

Monetary Statistics — III/2021

The information are based on monetary statistics of the CNB harmonized with monetary statistics of European System of Central Banks (ESCB) (Tables 3 – 13) and non-harmonised information according to ESCB respectively (Tables 14 – 15), unless otherwise stated.

The data are not seasonally adjusted and the last period data are always preliminary. The published data may be subject to inaccuracy in the last decimal place due to rounding.

The data quoted in this Publication are included in the ARAD time series system: https://www.cnb.cz/cnb/STAT.ARADY_PKG.STROM_SESTAVY?p_strid=AAAG&p_sestuid=&p_lang=EN (Time series database ARAD >> Statistical data >> Money and financial statistics >> Monetary statistics >> Monetary Statistics Publication), with the exception of the data on cost-of-borrowing indicators for euro area countries which are available under this following link: <http://sdw.ecb.europa.eu/reports.do?node=1000004934>.

I.4 COMMENTARY ON TABLES 1 – 2

Commentary on key interest rates (Table 1) and financial market interest rates (Table 2): January 2021.

I.4.1 Key interest rates

The 2W repo rate of the Czech National Bank (CNB) changed in May 2020, down by 0.75 percentage point to 0.25%. The key interest rate of the European Central Bank (ECB) has been at zero since March 2016. The ECB's Lombard rate fell by 0.05 percentage point (to 0.25%) as of the same date as the ECB's key rate. The CNB's Lombard rate also changed in May 2020, down by 1.00 percentage point to 1.00%. The CNB's discount rate was unchanged in May 2020, remaining at 0.05%, to where it had dropped at the end of March 2020. The ECB's discount rate decreased to a historical low of -0.50% in September 2019, down by 0.10 percentage point.

I.4.2 Financial market interest rates

Three of the four monitored interest rates on the Czech interbank deposit market edged up in January. The 1M PRIBOR, the 3M PRIBOR and the 6M PRIBOR all increased month on month by 0.01 percentage point, reaching 0.31%, 0.36% and 0.40% respectively. The 1Y PRIBOR was the only rate that was unchanged from December at 0.49%. The CZEONIA interest rate (i.e. the rate on unsecured O/N deposits placed by banks and foreign bank branches on the interbank market, including deposits placed in the CNB's deposit facility) was also flat at 0.09%.

All the monitored interest rates on the Czech capital market recorded more pronounced changes between December and January. Specifically, the yield on the 2Y Czech bond rose by 0.10 percentage point to 0.26%. The yield on the 5Y bond increased by 0.02 percentage point to 0.82%. The yield on the 10Y bond rose by the same amount as the yield on the 5Y bond, to 1.28%. The yield on the 2Y euro area bond picked up by 0.04 percentage point to -0.59%. The yield on the 5Y euro area bond also increased by 0.04 percentage point to -0.43%. The yield on the 10Y bond increased too, by 0.03 percentage point to -0.06%. The largest differential between Czech and euro area bond yields was recorded for the 10Y bond, reaching 1.34 percentage point.

- 1) Monetary aggregates comprise monetary liabilities of MFIs vis-à-vis non-MFI Czech residents excluding central government. M1 is the sum of currency in circulation and overnight deposits; M2 is the sum of M1, deposits with an agreed maturity of up to two years and deposits redeemable at notice of up to three months; and M3 is the sum of M2, repurchase agreements, money market fund shares/units and debt securities up to two years.
- 2) Including all resident sectors without general government (S.13) and MFIs sector (S.121, S.122 and S.123 according to ESA2010).
- 3) Net foreign assets (NFA) represent balance of financial claims and liabilities of the MFI sector vis-à-vis non-residents.
- 4) Net value of flow data calculated by adjusting the difference between end-of-period levels for the effect of non-transactions-related factors.

II.9 COMMENTARY ON TABLES 3 – 9

Commentary on monetary developments statistics¹ (Tables 3 – 9): January 2021.

The evolution of the annual rate of growth of M3 was characterised by an upward trend from May 2020 (7.8%) to September 2020 (10.6%). This was halted in October when it declined by 0.7 percentage point from the previous month to 9.9%. The annual growth rate did not deviate too much from this level in the following two months (10% in November and 9.8% in December). The annual growth rate then rose by 0.7 percentage points to 10.5% in January 2021. As a result of financial transactions, M3 increased by CZK 155.8 billion month on month in this month (up by CZK 515.9 billion year on year), reaching CZK 5,409.4 billion.

II.9.1 Main components of M3

Individual components of the annual rate of growth of M3 showed mixed developments in January 2021. The contribution of currency in circulation increased marginally (from 1.4 percentage points in December 2020 to 1.6 percentage points in January 2021), as did the contribution of overnight deposits (from 12.4 percentage points in December 2020 to 13.8 percentage points in January 2021). Although the contribution of short-term marketable instruments also increased (from -0.5 percentage points in December 2020 to -0.2 percentage points in January 2021), it remained negative. By contrast, the contribution of other short-term deposits decreased (from -3.5 percentage points in December 2020 to -4.7 percentage points in January 2021).

