 is the sum of M2, repurchase agreements, money market fund shares/units and debt securities up to two years.

²⁾ Including all sectors without general government (S.13) and MFIs sector (S.121 and S. 122).

³⁾ Net foreign assets (NFA) represent balance of financial claims and liabilities of the MFI sector vis-a-vis nonresidents

⁴⁾ Net value of flow data calculated by adjusting the difference between end-of-period levels for the effect of non-transactions-related factors.

Comments on monetary developments statistics¹⁾ (Tables 3-9): April 2010

The monetary aggregate M3 continued to grow in April. The annual rate of growth of this basic indicator characterising money supply in the economy was positive for the first time since January this year, at 0.6% (compared to -0.2% in March). The month-on-month rate of growth rose from 0.7% in March to 1.7% in April. As a result of financial transactions, the monetary aggregate M3 rose by CZK 44.9 billion month on month (by CZK 16.8 billion year on year), reaching CZK 2,728.3 billion.

Main components of M3

The monetary aggregate M1 is the most important component within M3 and its contribution to the annual growth rate of M3 decreased from 4.6 percentage points in March to 4.3 percentage points in April (Table 7). As regards the other components, the contribution of quasi money was still negative.

The annual rate of growth of M1 decreased from 7.3% in March to 6.9% in April. This decline was due to a fall in the annual rate of growth of overnight deposits (from 9.8% in March to 9.3% in April). In month-on-month comparison, overnight deposits fell by CZK 10.3 billion (i.e. 0.7%), due to financial transactions. Within overnight deposits, month-on-month decreases were recorded in almost all sectors of the economy. Deposits of insurance corporations and pension funds fell the most, by 27.9% (CZK 3.5 billion); deposits of other financial intermediaries were down by 12.2% (CZK 3.7 billion), deposits of other government by 8.8% (CZK 12.5 billion), and deposits of non-financial corporations by 1.1% (CZK 4.6 billion). By contrast, household deposits increased by 1.7% (CZK 14.0 billion).

The annual rate of growth of currency in circulation rose by 0.1 percentage point, from -2.1% in March to -2.0% in April. In month-on-month comparison, currency in circulation increased by 0.4% in April (to CZK 353.1 billion), due to financial transactions.

Other short-term deposits (excluding overnight deposits) grew by CZK 51.0 billion (i.e. 6.3%) month on month, owing to financial transactions. In April, the annual rate of growth of these deposits increased by 2.3 percentage points to -10.6% (from -12.9% in March). The annual rate of growth of deposits with maturity of up to two years, which are a predominating component of short-term deposits in terms of volume, increased by 4.3 percentage points compared to the previous month, to -13.2%. The annual rate of growth of deposits redeemable at notice of up to three months, which had previously recorded high year-on-year increases, currently shows a downward trend and was negative in the period under review (at -7.0% compared to 50.3% in the same period last year).

Within other short-term deposits, month-on-month increases were recorded for deposits of non-financial corporations (up by 24.5%, or CZK 44.8 billion), deposits of insurance corporations and pension funds (up by 19.3%, or CZK 5.6 billion) and deposits of other financial intermediaries (up by 13.7%, or CZK 2.8 billion). By contrast, decreases were recorded for deposits of other government (of 3.9%, or CZK 1.3 billion) and household deposits (of 0.2%, or CZK 0.9 billion).

Marketable instruments, which consist of repos, money market fund shares/units and debt securities with maturities of up to two years, grew by 4.1% month on month, to CZK 68.9 billion (compared to CZK 66.2 billion in March). The annual rate of growth of marketable instruments rose by 13.9 percentage points to 4.9% (compared to -9.0% in March).

Main counterparts of M3

The annual rate of growth of loans to general government declined to 16.3% in April (from 20.8 % in March). The annual rate of growth of purchased government bonds fell to 14.1% in April (from 20.7% in March).

The annual rate of growth of credit to the private sector continued to decline in April, to 0.6% (from 1.1% in March). The achievement of the positive annual growth rate of credit to the private sector is conditional exclusively on the positive growth rate of loans to households, which offsets the decline in the annual growth rate of loans to non-financial corporations and other financial intermediaries to the negative territory (Table 8). In month-on-month comparison, the annual growth rate of loans to households fell by 0.7 percentage point (from 10.3% in March to 9.6% in April). Following a modest rise in recent months, the annual growth rate of loans to non-financial corporations decreased again, to -6.3% (-5.3% in March). However, annual rates of growth of loans to other economic sectors increased in April, for instance the annual rate of growth of loans to insurance corporations and pension funds recorded a strong growth, but this item represents just a minimal contribution to total loans provided to the private sector in terms of volume.

