List of Annexes	

1) A comma (,) represents a decimal point delimiter; a blank between figures represents a thousand group delimiter.

2) The information in Tables 3-14 are based on monetary statistics of CNB harmonized with monetary statistics of European System of Central Banks. The data are not seasonally adjusted and the last period data are always preliminary. When processing data of monetary and banking statistics as of 30 September 2010, the revision was realized for the period from 31 December 2009 until 31 July 2010.

3) All the data quoted in this Publication are included in the ARAD time series system:

http://www.cnb.cz/cnb/STAT.ARADY_PKG.STROM_SESTAVY?p_strid=AAF&p_sestuid=&p_lang=EN

(Time series database ARAD >> Money and financial statistics >> Monetary statistics >> Monetary Statistics Publication).

Financial markets interest rates in CR (%)

COMMENTARY ON KEY INTEREST RATES (TABLE 1) AND FINANCIAL MARKET INTEREST RATES (TABLE 2): JANUARY 2011

Key interest rates

The CNB's 2W repo rate has been re-set at 0.75% since 7 May, 2010, the ECB's key interest rate has been re-set at 1.00% since 13 May, 2009. The difference between the CNB's and the ECB's key rates is therefore nowadays 0.25 percentage point.

Financial market interest rates

In January, interest rates on the Czech interbank deposit market did not change in effect, except for the CZEONIA rate, which increased by 0.20 pp. The similar development was recorded in interest rates on the euro area interbank deposit market, except for the EONIA rate, which increased by 0.16 pp. The 3M PRIBOR reached 1.20% in January (1.22% in December) and the 3M EURIBOR stood at 1.02% in January as well as in December.

Bond yields on the Czech capital market recorded insignificant changes in January, compared with the previous month (10Y by 0.09 pp at most). In contrast, the bond yields in the euro area increased markedly at shorter maturities (3Y by 0.19 pp at most), while the 10Y yield decreased. The yield on the 10Y bond in the Czech Republic was 3.98% (3.89% in December), while the yield on the 10-year bond in the euro area reached 3.94% (4.07% in December).

¹⁾ Monetary aggregates comprise monetary liabilities of MFIs vis-à-vis non-MFI Czech residents excluding central government. M1 is the sum of currency in circulation and overnight deposits; M2 is the sum of M1, deposits with an agreed maturity of up to two years and deposits redeemable at notice of up to three months; and M3 is the sum of M2, repurchase agreements, money market fund shares/units and debt securities up to two years.

²⁾ Including all resident sectors without general government (S.13) and MFIs sector (S.121 and S.122).

³⁾ Net foreign assets (NFA) represent balance of financial claims and liabilities of the MFI sector vis-a-vis nonresidents

⁴⁾ Net value of flow data calculated by adjusting the difference between end-of-period levels for the effect of non-transactions-related factors.

COMMENTARY ON MONETARY DEVELOPMENTS STATISTICS¹⁾ (TABLES 3-9): JANUARY 2011

After fluctuating around zero in the first half of 2010, the annual rate of growth of M3 has only been positive since June. In January, it increased to 0.8% from zero in December.

The month-on-month growth rate fell from 1.2% in December to -0.6% in January. As a result of financial transactions, M3 declined by CZK 15.9 billion month on month (but in year-on-year terms it rose by CZK 21.6 billion) to CZK 2,736.4 billion.

Main components of M3

Within the M3 structure, M1 is the most important component. Its contribution to annual M3 growth declined from 6.3 percentage points in December to 5.9 percentage points in January (see Table 7). Another significant M3 component, quasi money, remains negative.

The annual rate of growth of M1 increased from 7.8% in December to 8.5% in January. This change was chiefly due to an increase in the annual growth rate of overnight deposits (from 9.4% in December to 10.4% in January). Overnight deposits grew by CZK 7.0 billion (or 0.4%) month on month, owing to financial transactions. Within overnight deposits, the largest increase was recorded for deposits of insurance companies and pension funds (up by 99.9%, or CZK 6.8 billion). Increases were also recorded for deposits of other government (up by 17.1%, or CZK 18.9 billion), other financial intermediaries (up by 11.5%, or CZK 3.1 billion) and households (up by 1.6%, or CZK 16.1 billion). By contrast, deposits of non-financial corporations declined by 7.1%, or CZK 37.8 billion.

The annual growth rate of currency in circulation, which rose to 1.1% in December, fell by 0.4 percentage point in January, returning to the level observed in November (0.7%). In month-on-month terms, currency in circulation decreased by 0.4%, standing at CZK 356.2 billion.