Owing to financial transactions, overnight deposits increased by 2.5% month on month, or CZK 104.4 billion, in January. This was mainly due to an increase in deposits of other government and deposits of other financial intermediaries (by 22.0%, or CZK 46.5 billion, and by 16.4%, or CZK 16.4 billion respectively). Deposits of insurance corporations and pension funds and deposits of households also increased moderately (by 7.7%, or CZK 1.9 billion, and by 1.7%, or CZK 44.9 billion respectively). Only new deposits by non-financial corporations saw a slight decrease (by 0.4%, or CZK 5.2 billion).

Other short-term deposits (excluding overnight deposits) also increased by 1.6% (CZK 6.0 billion) in January, due to financial transactions. In this case, deposits of other government also recorded the largest increase (up by 49.7%, or CZK 8.7 billion). Moderate increases in deposits were registered also by non-financial corporations (up by 8.9%, or CZK 4.9 billion) and other financial intermediaries (up by 0.2%, or CZK 0.1 billion). Household deposits remained flat (in percentage and volume terms). By contrast, sharp decreases were recorded for deposits of insurance corporations and pension funds (down by 28.6%, or CZK 7.7 billion). The annual growth rate of other short-term deposits decreased by 6.7 percentage points to -37.2% in January. The annual growth rate decreased for deposits with agreed maturity of up to two years (by 7.5 percentage points to -56.6%), while the annual growth rate of deposits redeemable at notice of up to 3 months rose slightly (by 0.6 percentage points to 1.8%).

Marketable instruments, which consist of repos, money market fund shares/units and debt securities with maturities of up to two years, increased by CZK 42.4 billion month on month due to financial transactions in January, to CZK 118.9 billion.

II.9.2 Main counterparts of M3

The annual rate of growth of loans to the private sector, which are the most important counterpart of M3, decreased from 3.3% in December 2020 to 2.9% in January 2021. The annual growth rate of loans to non-financial corporations, a major component of this indicator, saw a gradual decrease from 4.9% in March 2020 to 0% in October 2020. It rose slightly to 0.1% in November 2020 and in December it fell by 0.5 percentage point to -0.4%. It remained at this level in January 2021. The annual growth rate of loans to households is another major component. It stood at around 6.5% in 2020. Specifically, it amounted to 6.7% in December, the same as in January 2021.

As regards liabilities of monetary financial institutions, increases were recorded for the annual growth rate of deposits of central government (from 37.2% in December 2020 to 44.7% in January 2021) and the annual growth rate of longer-term financial liabilities (from 4.3% in December 2020 to 6.3% in January 2021). As regards assets of monetary financial institutions, slight increases were also recorded for the annual growth rate of loans provided to the government sector and purchased securities (from 53.6% in December 2020 to 60.5% in January 2021) and for the annual growth rate of net foreign assets (from 8.3% in December 2020 to 9.9% in January 2021).

¹ All increases and decreases referred to in this commentary relate only to financial transactions adjusted for non transaction effects.

Comment: The interest rates applied by MFIs to CZK-denominated deposits and loans vis-à-vis households and non-financial corporations resident in the Czech Republic. New business refers to any new agreement between the customer and the MFI within given period.

- 1) Including households (S.14) and non-profit institutions serving households (S.15) according to the classification ESA2010.
- 2) For this instrument category the new business are equal to the outstanding amounts (end-of-period stocks).
- 3) Households deposits redeemable at notice include similar deposits of non-financial corporations of which volumes are negligible in this category.
- 4) Since 2019, the amendment to Act No. 190/2004 Coll., on Bonds, as amended, has been fully applied, under which a mortgage loan is a loan which is secured at least partly by lien (right of pledge) over real estate (property).
- 5) Debit balances on current accounts. The total amount owed by the borrower is included, irrespective of whether is within or beyond any limit agreed beforehand.
- 6) The initial period of fixations is a predetermined period of time at the start of the contract during which the value of the interest rate cannot change. Period up to 3 months includes floating rates.
- 7) Annual percentage rate of charge (APRC) covers total costs of the credit to the client including charges etc.

Comment: The interest rates that are applied by MFIs to CZK-denominated deposits and loans vis-à-vis households and non-financial corporations resident in the Czech Republic. Interest rates on outstanding amounts refer to the stock of all deposits and all loans at a specific moment.

- 1) Including households (S.14) and non-profit institutions serving households (S.15) according to the classification ESA2010.
- 2) Including overnight deposits and deposits redeemable at notice presented in Table 10. For this instrument category new business and outstanding amounts coincide.
- 3) Since 2019, the amendment to Act No. 190/2004 Coll. on Bonds, as amended, has been fully applied, under which a mortgage loan is a loan which is secured at least partly by lien (right of pledge) over real estate (property).
- 4) Consumer credit and other lending include bank overdrafts, revolving loans and credit cards presented in Table 10.

III.3 COMMENTARY ON TABLES 10 – 11

Commentary on monetary financial institutions interest rates (Tables 10 – 11): January 2021.

