Financial markets interest rates in CR (%)

COMMENTARY ON KEY INTEREST RATES (TABLE 1) AND FINANCIAL MARKET INTEREST RATES (TABLE 2): MAY 2011

Key interest rates

The CNB's 2W repo rate has been re-set at 0.75% since 7 May, 2010, the ECB's key interest rate has been re-set at 1.25% since 13 April, 2011. The difference between the CNB's and the ECB's key rates is therefore nowadays 0.50 percentage point (pp).

Financial market interest rates

In May, interest rates on the Czech interbank deposit market did not change in effect, except for the CZEONIA rate which increased insignificantly by 0.06 pp. On the other hand the interest rates on the euro area interbank deposit market increased. The most growth (by 0.12 pp) recorded the 1M EURIBOR. The 3M PRIBOR reached 1.22% in May (1.21 in April) and the 3M EURIBOR stood at 1.43% (1.32% in April).

Bond yields on the Czech capital market decreased in May (the 3Y maturity bond by 0.30 pp at most). Bond yields in the euro area recorded the continuous growth trend within the 3Y maturity (by 0.38 pp), yields of euro bonds with longer maturity decreased. The yield on the 10Y bond in the Czech Republic was 3.89% in May (4.05% in April) while the yield on the 10-year bond in the euro area reached 4.37% (4.66% in April).

¹⁾ Monetary aggregates comprise monetary liabilities of MFIs vis-à-vis non-MFI Czech residents excluding central government. M1 is the sum of currency in circulation and overnight deposits; M2 is the sum of M1, deposits with an agreed maturity of up to two years and deposits redeemable at notice of up to three months; and M3 is the sum of M2, repurchase agreements, money market fund shares/units and debt securities up to two years.

²⁾ Including all resident sectors without general government (S.13) and MFIs sector (S.121 and S. 122).

³⁾ Net foreign assets (NFA) represent balance of financial claims and liabilities of the MFI sector vis-a-vis nonresidents.

⁴⁾ Net value of flow data calculated by adjusting the difference between end-of-period levels for the effect of non-transactions-related factors.

COMMENTARY ON MONETARY DEVELOPMENTS STATISTICS¹⁾ (TABLES 3-9): MAY 2011

The evolution of the annual rate of growth of M3 has been relatively unstable since the start of last year, characterised by fluctuations around zero without evidence of a clear-cut trend. The growth rate stood at 0.5% in May.

As a result of financial transactions, M3 rose by CZK 8.3 billion month on month (by CZK 13.2 billion year on year) to CZK 2,767.5 billion.

Main components of M3

This evolution of M3 is due to changes in contributions of two key M3 components – overnight deposits and other short-term deposits. The contribution of overnight deposits was 4.3 percentage points and that of other short-term deposits was -3.7 percentage points in May (see Table 7).

The annual growth rate of M1 declined to 6.4% in May (from 7.6% in April), owing to a decrease in the annual growth rate of overnight deposits from 8.9% in April to 7.4% in May. In month-on-month terms, overnight deposits grew by CZK 23.7 billion (or 1.4%), owing to financial transactions. Overnight deposits picked up in almost all economic sectors. The biggest rise was recorded for deposits of insurance corporations and pension funds (up by 84.6%, or CZK 6.7 billion). Increases were also recorded for deposits of other financial intermediaries (up by 5.0%, or CZK 1.4 billion), non-financial corporations (up by 3.5%, or CZK 16.9 billion) and households (up by 0.3%, or CZK 3.0 billion). By contrast, deposits of other government declined by 3.3%, or CZK 4.4 billion.

The annual rate of growth of currency in circulation fell from 2.4% in April to 1.8% in May. In month-on-month terms, currency in circulation decreased by 0.3%, standing at CZK 360.6 billion.

Other short-term deposits (excluding overnight deposits) fell by CZK 11.7 billion (or 1.8%) month on month, owing to financial transactions. The annual rate of growth of these deposits rose from -17.0% in April to -13.5% in May. The annual growth rate of deposits with maturity of up to two years, which are the slightly dominant component of short-term deposits, fell by 6.0 percentage points compared to the previous month, reaching -17.5%. The annual rate of growth of deposits redeemable at notice of up to 3 months edged up from -8.3% in April to -8.0% in May.