Other short-term deposits (excluding overnight deposits) fell by CZK 22.3 billion (or 3.3%) month on month, owing to financial transactions. The annual rate of growth of these deposits remained at the same level as in December, i.e. -15.8%. The annual growth rate of deposits with maturity of up to two years, which are the slightly dominant component of short-term deposits, increased by 0.5 percentage point compared to the previous month, reaching -21.0%. The annual growth rate of deposits redeemable at notice of up to three months, which had previously been characterised by large annual increases, has been negative since December 2009 (-8.7% in January compared to -8.3 % in December).

As regards other short-term deposits, month-on-month declines were recorded for all components. The largest decline was recorded for deposits of insurance corporations and pension funds (down by 21.4%, or CZK 7.4 billion). Deposits of other financial intermediaries also fell (down by 10.1%, or CZK 2.0 billion), as did deposits of non-financial corporations (down by 5.4%, or CZK 8.0 billion), deposits of other government (down by 1.3%, or CZK 0.3 billion) and deposits of households (down by 1.0%, or CZK 4.7 billion).

Marketable instruments, which consist of repos, money market fund shares/units and debt securities with maturities of up to two years, rose by 1.5% month on month to CZK 52.7 billion (CZK 52.0 billion in December). The annual rate of growth of marketable instruments increased by 3.2 percentage points to -9.5% (-12.7 % in December).

Main counterparts of M3

The annual growth rate of loans to general government declined to -3.7% in January (-3.8% in December). The annual rate of growth of purchased government bonds increased from 10.8% in December to 15.2% in January.

The annual growth rate of loans to the private sector stood at 4.3% in January. As in previous months, the household sector was the largest contributor to the positive annual growth rate of loans to the private sector (see Table 8). The downward trend in this indicator is, however, offset by a rising annual rate of growth of the non-financial corporations sector. The continuing gradual decline in the annual growth rate of loans to households is counteracted by a steady rise in the annual growth rate of loans to non-financial corporations, which had been negative from mid-2009 but returned to positive territory in November 2010, reaching 2.5% in January. In month-on-month comparison, the annual growth rate of loans to households fell by 0.2 percentage point in January (7.1% in December, 6.9% in January).

The annual growth rate of net external assets declined to 2.1% at the end of January (from 2.4% in December). The annual growth rate of longer-term financial liabilities fell slightly, from 23.0% in December to 22.9% in January. The annual growth rate of deposits of central government rose to 3.4% in January (from 1.3% in December).

¹⁾ All increases and decreases referred to in this commentary relate only to financial transactions adjusted for non-transaction effects.

¹⁾ The interest rates that are applied by MFIs to CZK-denominated deposits and loans vis-à-vis households and non-financial corporations resident in the Czech Republic. New business refers to any new agreement between the customer and the MFI within given period.

²⁾ Including households (S.14) and non-profit institutions serving households (S.15) according to the classification of the economic sectors ESA95.

³⁾ Households deposits liabilities redeemable at notice include similar deposits of non-financial corporations of which volumes are negligible in this category.

⁴⁾ Including deposit liabilities redeemable at notice of non-financial corporations (which are also included in item 1.3).

⁵⁾ Bank overdrafts include provided bank overdrafts, debit balance on bank accounts and credit card credits.

⁶⁾ Since 2009, the amendment to Act No. 190/2004 Coll., on Bonds, as amended, has been fully applied, under which a mortgage loan is a loan whose redemption, including appurtenances (i.e. interest etc.), is secured by lien (right of pledge) over real estate (property), including property under construction, where the claim arising from the loan does not exceed twice the pledge value of the mortgaged property (Article 28(3)).

⁷⁾ The initial period of fixations is a predetermined period of time at the start of the contract during which the value of the interest rate cannot change. Period up to 1 year includes floating rates.

⁸⁾ Annual percentage rate of charge (APRC) covers total costs of the credit to the client including charges etc.

COMMENTARY ON INTEREST RATES OF MONETARY FINANCIAL INSTITUTIONS (TABLES 10 AND 11) – JANUARY 2011

Interest rates on new business

Interest rates on new deposits of households and non-financial corporations were little changed in January. At 1.07%, the average interest rate on total new deposits of households was broadly flat from the previous month. The rate on overnight deposits remained at the previous month's level (0.72%). The rate on deposits with agreed maturity recorded a slight increase of 0.09 percentage point to 0.98%. The rate on deposits redeemable at notice remained broadly unchanged at 2.04%.