Net external assets recorded a rise in the annual rate of growth, to 5.1% at the end of April (from 2.8% in March). The annual rate of growth of longer-term financial liabilities dropped from 36.0% in March to 31.6% in April. The annual rate of growth of deposits by central government fell as well, from -8.3% to -20.4%.

The data in Table 9 and in the respective charts illustrate the significance of basic items in the consolidated balance sheet of monetary financial institutions. MFI loans to residents accounted for 46% of the sector's total assets in the period under review, and deposits from residents accounted for 66% of total MFI liabilities.

¹⁾ The interest rates that are applied by MFIs to CZK-denominated deposits and loans vis-à-vis households and non-financial corporations resident in the Czech Republic. New business refers to any new agreement between the customer and the MFI within given period.

²⁾ Including households (S.14) and non-profit institutions serving households (S.15) according to the classification of the economic sectors ESA95.

³⁾ Households deposits liabilities redeemable at notice include similar deposits of non-financial corporations of which volumes are negligible in this category.

⁴⁾ Including deposit liabilities redeemable at notice of non-financial corporations (which are also included in item 1.3).

⁵⁾ Bank overdrafts include provided bank overdrafts, debit balance on bank accounts and credit card credits.

⁶⁾ Since 2009, the amendment to Act No. 190/2004 Coll., on Bonds, as amended, has been fully applied, under which a mortgage loan is a loan whose redemption, including appurtenances (i.e. interest etc.), is secured by lien (right of pledge) over real estate (property), including property under construction, where the claim arising from the loan does not exceed twice the pledge value of the mortgaged property (Article 28(3)).

⁷⁾ The initial period of fixations is a predetermined period of time at the start of the contract during which the value of the interest rate cannot change. Period up to 1 year includes floating rates.

⁸⁾ Annual percentage rate of charge (APRC) covers total costs of the credit to the client including charges etc

¹⁾ The interest rates that are applied by MFIs to CZK-denominated deposits and loans vis-à-vis households and non-financial corporations resident in the Czech Republic. Interest rates on outstanding amounts refer to the stock of all deposits and all loans at a specific moment.

²⁾ Including households (S.14) and non-profit institutions serving households (S.15) according to the classification of the economic sectors ESA95.

³⁾ Including overnight deposits and deposits with agreed maturity presented in Table 10. For this instrument category, new business and outstanding amounts coincide.

⁴⁾ Since 2009, the amendment to Act No. 190/2004 Coll., on Bonds, as amended, has been fully applied, under which a mortgage loan is a loan whose redemption, including appurtenances (i.e. interest etc.), is secured by lien (right of pledge) over real estate (property), including property under construction, where the claim arising from the loan does not exceed twice the pledge value of the mortgaged property (Article 28(3)).

⁵⁾ Consumer credit and other lending include bank overdrafts presented in Table 10.

Commentary on interest rates of monetary financial institutions (Tables 10 and 11): April 2010

Interest rates on new business

Interest rates on **new deposits** of households and non-financial corporations were unchanged in April.

The average interest rate on total new deposits of **households** remained at the March level, 1.11%. The rate on overnight deposits remained almost unchanged at 0.64%, while that on deposits with agreed maturity fell by 0.11 percentage point to 0.98%. The interest rate on deposits redeemable at notice remained at the March level of 1.95%. The overall interest rate on new deposits of **non-financial corporations** was the same as in the previous month, i.e. 0.56%. The interest rate on overnight deposits halted at 0.39%. The rate on deposits with agreed maturity of up to two years (which as a rule account for 100% of all deposits with agreed maturity in the case of this sector) was almost the same as in the previous month, 0.73%.

Interest rates on **new loans** to households recorded a fall in April, while rates on new loans to non-financial corporations rose slightly.

The overall interest rate on new loans to **households** declined by 0.52 percentage point to 13.98%. The interest rate on bank overdrafts recorded a more marked decline of 0.88 percentage point, to 17.57%, and the rate on consumer credit fell by 0.31 percentage point, to 14.42%. The interest rate on loans for house purchase decreased by 0.07 percentage point, to 5.29%. The rate on other loans was lower by 0.28 percentage point, standing at 6.22%.