Within other short-term deposits, the biggest month-on-month decrease was recorded for deposits of insurance corporations and pension funds (down by 22.9%, or CZK 8.5 billion). Decreases were also recorded for deposits of other financial intermediaries (down by 8.4%, or CZK 1.5 billion), other government (down by 7.4%, or CZK 1.7 billion) and households (down by 0.6%, or CZK 2.8 billion). By contrast, deposits of non-financial corporations were up by 2.1%, or CZK 2.9 billion.

Marketable instruments, which consist of repos, money market fund shares/units and debt securities with maturities of up to two years, declined by 5.1% month on month to CZK 48.4 billion (CZK 50.8 billion in April). The annual rate of growth of marketable instruments increased by 9.3 percentage points to -16.6% (-25.9% in April).

Main counterparts of M3

The annual rate of growth of loans to the private sector, which are the most important counterpart of M3, was 6.2% in May. This indicator shows opposite developments in its major components, i.e. the annual growth rate of loans to households and the annual growth rate of loans to non-financial corporations. The annual growth rate of loans to households has been positive and constantly falling, reaching 6.4% in May, whereas the annual growth rate of loans to non-financial corporations had been negative since mid-2009 but started to show a gradual upward trend in the last eleven months. It has even been positive since November 2010, standing at 7.3% in May.

The annual growth rate of loans provided to general government and purchased securities fell from 13.6% in April to 12.1% in May.

The annual growth rate of net external assets increased to -8.3% at the end of May (from -10.3% in April). The annual growth rate of longer-term financial liabilities fell from 20.9% in April to 19.9% in May. The annual growth rate of deposits of central government declined to 5.4% in May (from 8.2% in April).

¹⁾ All increases and decreases referred to in this commentary relate only to financial transactions adjusted for non-transaction effects.

¹⁾ The interest rates that are applied by MFIs to CZK-denominated deposits and loans vis-à-vis households and non-financial corporations resident in the Czech Republic. New business refers to any new agreement between the customer and the MFI within given period.

²⁾ Including households (S.14) and non-profit institutions serving households (S.15) according to the classification of the economic sectors ESA95.

³⁾ Households deposits liabilities redeemable at notice include similar deposits of non-financial corporations of which volumes are negligible in this category.

⁴⁾ Including deposit liabilities redeemable at notice of non-financial corporations (which are also included in item 1.3).

⁵⁾ Bank overdrafts include provided bank overdrafts, debit balance on bank accounts and credit card credits.

⁶⁾ Since 2009, the amendment to Act No. 190/2004 Coll., on Bonds, as amended, has been fully applied, under which a mortgage loan is a loan whose redemption, including appurtenances (i.e. interest etc.), is secured by lien (right of pledge) over real estate (property), including property under construction, where the claim arising from the loan does not exceed twice the pledge value of the mortgaged property (Article 28(3)).

⁷⁾ The initial period of fixations is a predetermined period of time at the start of the contract during which the value of the interest rate cannot change. Period up to 1 year includes floating rates.

⁸⁾ Annual percentage rate of charge (APRC) covers total costs of the credit to the client including charges etc.

COMMENTARY ON INTEREST RATES OF MONETARY FINANCIAL INSTITUTIONS (TABLES 10 AND 11) – MAY 2011

Interest rates on new business

Interest rates on new deposits of households and non-financial corporations were little changed in May.

At 1.04%, the average interest rate on total new deposits of households was the same as in April. The rate on overnight deposits was also almost unchanged, rising marginally to 0.71%. The rate on deposits with agreed maturity increased by 0.10 percentage point to 1.13% and the rate on deposits redeemable at notice was flat (at 2.05%).

The overall interest rate on new deposits of non-financial corporations recorded a negligible decline compared to the previous month, reaching 0.42%. The rate on overnight deposits was also broadly unchanged, down by only 0.02 percentage point to 0.37%. The rate on deposits with agreed maturity of up to two years (which as a rule account for 100% of all deposits with agreed maturity in this sector) saw a slight increase of 0.04 percentage point, to 0.59%.

Overall interest rates on new loans to households decreased in May, whereas those on loans to non-financial corporations were almost the same.