The overall interest rate on new deposits of non-financial corporations recorded no major change, remaining at 0.41%. The rate on overnight deposits was also flat at 0.37%. The interest rate on deposits with an agreed maturity of up to two years (which as a rule account for 100% of all deposits with agreed maturity in this sector) increased slightly by 0.05 percentage point, to 0.54%.

The rate on new loans to households increased in January, but the rate on new loans to non-financial corporations recorded a decrease.

The overall interest rate on new loans to households rose by 0.57 percentage point, to 15.25%. The interest rate on bank overdrafts recorded a decline of 0.26 percentage point compared to December, halting at 18.42%. The interest rate on consumer credit increased by 0.27 percentage point, to 14.32%. The interest rate on loans for house purchase edged down by 0.02 percentage point, to 4.53%. The rate on other loans was higher by 0.18 percentage point, standing at 5.63%.

The rate on new loans to non-financial corporations declined by 0.16 percentage point, to 3.75%. The rate on bank overdrafts decreased by 0.16 percentage point, to 4.12%. The rate on other loans of up to CZK 30 million recorded a decline of 0.26 percentage point, to 3.82%. By contrast, the rate on other loans of over CZK 30 million declined by 0.64 percentage point, to 2.70%.

Interest rates on outstanding amounts

The average interest rate on outstanding amounts of deposits of households and non-financial corporations remained broadly unchanged in January.

The rate on total deposits of households was almost the same as in the previous month (1.21%). The rate on overnight deposits remained at 0.72%. The rate on deposits redeemable at notice was almost the same as in December (2.04%), while the rate with agreed maturity was also flat at 1.79%.

The interest rate on total deposits of non-financial corporations increased by 0.02 percentage point, to 0.49%. The rate on overnight deposits remained at 0.37%. The interest rate on deposits with agreed maturity recorded a slight increase of 0.06 percentage point to 0.87%.

The average interest rate on outstanding amounts of loans of households and non-financial corporations recorded only a slight change in January.

The overall interest rate on loans to households decreased by just 0.04 percentage point, to 6.96%. The rate on loans for house purchase recorded a slight decline of 0.02 percentage point to 5.18%. The interest rate on consumer credit and other loans was only 0.07 percentage point lower (11.35%).

The average interest rate on outstanding amounts of loans to non-financial corporations decreased by 0.02 percentage point to 4.02%. The rate on loans to non-financial corporations edged down for all maturities, to 3.68% for maturity of up to one year, 4.09% for maturity of over one year and up to five years, and 4.20% for maturity of over five years.

¹⁾ Financial corporations engaged in lending - corporations classified within sector S.123 other financial intermediaries which are predominantly engaged in granting credit or loans or entering into agreements of similar nature, for example financial leasing, factoring, consumer credit, hire purchase, etc. (see Decree No. 307/2004 Coll.).

Data are published by the last working day of the second month following the reference period.

COMMENTARY ON THE AGGREGATED BALANCE SHEET OF COLLECTIVE INVESTMENT FUNDS (TABLE 12): DECEMBER 2010

As of the end of December 2010, collective investment funds (CIFs) administered assets worth CZK 117.0 billion. The value of assets administered by these funds thus continued to increase. Compared to November 2010, the value of these assets rose by CZK 6.21 billion, an increase of 5.6%. Compared to the same period last year, this represents a rise of 21.80%, or CZK 20.93 billion.

The largest increase in the volume of assets in December 2010 was reported by real estate funds, whose assets rose from CZK 16.4 billion to CZK 17.9 billion, a monthly increase of 9.54%. The value of assets increased also in equity funds (from CZK 20.0 billion to CZK 21.2 billion), bond funds (from CZK 41.8 billion to CZK 44.3 billion) and mixed funds (from CZK 40.5 billion to CZK 41.4 billion). In year-on-year terms, the most pronounced growth in the value of assets was recorded for real estate funds. The value of assets administered by real estate funds increased by CZK 7.97 billion, or 79.98%, year on year. Annual growth in the volume of assets was recorded also by other categories of funds.

CIFs invested most in securities other than shares. Compared to the previous month, the total volume of purchased securities other than shares increased by CZK 2.24 billion to CZK 50.6 billion. However, the share of securities other than shares in the funds' net assets value decreased from 43.66% in November 2010 to 43.25%, down by 0.40 percentage points. In year-on-year terms, CIFs increased the volume of funds invested in securities other than shares by CZK 8.27 billion, a rise of 19.55%. Compared to December 2009, however, the share of purchased securities other than shares in the funds' net assets value decreased by 0.81 percentage points. The funds increased also the share of equity securities in their portfolios during last year. The volume of equity securities increased by CZK 8.59 billion year on year to CZK 48.3 billion, an increase of 21.62%.