The rate on new loans to **non-financial corporations** saw a rise of 0.09 percentage point to 4.16%. The interest rate on bank overdrafts increased by 0.15 percentage point to 4.56%. The rate on other loans of up to CZK 30 million recorded a decline of 0.38 percentage point, to 3.96%. The rate on other loans of over CZK 30 million was higher by 0.04 percentage point than in the previous month, i.e. 3.33%.

The overall APRC on loans to households decreased by 0.46 percentage point to 7.91%, and that on consumer credit recorded a fall of 0.17 percentage point to stand at 15.48%. The APRC on loans for house purchase decreased only slightly, by 0.08 percentage point to 5.52%.

Interest rates on outstanding amounts

The average interest rate on **outstanding amounts of deposits** of households and non-financial corporations was almost unchanged in April.

The interest rate on total deposits of **households** halted at 1.28%. The interest rate on overnight deposits was 0.64%. The interest rate on deposits redeemable at notice remained at the March level of 1.95%. The interest rate on deposits with agreed maturity also recorded no major change, stabilising at 1.97%.

The overall interest rate on total deposits of **non-financial corporations** was unchanged, remaining at 0.63%. The rate on overnight deposits halted at 0.39%. The interest rate on deposits with agreed maturity fell slightly to 0.98%.

The average interest rate on **outstanding amounts of loans** to households decreased only modestly, whereas the rate on loans to non-financial corporations increased slightly.

The overall interest rate on loans to **households** fell by 0.05 percentage point, to 6.97%. The rate on loans for house purchase recorded almost no change, remaining at 5.28%; the rate on consumer credit and other loans decreased by 0.15 percentage point to 11.17%.

The average interest rate on outstanding amounts of loans to **non-financial corporations** recorded a modest rise to 4.20%. The rate on loans to non-financial corporations for maturities of up to one year increased by 0.09 percentage point to 4.00%, that for maturities of over one year up to five years rose by 0.04 percentage point to 4.35% and that for maturities of over five years recorded almost no change, remaining at 4.28%.

¹⁾ Financial corporations engaged in lending - corporations classified within sector S.123 other financial intermediaries which are predominantly engaged in granting credit or loans or entering into agreements of similar nature, for example financial leasing, factoring, consumer credit, hire purchase, etc. (see Decree No. 307/2004 Coll.). Data are published by the last working day of the second month following the reference period.

Commentary on the aggregated balance sheet of collective investment funds (Table 12): March 2010

At the end of March 2010, collective investment funds (CIFs) administered assets worth CZK 101.7 billion. The value of assets administered by these funds thus continued increasing. The value of assets in funds rose by CZK 4.60 billion compared to February 2010, up by 4.73%. Compared to the same period a year earlier, the value of administered assets increased by 23.76%, which represents a rise of CZK 19.53 billion in funds' assets.

In March 2010, the largest growth was recorded by mixed funds, whose assets rose from CZK 36.7 billion to CZK 39.8 billion, i.e. a monthly increase of 8.50%. Growth in the value of assets was recorded also by equity funds (from CZK 16.8 billion to CZK 18.1 billion) and bond funds (from CZK 37.7 billion to CZK 38.8 billion). By contrast, mixed funds showed a decline. The value of their assets decreased from CZK 9.7 billion to CZK 9.3 billion, i.e. a monthly decline of 4.78%. In year-on-year comparison, the biggest increase in the volume of assets was recorded by equity funds. The value of assets administered by these funds increased by CZK 8.59 billion year on year, i.e. by 90.48%. Annual growth in the volume of assets was also recorded by real estate funds, bond funds and mixed funds.

Collective investment funds invested most in debt securities. Compared to the previous month, the total volume of purchased debt securities increased by CZK 1.07 billion to CZK 46.1 billion. However, the share of debt securities in funds' equity capital decreased compared to February 2010, from 46.38% to 45.34% (down by 1.04 percentage point). In year-on-year terms, funds increased their investment in debt securities by CZK 6.45 billion, or 16.26%. However, compared to March 2009, the share of purchased debt securities in funds' equity capital fell by 2.93 percentage points. Funds were increasing the share of equity securities in their portfolios in the course of last year. The volume of their equity securities rose by CZK 11.89 billion year on year, to CZK 40.8 billion, which represents an increase of 41.19%.

At the end of March 2010, 155 resident collective investment funds were active in the Czech Republic. Of this total, 28 funds were equity funds, 27 bond funds, 58 mixed funds, 41 real estate funds and 1 other fund.