The rate on new loans to households fell by 0.54 percentage point, standing at 13.78%. The interest rate on bank overdrafts was unchanged at 18.37%. The interest rate on consumer credit fell by 0.11 percentage point to 13.83% and that on loans for house purchase declined slightly, by 0.06 percentage point to 4.43%. The rate on other loans fell by 0.25 percentage point, standing at 5.30%.

The rate on new loans to non-financial corporations was virtually unchanged at 3.66%. The rate on bank overdrafts also showed just a slight growth, to 3.98%. The rate on other loans of up to CZK 30 million recorded a decline of 0.49 percentage point, to 3.71%. By contrast, the rate on other loans of over CZK 30 million was 0.50 percentage point higher, standing at 2.85%.

Interest rates on outstanding amounts

The average interest rate on outstanding amounts of deposits of households and non-financial corporations remained broadly unchanged in May.

Total deposits of households were remunerated at 1.20%. The rate on overnight deposits was almost the same as in the previous period (0.71%), the rate on deposits redeemable at notice was flat at 2.05% and the rate on deposits with agreed maturity showed no major changes, standing at 1.82%.

Total deposits of non-financial corporations were remunerated at 0.51%. The rate on overnight deposits was almost unchanged from April (0.37%) and the rate on deposits with agreed maturity rose only slightly, to 0.96%.

The average interest rates on outstanding amounts of loans to households and non-financial corporations also recorded only a minor change in May.

The overall interest rate on loans to households fell by 0.02 percentage point to 6.88%. The rate on loans for house purchase decreased by 0.02 percentage point to 5.11% and the rate on consumer credit and other loans recorded a slight decline to 11.26%.

The average interest rate on outstanding amounts of loans to non-financial corporations fell slightly, to 3.98%. The rate on loans with maturity of up to one year edged down to 3.62% and that on loans with maturity of 1–5 years fell to 4.04%. The rate on loans with maturity of over five years was the same as in April (4.19%).

Data are published by the last working day of the second month following the reference period.

COMMENTARY ON THE AGGREGATED BALANCE SHEET OF COLLECTIVE INVESTMENT FUNDS (TABLE 12): APRIL 2011

Net assets value: The net assets value of collective investment funds (CIFs) was CZK 121.0 billion at the end of April. This represents an increase of CZK 0.8 billion compared to March. This increase was chiefly due to transactions. Compared to the same period last year, the net assets value rose by 17.3%, or CZK 17.9 billion. The biggest month-on-month increase in the net assets value was recorded for mixed funds, up by CZK 0.5 billion to CZK 38.8 billion. In this case, too, the increase was due above all to transactions.

Investment in bonds: The value of bond holdings was CZK 50.2 billion in April. Compared to the previous month, the total volume of bonds edged up by CZK 0.1 billion (monthly transactions accounted for CZK +0.2 billion). However, the proportion of securities other than shares in the funds' net assets value decreased compared to March, down by 0.2 percentage point to 41.5%.

Investment in equity securities: The volume of equity securities in the funds' portfolio declined in April. As of the end of the month, the value of holdings of equity securities amounted to CZK 48.3 billion, of which CZK 19.0 billion was investment in collective investment funds (including money market funds) and CZK 29.3 billion was investment in shares and other equity. The value of equity securities decreased by CZK 0.9 billion compared to March (monthly transactions accounted for CZK -0.3 billion). The share of equity securities in the funds' net assets value also declined from 40.9% in the previous month to 39.9%.

Reporting population: In April 2011, 188 resident collective investment funds were active in the Czech Republic, of which 31 were equity funds, 27 bond funds, 65 mixed funds, 63 real estate funds and 2 other funds. Three new collective investment funds were established during the period under review.