As of the end of November 2010, 181 resident collective investment funds were active in the Czech Republic, of which 30 were equity funds, 28 bond funds, 64 mixed funds, 58 real estate funds and 1 other fund.

COMMENTARY ON THE AGGREGATED BALANCE SHEET OF FINANCIAL CORPORATIONS ENGAGED IN LENDING (TABLES 13 AND 14): DECEMBER 2010

As of 31 December 2010, financial corporations engaged in lending had total assets of CZK 363 billion. Compared to the previous quarter, their total assets increased only marginally, by CZK 0.2 billion. In year-on-year terms they fell by CZK 41.2 billion. This sizeable decline was due to a change in the legal structure of some of these entities as of 30 September 2010. A merger took place between a corporation classified as "Financial corporation engaged in lending – other lending" and a bank. From 30 September 2010, this corporation is no longer subject to the reporting duties of financial corporations engaged in lending. At the same time, part of the assets of this corporation was transferred to an affiliated financial corporation engaged in lending whose main object of business is financial leasing. Therefore a slight drop in total assets in the other lending sub-component was visible from 30 September 2010 (consisting mainly of loans provided), totalling roughly CZK 23 billion. At the same time, total assets in the financial leasing sub-component picked up by around CZK 8.5 billion in this context.

The largest asset item was loans provided, which amounted to CZK 267.3 billion. Compared to the previous period, loans recorded a decline of CZK 0.4 billion (i.e. 0.2%) in 2010 Q4. Loans fell by CZK 38.3 billion year on year, representing an annual decline of 12.5%.

The largest part of loans provided to residents consisted of loans to non-financial corporations amounting to CZK 181 billion, i.e. 68.9% of loans to residents. Compared to the previous quarter, loans to non-financial corporations fell only slightly, by CZK 0.1 billion. In year-on-year terms the value of loans provided to non-financial corporations rose by CZK 15.6 billion, i.e. 9.5%. However, this annual increase was also caused by non-transaction effects, namely reclassifications. The reporting entities reclassified loans provided totalling roughly CZK 24 billion. This volume of loans had been incorrectly reported as loans provided to households until 31 March 2010, which is also the cause of a marked year-on-year drop in these loans (see below).

The second largest category of loans to residents consisted of loans to households, totalling CZK 81.2 billion. They were down by CZK 0.2 billion compared to the previous quarter. In year-on-year terms, loans provided to households fell by CZK 44 billion, i.e. 35.2%. These loans account for 30.9% of loans granted to residents.

GLOSSARY

Harmonisation of statistics: the Treaty establishing the European Community tasked the European Central Bank (ECB) with ensuring harmonised statistics according to Article 5 of the Statute of the European System of Central Banks. The national central banks of EC Member States therefore collect statistical information according to a uniform definition, from which the ECB then compiles aggregate data for euro area monetary policy. Although Council Regulation No 2533/98, which specifies the requirements for statistical data collection, only concerns euro area countries, the ECB also receives full data sets from the non-participating countries (e.g. the Czech Republic) in order to monitor their economic and financial development.

Monetary statistics: financial macrostatistics of sectors S.121, S.122 and S.123 based exclusively on the “host country” principle. According to this principle, a resident reporting unit is an institution resident in a given economic territory. The reporting population includes 1) institutions incorporated and located in the territory, including subsidiaries of parent companies located outside that territory, and 2) branches of institutions that have their head office outside that territory.

APRC: annual percentage rate of charge, i.e. the rate including interest expenses and all related costs of the credit to the client (fees etc.).

Collective investment funds: for the purposes of monetary and banking statistics, collective investment funds comprise unit trusts and investment funds other than money market funds which are resident in the Czech Republic. These are undertakings the sole object of which is collective investment, i.e. pooling investor funds and investing them under conditions stipulated in the Act on Collective Investment (No. 189/2004 Coll.). Such undertakings may be constituted under the Act either as unit trust managed by an investment company or as investment funds.

Consolidated balance sheet of the MFI sector: the basic statistical tool of monetary statistics. It is based on the residency principle and is obtained by netting out inter-MFI positions on their aggregated balance sheet.

Consumer credit: loans granted to households for personal use in the consumption of goods and services.