Commentary on the quarterly aggregated balance sheet of FCL¹⁾ (Tables 13 and 14): March 2010

As of 31 March 2010, financial corporations engaged in lending had total assets of CZK 394.2 billion. Compared to the previous quarter, total assets decreased by CZK 11.3 billion, which represents a quarter-on-quarter decline of 2.74%. In year-on-year comparison they fell by CZK 46.5 billion. Financial leasing companies accounted for the largest share of total assets (CZK 275.8 billion). The contribution of other lending companies was CZK 98.4 billion and that of corporations engaged in factoring and forfaiting was CZK 20 billion.

The largest asset item was loans, which amounted to CZK 294.5 billion. Loans recorded a decrease of CZK 8.9 billion (2.93%) in 2010 Q1 compared to the previous period. The year-on-year decline in loans was CZK 57.5 billion, or 16.34%. Most loans (97.86%) were granted to resident entities. Short-term loans amounted to CZK 78.3 billion at the end of Q1 and accounted for 19.85% of total assets. Long-term loans amounted to CZK 216.3 billion, i.e. 54.86% of total assets.

The largest part of loans provided to residents consisted of loans to non-financial corporations, which amounted to CZK 166.8 billion, i.e. 57.89% of loans to residents. Loans provided to non-financial corporations dropped by CZK 1.8 billion quarter on quarter (down by 1.08%) and by CZK 25.8 billion year on year (down by 13.39%). CZK 146.5 billion was provided by financial leasing companies, CZK 4.9 billion by other lending companies and CZK 15.4 billion by factoring and forfaiting companies. These loans are made up predominantly of loans with an original maturity of one to five years, which amounted to CZK 95.9 billion.

Loans to households, which totalled CZK 120.5 billion, were the second largest group of loans to residents. They decreased by CZK 6 billion (or 4.73%) compared to the previous quarter. In year-on-year terms, the value of loans to households decreased by CZK 28.2 billion, i.e. 18.96%. These loans accounted for 41.81% of loans granted to residents. CZK 53.3 billion was provided by financial leasing companies and CZK 67.2 billion by other lending companies. Loans with an original maturity of one to five years amounted to CZK 69.3 billion, giving them the largest share in loans to households.

1) Under Decree No. 307/2004 Coll. financial corporations engaged in lending are companies whose main or major business activity involves providing credit or loans or entering into agreement of similar nature, e.g. financial leasing, factoring, consumer credit, hire-purchase financing, etc.

Glossary

Harmonisation of statistics: the Treaty establishing the European Community tasked the European Central Bank (ECB) with ensuring harmonised statistics according to Article 5 of the Statute of the European System of Central Banks. The national central banks of EC Member States therefore collect statistical information according to a uniform definition, from which the ECB then compiles aggregate data for euro area monetary policy. Although Council Regulation No 2533/98, which specifies the requirements for statistical data collection, only concerns euro area countries, the ECB also receives full data sets from the non-participating countries (e.g. the Czech Republic) in order to monitor their economic and financial development.

Monetary statistics: financial macrostatistics of sectors S.121, S.122 and S.123 based exclusively on the "host country" principle. According to this principle, a resident reporting unit is an institution resident in a given economic territory. The reporting population includes 1) institutions incorporated and located in the territory, including subsidiaries of parent companies located outside that territory, and 2) branches of institutions that have their head office outside that territory.

APRC: annual percentage rate of charge, i.e. the rate including interest expenses and all related costs of the credit to the client (fees etc.).

Collective investment funds: for the purposes of monetary and banking statistics, collective investment funds comprise unit trusts and investment funds other than money market funds which are resident in the Czech Republic. These are undertakings the sole object of which is collective investment, i.e. pooling investor funds and investing them under conditions stipulated in the Act on Collective Investment (No. 189/2004 Coll.). Such undertakings may be constituted under the Act either as unit trust managed by an investment company or as investment funds.

Consolidated balance sheet of the MFI sector: the basic statistical tool of monetary statistics. It is based on the residency principle and is obtained by netting out inter-MFI positions on their aggregated balance sheet.

Consumer credit: loans granted to households for personal use in the consumption of goods and services.

Contribution to annual growth rate: the growth rate of a selected component weighted by its share in the total growth rate.

Deposits redeemable at notice: deposits that can be withdrawn by clients only after the expiry of a period of notice agreed in advance, which starts at the moment of notification of the intention to withdraw the deposit.