COMMENTARY ON THE AGGREGATED BALANCE SHEET OF FINANCIAL CORPORATIONS ENGAGED IN LENDING (TABLES 13 AND 14): MARCH 2011

As of 31 March 2011, financial corporations engaged in lending had total assets of CZK 344.6 billion, down by CZK 7.8 billion compared to the previous quarter. In year-on-year terms they fell by CZK 40.3 billion. This sizeable decline was mainly due to a change in the legal structure of some of these entities as of 30 September 2010. A merger took place between a corporation classified as "Financial corporation engaged in lending – other lending" and a bank. From 30 September 2010, this corporation is no longer subject to the reporting duties of financial corporations engaged in lending. At the same time, part of the assets of this corporation was transferred to an affiliated financial corporation engaged in lending whose main object of business is financial leasing. Therefore a slight drop in total assets in the other lending sub-component was visible from 30 September 2010 (consisting mainly of loans provided), totalling roughly CZK 23 billion. At the same time, total assets in the financial leasing sub-component picked up by around CZK 8.5 billion in this context.

The largest asset item was loans provided, which amounted to CZK 257.2 billion. Compared to the previous period, loans recorded a decline of CZK 3.6 billion (i.e. 1.4%) in 2011 Q1. Loans fell by CZK 30.3 billion year on year, representing an annual decline of 10.6%.

The largest part of loans provided to residents consisted of loans to non-financial corporations amounting to CZK 173.4 billion, i.e. 68.4% of loans to residents. Compared to the previous quarter, loans to non-financial corporations fell by CZK 3.3 billion. In year-on-year terms the value of loans provided to non-financial corporations rose by CZK 9.6 billion, i.e. 5.9%. However, this annual increase was also caused by non-transaction effects, namely reclassifications. The reporting entities reclassified loans provided totalling roughly CZK 24 billion. This volume of loans had been incorrectly reported as loans provided to households until 31 March 2010, which is also the cause of a marked year-on-year drop in these loans (see below).

The second largest category of loans to residents consisted of loans to households, totalling CZK 78.4 billion. They were down by CZK 0.6 billion compared to the previous quarter. In year-on-year terms, loans provided to households fell by CZK 38.3 billion, i.e. 32.8%. These loans account for 31.4% of loans granted to residents.

GLOSSARY

Harmonisation of statistics: the Treaty establishing the European Community tasked the European Central Bank (ECB) with ensuring harmonised statistics according to Article 5 of the Statute of the European System of Central Banks. The national central banks of EC Member States therefore collect statistical information according to a uniform definition, from which the ECB then compiles aggregate data for euro area monetary policy. Although Council Regulation No 2533/98, which specifies the requirements for statistical data collection, only concerns euro area countries, the ECB also receives full data sets from the non-participating countries (e.g. the Czech Republic) in order to monitor their economic and financial development.

Monetary statistics: financial macrostatistics of sectors S.121, S.122 and S.123 based exclusively on the "host country" principle. According to this principle, a resident reporting unit is an institution resident in a given economic territory. The reporting population includes 1) institutions incorporated and located in the territory, including subsidiaries of parent companies located outside that territory, and 2) branches of institutions that have their head office outside that territory.

APRC: annual percentage rate of charge, i.e. the rate including interest expenses and all related costs of the credit to the client (fees etc.).

Collective investment funds: for the purposes of monetary and banking statistics, collective investment funds comprise unit trusts and investment funds other than money market funds which are resident in the Czech Republic. These are undertakings the sole object of which is collective investment, i.e. pooling investor funds and investing them under conditions stipulated in the Act on Collective Investment (No. 189/2004 Coll.). Such undertakings may be constituted under the Act either as unit trust managed by an investment company or as investment funds.

Consolidated balance sheet of the MFI sector: the basic statistical tool of monetary statistics. It is based on the residency principle and is obtained by netting out inter-MFI positions on their aggregated balance sheet.

Consumer credit: loans granted to households for personal use in the consumption of goods and services.

Contribution to annual growth rate: the growth rate of a selected component weighted by its share in the total growth rate.

Deposits redeemable at notice: deposits that can be withdrawn by clients only after the expiry of a period of notice agreed in advance, which starts at the moment of notification of the intention to withdraw the deposit.

Deposits with agreed maturity: deposits that cannot be withdrawn by clients before a predefined maturity.

Financial corporations engaged in lending (FCLs):

Definition: FCLs mean corporations classified within sector S.123 other financial intermediaries which are predominantly engaged in granting credit or loans or entering into agreements of similar nature, for example financial leasing, factoring, consumer credit, hire purchase, etc. (see Decree No. 307/2004 Coll.)