Contribution to annual growth rate: the growth rate of a selected component weighted by its share in the total growth rate.

Deposits redeemable at notice: deposits that can be withdrawn by clients only after the expiry of a period of notice agreed in advance, which starts at the moment of notification of the intention to withdraw the deposit.

Deposits with agreed maturity: deposits that cannot be withdrawn by clients before a predefined maturity.

Financial corporations engaged in lending (FCLs):

Definition: FCLs mean corporations classified within sector S.123 other financial intermediaries which are predominantly engaged in granting credit or loans or entering into agreements of similar nature, for example financial leasing, factoring, consumer credit, hire purchase, etc. (see Decree No. 307/2004 Coll.)

Type of services:

1. Financial leasing - It is financial service, when lessee acquires the right to use good in exchange for rental payment over predetermined term. All risk and rewards of ownership are transferred from lessor to lessee. After lapse of predetermined term ownership of good is transferred from lessor to lessee.

2. Factoring - It is financial service consisting in purchase of short-term receivables (with maturity 30-90 days) before their maturity date. Receivables are transferred on factoring company – factor- by supplier of goods or services.

3. Other lending - This category encompasses granting credit or loans or agreements of similar nature different from financial leasing and factoring. It deals especially with consumer credit, hire purchase, consumption loans, etc.

Growth rate: the percentage change in the monitored variable over the reference period, calculated from the volumes of monthly financial transactions and the outstanding amounts at the beginning of each month.

Household sector: institutional units included in the sectors of households (S.14) and non-profit institutions serving households (S.15) under ESA 95.

Housing loans: Loans granted to households for the purpose of purchasing/investing in housing, including building and home improvements.

Interest rate fixation: a period of interest rate fixation, i.e. a period at the beginning of a contract for which the agreed interest rate cannot be changed. Period up to 1 year includes floating rates.

MFI longer-term financial liabilities: comprise deposits with an agreed maturity of over two years, deposits redeemable at a period of notice of over three months, debt securities issued with an original maturity of more than two years and the capital and reserves of the Czech MFI sector.

Monetary aggregates: comprise the monetary liabilities of monetary financial institutions to non-MFI Czech residents except central government. The narrow monetary aggregate M1 includes currency in circulation (excluding cash at banks' cash desks) and overnight deposits. The intermediate monetary aggregate M2 comprises M1, deposits redeemable at a period of notice of up to and including three months and deposits with a maturity of up to and including two years. The broad monetary aggregate M3 comprises M2, money market fund shares/units, debt securities with a maturity of up to two years and repurchase agreements.

Monetary financial institutions (MFIs): financial institutions forming the money-issuing sector. Under Community law, these include the central bank, resident credit institutions, and all other resident financial institutions whose business is to receive deposits and/or close substitutes for deposits from entities other than MFIs and, for their own account (at least in economic terms), to grant credit and/or invest in securities. In the Czech Republic, MFIs include the central bank, banks, money market funds and credit unions.

Money-holding sector: all residents institutional units except central government (S.1311) and monetary financial institutions (S.121 and S.122) under ESA 95.

Money-issuing sector: all institutional units included in the sectors of the central bank (S.121) and other monetary financial institutions (S.122) under ESA 95.

Money-neutral sector: an institutional sector comprising the central government sector (S.1311) under ESA 95.

Money market funds: MMFs are defined as those collective investment funds of which the units are, in terms of liquidity, close substitutes for deposits and which primarily invest in money market instruments and/or in MMF shares/units and/or in other transferable debt instruments with a residual maturity of up to and including one year, and/or in bank deposits, and/or which pursue a rate of return that approaches the interest rates of money market instruments. The criteria applied in order to identify MMFs shall be derived from the public prospectus as well as fund rules, instruments of incorporation, established statutes or by-laws, subscription documents or investment contracts, marketing documents, or any other statement with similar effects, of the collective investment undertaking.

Net external assets: comprise external assets of Czech MFIs (such as monetary gold, non-koruna banknotes, securities issued by non-residents and loans granted to non-residents) minus external liabilities of the Czech MFI sector (such as non-residents' holdings of deposits, repurchase agreements, money market fund shares and units, and debt securities with a maturity of up to and including two years issued by MFIs and held by non-residents).

Non-MFIs: all resident sectors excluding MFIs, i.e. general government (S.13), non-financial corporations (S.11), financial institutions other than MFIs (S.123, S.124 and S.125) and households and non-profit institutions serving households (S.14 and S.15) under ESA 95.