Deposits with agreed maturity: deposits that cannot be withdrawn by clients before a predefined maturity.

Financial corporations engaged in lending (FCLs):

Definition: FCLs mean corporations classified within sector S.123 other financial intermediaries which are predominantly engaged in granting credit or loans or entering into agreements of similar nature, for example financial leasing, factoring, consumer credit, hire purchase, etc. (see Decree No. 307/2004 Coll.)

Type of services:

1. Financial leasing - It is financial service, when lessee acquires the right to use good in exchange for rental payment over predetermined term. All risk and rewards of ownership are transferred from lessor to lessee. After lapse of predetermined term ownership of good is transferred from lessor to lessee.
2. Factoring - It is financial service consisting in purchase of short-term receivables (with maturity 30-90 days) before their maturity date. Receivables are transferred on factoring company – factor- by supplier of goods or services.
3. Other lending - This category encompasses granting credit or loans or agreements of similar nature different from financial leasing and factoring. It deals especially with consumer credit, hire purchase, consumption loans, etc.

Growth rate: the percentage change in the monitored variable over the reference period, calculated from the volumes of monthly financial transactions and the outstanding amounts at the beginning of each month.

Household sector: institutional units included in the sectors of households (S.14) and non-profit institutions serving households (S.15) under ESA 95.

Glossary (cont'd)

Housing loans: Loans granted to households for the purpose of purchasing/investing in housing, including building and home improvements.

Interest rate fixation: a period of interest rate fixation, i.e. a period at the beginning of a contract for which the agreed interest rate cannot be changed. Period up to 1 year includes floating rates.

MFI longer-term financial liabilities: comprise deposits with an agreed maturity of over two years, deposits redeemable at a period of notice of over three months, debt securities issued with an original maturity of more than two years and the capital and reserves of the Czech MFI sector.

Monetary aggregates: comprise the monetary liabilities of monetary financial institutions to non-MFI Czech residents except central government. The narrow monetary aggregate M1 includes currency in circulation (excluding cash at banks' cash desks) and overnight deposits. The intermediate monetary aggregate M2 comprises M1, deposits redeemable at a period of notice of up to and including three months and deposits with a maturity of up to and including two years. The broad monetary aggregate M3 comprises M2, money market fund shares/units, debt securities with a maturity of up to two years and repurchase agreements.

Monetary financial institutions (MFIs): financial institutions forming the money-issuing sector. Under Community law, these include the central bank, resident credit institutions, and all other resident financial institutions whose business is to receive deposits and/or close substitutes for deposits from entities other than MFIs and, for their own account (at least in economic terms), to grant credit and/or invest in securities. In the Czech Republic, MFIs include the central bank, banks, money market funds and credit unions.

Money-holding sector: all residents institutional units except central government (S.1311) and monetary financial institutions (S.121 and S.122) under ESA 95.

Money-issuing sector: all institutional units included in the sectors of the central bank (S.121) and other monetary financial institutions (S.122) under ESA 95.

Money-neutral sector: an institutional sector comprising the central government sector (S.1311) under ESA 95.

Money market funds: MMFs are defined as those collective investment funds of which the units are, in terms of liquidity, close substitutes for deposits and which primarily invest in money market instruments and/or in MMF shares/units and/or in other transferable debt instruments with a residual maturity of up to and including one year, and/or in bank deposits, and/or which pursue a rate of return that approaches the interest rates of money market instruments. The criteria applied in order to identify MMFs shall be derived from the public prospectus as well as fund rules, instruments of incorporation, established statutes or by-laws, subscription documents or investment contracts, marketing documents, or any other statement with similar effects, of the collective investment undertaking.

Net external assets: comprise external assets of Czech MFIs (such as monetary gold, non-koruna banknotes, securities issued by non-residents and loans granted to non-residents) minus external liabilities of the Czech MFI sector (such as non-residents' holdings of deposits, repurchase agreements, money market fund shares and units, and debt securities with a maturity of up to and including two years issued by MFIs and held by non-residents).

Non-MFIs: all resident sectors excluding MFIs, i.e. general government (S.13), non-financial corporations (S.11), financial institutions other than MFIs (S.123, S.124 and S.125) and households and non-profit institutions serving households (S.14 and S.15) under ESA 95.

Other financial intermediaries (OFIs): entities included in the sectors of other financial intermediaries except insurance corporations and pension funds (S. 123), financial auxiliaries (S.124) and insurance corporations and pensions funds (S.125) under ESA 95.