Type of services:

1. Financial leasing - It is financial service, when lessee acquires the right to use good in exchange for rental payment over predetermined term. All risk and rewards of ownership are transferred from lessor to lessee. After lapse of predetermined term ownership of good is transferred from lessor to lessee.

2. Factoring - It is financial service consisting in purchase of short-term receivables (with maturity 30-90 days) before their maturity date. Receivables are transferred on factoring company – factor- by supplier of goods or services.

3. Other lending - This category encompasses granting credit or loans or agreements of similar nature different from financial leasing and factoring. It deals especially with consumer credit, hire purchase, consumption loans, etc.

Growth rate: the percentage change in the monitored variable over the reference period, calculated from the volumes of monthly financial transactions and the outstanding amounts at the beginning of each month.

Household sector: institutional units included in the sectors of households (S.14) and non-profit institutions serving households (S.15) under ESA 95.

Housing loans: Loans granted to households for the purpose of purchasing/investing in housing, including building and home improvements.

Interest rate fixation: a period of interest rate fixation, i.e. a period at the beginning of a contract for which the agreed interest rate cannot be changed. Period up to 1 year includes floating rates.

MFI longer-term financial liabilities: comprise deposits with an agreed maturity of over two years, deposits redeemable at a period of notice of over three months, debt securities issued with an original maturity of more than two years and the capital and reserves of the Czech MFI sector.

Monetary aggregates: comprise the monetary liabilities of monetary financial institutions to non-MFI Czech residents except central government. The narrow monetary aggregate M1 includes currency in circulation (excluding cash at banks' cash desks) and overnight deposits. The intermediate monetary aggregate M2 comprises M1, deposits redeemable at a period of notice of up to and including three months and deposits with a maturity of up to and including two years. The broad monetary aggregate M3 comprises M2, money market fund shares/units, debt securities with a maturity of up to two years and repurchase agreements.

Monetary financial institutions (MFIs): financial institutions forming the money-issuing sector. Under Community law, these include the central bank, resident credit institutions, and all other resident financial institutions whose business is to receive deposits and/or close substitutes for deposits from entities other than MFIs and, for their own account (at least in economic terms), to grant credit and/or invest in securities. In the Czech Republic, MFIs include the central bank, banks, money market funds and credit unions.

Money-holding sector: all residents institutional units except central government (S.1311) and monetary financial institutions (S.121 and S.122) under ESA 95.

Money-issuing sector: all institutional units included in the sectors of the central bank (S.121) and other monetary financial institutions (S.122) under ESA 95.

Money-neutral sector: an institutional sector comprising the central government sector (S.1311) under ESA 95.

Money market funds: MMFs are defined as those collective investment funds of which the units are, in terms of liquidity, close substitutes for deposits and which primarily invest in money market instruments and/or in MMF shares/units and/or in other transferable debt instruments with a residual maturity of up to and including one year, and/or in bank deposits, and/or which pursue a rate of return that approaches the interest rates of money market instruments. The criteria applied in order to identify MMFs shall be derived from the public prospectus as well as fund rules, instruments of incorporation, established statutes or by-laws, subscription documents or investment contracts, marketing documents, or any other statement with similar effects, of the collective investment undertaking.

Net external assets: comprise external assets of Czech MFIs (such as monetary gold, non-koruna banknotes, securities issued by non-residents and loans granted to non-residents) minus external liabilities of the Czech MFI sector (such as non-residents' holdings of deposits, repurchase agreements, money market fund shares and units, and debt securities with a maturity of up to and including two years issued by MFIs and held by non-residents).

Non-MFIs: all resident sectors excluding MFIs, i.e. general government (S.13), non-financial corporations (S.11), financial institutions other than MFIs (S.123, S.124 and S.125) and households and non-profit institutions serving households (S.14 and S.15) under ESA 95.

Other financial intermediaries (OFIs): entities included in the sectors of other financial intermediaries except insurance corporations and pension funds (S. 123), financial auxiliaries (S.124) and insurance corporations and pensions funds (S.125) under ESA 95.

Private sector: a sector comprising all institutional sectors except general government (S.13) and monetary financial institutions (S.121 and S.122) under ESA 95.