Other financial intermediaries (OFIs): entities included in the sectors of other financial intermediaries except insurance corporations and pension funds (S. 123), financial auxiliaries (S.124) and insurance corporations and pensions funds (S.125) under ESA 95.

Private sector: a sector comprising all institutional sectors except general government (S.13) and monetary financial institutions (S.121 and S.122) under ESA 95.

Rates on new business: interest rates agreed by the bank and the client for all agreements negotiated during the reference period.

Rates on outstanding amounts: interest rates applied to end-of-period balances.

Reclassifications: comprise any changes in the MFI balance sheet resulting from changes in the reporting population, corporate restructuring, reclassifications of assets and liabilities, and corrections of reported errors.

Residents: all domestic and foreign legal entities and natural persons, including branches of foreign banks and foreign owners of buildings and land, whose centre of economic interest is in the given territory. Foreign legal entities and natural persons are considered residents after at least one year of economic activity in the territory, with the exception of foreign bank branches and owners of buildings and land, who become residents at the moment they perform a valid legal act (in the case of foreign owners of buildings and land, this only applies in connection with transactions relating to the building or land in question).

Transaction (flow) data: values related to the whole period which are calculated as the difference between the balances at the end of the current and the previous period adjusted for non-transaction effects, i.e. effects connected with reclassifications, valuation changes and exchange rate variations over the period. These factors result in breaks in time series, thereby affecting the comparability of end-of-period balances. Transaction (flow) data only reflect those changes that arise from transactions, i.e. from accepting financial assets or providing financial liabilities.

Unit trusts other than money market funds:

1. Equity funds – funds investing mainly in shares and other equity.
2. Bond funds – funds investing mainly in securities other than shares.
3. Mixed funds – funds investing in equity and debt securities without a clear preference for either approach.
4. Real estate funds – funds investing mainly in real estate.
5. Hedge funds – funds applying more or less unlimited investment strategies in order to achieve positive absolute yields, whose managers are remunerated based on the fund's performance in addition to their salary.
6. Other funds – collective investment funds other than equity funds, bond funds, mixed funds, real estate funds or hedge funds.

Funds of funds and funds of qualified investors are classified under the aforementioned categories according to their investment strategies.

TECHNICAL NOTES

A. Calculation of growth rates

The growth rate for the reference period is calculated from the volumes of monthly financial transactions and the outstanding amounts at the beginning of each month. Monthly transactions are calculated from differences in outstanding amounts adjusted for reclassifications, other revaluations, exchange rate variations and other changes which do not arise from transactions. This data thus reflects only those changes that arise from accepting financial assets or providing financial liabilities. Reclassifications and other non-transaction corrections are introduced into the transaction statistics to preserve the comparability of the gradual monitoring results, thereby enabling calculation of the indices of expected outstanding balances of the monitored variables and determination of their growth rates.

Method of calculation

1. The month-on-month percentage change a_t^M for month t is calculated as:

$$(a) \quad a_t^M = \left(\frac{F_t^M}{L_{t-1}} \right) \times 100$$

2. The annual growth rate for month t , i.e. the change for the last 12 months ending with month t , is calculated as the product of the twelve coefficients for each previous month. The calculation of the annual growth rate from the month-on-month growth rates thus enables transaction changes and non-transaction effects in the individual months to be taken into account.

$$(b) \quad a_t = \left[\prod_{i=0}^{11} \left(1 + \frac{F_{t-i}^M}{L_{t-1-i}} \right) - 1 \right] \times 100,$$

where

F_t^M - transactions in month t

$F_t^M = (L_t - L_{t-1}) - C_t^M - E_t^M - V_t^M$

and

L_t - outstanding amount at the end of month t

C_t^M - reclassifications in month t

E_t^M - exchange rate variations in month t

V_t^M - valuation changes in month t

Growth rates for other reference periods are derived from formula (b).

B. Calculation of the contribution to the annual growth rate of a monitored variable (e.g. M3)

If $a_t(M3)$ represents the annual growth rate of M3 for the year ending with month t , and $F_{t-i}(M1)$, $F_{t-i}(M2-M1)$, $F_{t-i}(M3-M2)$ are the monthly transactions of the components M1, M2-M1 and M3-M2 in month $t-i$, the contribution of M1 to the annual growth rate of M3, for example, is calculated as:

$$\frac{\sum_{i=0}^{11} F_{t-i}(M1)}{\sum_{i=0}^{11} [F_{t-i}(M1) + F_{t-i}(M2-M1) + F_{t-i}(M3-M2)]} \times a_t(M3)$$