Private sector: a sector comprising all institutional sectors except general government (S.13) and monetary financial institutions (S.121 and S.122) under ESA 95.

Glossary (cont'd)

Rates on new business: interest rates agreed by the bank and the client for all agreements negotiated during the reference period.

Rates on outstanding amounts: interest rates applied to end-of-period balances.

Reclassifications: comprise any changes in the MFI balance sheet resulting from changes in the reporting population, corporate restructuring, reclassifications of assets and liabilities, and corrections of reported errors.

Residents: all domestic and foreign legal entities and natural persons, including branches of foreign banks and foreign owners of buildings and land, whose centre of economic interest is in the given territory. Foreign legal entities and natural persons are considered residents after at least one year of economic activity in the territory, with the exception of foreign bank branches and owners of buildings and land, who become residents at the moment they perform a valid legal act (in the case of foreign owners of buildings and land, this only applies in connection with transactions relating to the building or land in question).

Transaction (flow) data: values related to the whole period which are calculated as the difference between the balances at the end of the current and the previous period adjusted for non-transaction effects, i.e. effects connected with reclassifications, valuation changes and exchange rate variations over the period. These factors result in breaks in time series, thereby affecting the comparability of end-of-period balances. Transaction (flow) data only reflect those changes that arise from transactions, i.e. from accepting financial assets or providing financial liabilities.

Unit trusts other than money market funds:

1. *Equity funds* – funds investing mainly in shares and other equity.
2. *Bond funds* – funds investing mainly in securities other than shares.
3. *Mixed funds* – funds investing in equity and debt securities without a clear preference for either approach.
4. *Real estate funds* – funds investing mainly in real estate.
5. *Hedge funds* – funds applying more or less unlimited investment strategies in order to achieve positive absolute yields, whose managers are remunerated based on the fund's performance in addition to their salary.
6. *Other funds* – collective investment funds other than equity funds, bond funds, mixed funds, real estate funds or hedge funds.

Funds of funds and funds of qualified investors are classified under the aforementioned categories according to their investment strategies.

Technical Notes

A. Calculation of growth rates

The growth rate for the reference period is calculated from the volumes of monthly financial transactions and the outstanding amounts at the beginning of each month. Monthly transactions are calculated from differences in outstanding amounts adjusted for reclassifications, other revaluations, exchange rate variations and other changes which do not arise from transactions. This data thus reflects only those changes that arise from accepting financial assets or providing financial liabilities. Reclassifications and other non-transaction corrections are introduced into the transaction statistics to preserve the comparability of the gradual monitoring results, thereby enabling calculation of the indices of expected outstanding balances of the monitored variables and determination of their growth rates.

Method of calculation

1. The month-on-month percentage change a_t^M for month t is calculated as:

$$(a) \quad a_t^M = \left(\frac{F_t^M}{L_{t-1}} \right) \times 100$$

2. The annual growth rate for month t , i.e. the change for the last 12 months ending with month t , is calculated as the product of the twelve coefficients for each previous month. The calculation of the annual growth rate from the month-on-month growth rates thus enables transaction changes and non-transaction effects in the individual months to be taken into account.

$$(b) \quad a_t = \left[\prod_{i=0}^{11} \left(1 + \frac{F_{t-i}^M}{L_{t-1-i}} \right) - 1 \right] \times 100$$

where

F_t^M - transactions in month t

$F_t^M = (L_t - L_{t-1}) - C_t^M - E_t^M - V_t^M$

and

L_t - outstanding amount at the end of month t

C_t^M - reclassifications in month t

E_t^M - exchange rate variations in month t

V_t^M - valuation changes in month t

Growth rates for other reference periods are derived from formula (b).

B. Calculation of the contribution to the annual growth rate of a monitored variable (e.g. M3)

If $a_t(M3)$ represents the annual growth rate of M3 for the year ending with month t , and $F_{t-i}(M1)$, $F_{t-i}(M2-M1)$, $F_{t-i}(M3-M2)$ are the monthly transactions of the components M1, M2-M1 and M3-M2 in month $t-i$, the contribution of M1 to the annual growth rate of M3, for example, is calculated as:

$$\frac{\sum_{i=0}^{11} F_{t-i}(M1)}{\sum_{i=0}^{11} [F_{t-i}(M1) + F_{t-i}(M2-M1) + F_{t-i}(M3-M2)]} \times a_t(M3)$$