Rates on new business: interest rates agreed by the bank and the client for all agreements negotiated during the reference period.

Rates on outstanding amounts: interest rates applied to end-of-period balances.

Reclassifications: comprise any changes in the MFI balance sheet resulting from changes in the reporting population, corporate restructuring, reclassifications of assets and liabilities, and corrections of reported errors.

Residents: all domestic and foreign legal entities and natural persons, including branches of foreign banks and foreign owners of buildings and land, whose centre of economic interest is in the given territory. Foreign legal entities and natural persons are considered residents after at least one year of economic activity in the territory, with the exception of foreign bank branches and owners of buildings and land, who become residents at the moment they perform a valid legal act (in the case of foreign owners of buildings and land, this only applies in connection with transactions relating to the building or land in question).

Transaction (flow) data: values related to the whole period which are calculated as the difference between the balances at the end of the current and the previous period adjusted for non-transaction effects, i.e. effects connected with reclassifications, valuation changes and exchange rate variations over the period. These factors result in breaks in time series, thereby affecting the comparability of end-of-period balances. Transaction (flow) data only reflect those changes that arise from transactions, i.e. from accepting financial assets or providing financial liabilities.

Unit trusts other than money market funds:

1. Equity funds – funds investing mainly in shares and other equity.
2. Bond funds – funds investing mainly in securities other than shares.
3. Mixed funds – funds investing in equity and debt securities without a clear preference for either approach.
4. Real estate funds – funds investing mainly in real estate.
5. Hedge funds – funds applying more or less unlimited investment strategies in order to achieve positive absolute yields, whose managers are remunerated based on the fund's performance in addition to their salary.
6. Other funds – collective investment funds other than equity funds, bond funds, mixed funds, real estate funds or hedge funds.

Funds of funds and funds of qualified investors are classified under the aforementioned categories according to their investment strategies.

TECHNICAL NOTES

A. Calculation of growth rates

The growth rate for the reference period is calculated from the volumes of monthly financial transactions and the outstanding amounts at the beginning of each month. Monthly transactions are calculated from differences in outstanding amounts adjusted for reclassifications, other revaluations, exchange rate variations and other changes which do not arise from transactions. This data thus reflects only those changes that arise from accepting financial assets or providing financial liabilities. Reclassifications and other non-transaction corrections are introduced into the transaction statistics to preserve the comparability of the gradual monitoring results, thereby enabling calculation of the indices of expected outstanding balances of the monitored variables and determination of their growth rates.

Method of calculation

1. The month-on-month percentage change a_t^M for month t is calculated as:

$$(a) \quad a_t^M = \left(\frac{F_t^M}{L_{t-1}} \right) \times 100$$

2. The annual growth rate for month t , i.e. the change for the last 12 months ending with month t , is calculated as the product of the twelve coefficients for each previous month. The calculation of the annual growth rate from the month-on-month growth rates thus enables transaction changes and non-transaction effects in the individual months to be taken into account.

$$(b) \quad a_t = \left[\prod_{i=0}^{11} \left(1 + \frac{F_{t-i}^M}{L_{t-1-i}} \right) - 1 \right] \times 100,$$

where

F_t^M - transactions in month t

$F_t^M = (L_t - L_{t-1}) - C_t^M - E_t^M - V_t^M$

and

L_t - outstanding amount at the end of month t

C_t^M - reclassifications in month t

E_t^M - exchange rate variations in month t

V_t^M - valuation changes in month t

Growth rates for other reference periods are derived from formula (b).

B. Calculation of the contribution to the annual growth rate of a monitored variable (e.g. M3)

If $a_t(M3)$ represents the annual growth rate of M3 for the year ending with month t , and $F_{t-i}(M1)$, $F_{t-i}(M2-M1)$, $F_{t-i}(M3-M2)$ are the monthly transactions of the components M1, M2-M1 and M3-M2 in month $t-i$, the contribution of M1 to the annual growth rate of M3, for example, is calculated as:

$$\frac{\sum_{i=0}^{11} F_{t-i}(M1)}{\sum_{i=0}^{11} [F_{t-i}(M1) + F_{t-i}(M2-M1) + F_{t-i}(M3-M2)]} \times a_t(M3)$$