III.3.1 Interest rates on new business

In January, interest rates on new deposits of households recorded the largest change for deposits with agreed maturity. The rate on overnight deposits of households was unchanged and remained at December's 0.10%. The rate on current account deposits was 0.02%, unchanged from November. The interest rate on deposits with agreed maturity declined by 0.07 percentage point to 0.52%. The rate on deposits redeemable at notice dropped to 1.15% (this rate is the only one to include, in addition to the household sector, also similar deposits of non-financial corporations, whose volumes are negligible in this category).

The interest rate on overnight deposits of non-financial corporations remained unchanged at 0.03%. The interest rate on current account deposits was also unchanged from July at 0.03%. The rate on deposits with agreed maturity of up to one year (which as a rule account for 100% of all deposits with agreed maturity in this sector) saw an increase of 0.01 percentage point to 0.17%.

Within interest rates on new loans to households, credit card loans recorded the largest change in January. Interest rates on loans to non-financial corporations saw the largest change for loans of over CZK 30 million.

The overall interest rate on consumer credit, loans for house purchase and other loans to households increased, up by 0.09 percentage point to 3.12%. Consumer credit was remunerated at 7.79%, up by 0.10 percentage point. The interest rate on loans for house purchase was down by 0.03 percentage point to 2.07%. The rate on mortgage loans stood at 1.99%, down by 0.02 percentage point from December. Building society loans were remunerated at 3.00%, down by 0.22 percentage point. The rate on other loans dropped by 0.01 percentage point to 2.84%. The interest rate on credit card loans rose by 0.32 percentage point month on month to 18.33%. The rate on overdrafts and revolving loans decreased to 12.05%.

The interest rate on new loans to non-financial corporations (excluding overdrafts, revolving loans and credit cards) fell by 0.37 percentage point to 1.49%. The rate on loans of up to CZK 7.5 million increased, up by 0.16 percentage point to 3.42%. Loans of over CZK 7.5 million and up to CZK 30 million were remunerated at 2.46%, i.e. 0.08 percentage point lower than in December. The interest rate on loans of over CZK 30 million dropped by 0.43 percentage point, reaching 1.29%. Overdrafts, revolving loans and credit card loans were remunerated at 2.41%, down by 0.01 percentage point.

III.3.2 Interest rates on outstanding amounts

The average interest rates on outstanding amounts of household deposits changed only marginally in January, while the rates on deposits of non-financial corporations saw larger changes.

Total deposits of households were remunerated at 0.25%, representing a slight decrease compared to December. The interest rate on overnight deposits was unchanged from December at 0.10%. The interest rate on deposits redeemable at notice dropped to 1.15% and the rate on deposits with agreed maturity dropped slightly to 1.01%.

The interest rate on total deposits of non-financial corporations was the same as in December at 0.05%. At 0.03%, the interest rate on overnight deposits of households remained unchanged. The interest rate on deposits with agreed maturity decreased to 0.34%.

Changes in interest rates on outstanding amounts of loans to households were just a few basis points in January, while the interest rates on outstanding amounts of loans to non-financial corporations saw similar changes.

The overall interest rate on loans to households dropped to 3.40%. The interest rate on loans for house purchase declined marginally to 2.48%. The interest rate on consumer credit and other loans declined to 6.70%.

The average interest rate on outstanding amounts of loans to non-financial corporations decreased marginally to 2.55%. The rate on loans with maturity of up to one year also fell, reaching 2.45%. The interest rate on loans with maturity of one to five years was up to 2.81%. The rate on loans with maturity of over five years decreased to 2.49%.

III.4 COST-OF-BORROWING INDICATORS

The Czech National Bank has been publishing fully harmonised MIR statistics in accordance with Regulation ECB/2013/14 since January 2004. These statistics are used in the CNB's economic and monetary analyses and are reported to the ECB on a monthly basis. Over time, it has been found that in order to estimate the effectiveness of monetary policy pass-through across euro area and EU countries, it is necessary to use an accurate and comparable measure of the borrowing costs for non-financial corporations and households in those countries, in addition to the standard MIR indicators. For this reason, the euro area countries started to publish cost-of-borrowing indicators (CBI) in 2013. The CBIs were created to assess the effectiveness of monetary policy pass-through and economic forecasts and to compare economic conditions across the euro area countries. The Czech Republic voluntarily signed up to the publication of CBIs in June 2014.

The motive for implementing the CBIs was that aggregate indicators cannot be easily compiled for MIR statistics in some cases due to inhomogeneity in the definitions of the underlying instruments. For example, overdrafts² are recorded in the monthly statistics on new loan contracts ("new business"), but they have a higher periodicity and different characteristics. They cannot be left out if this segment is to be fully covered. Because of the difference in definitions, however, interest rates could previously be monitored only separately for individual instruments, not in aggregate form. The CBI calculation algorithm eliminates this shortcoming for certain instruments.

Four basic categories of underlying instruments were used to calculate the CBIs: interest rates on loans provided by banks to non-financial corporations and interest rates on loans provided by banks to households for house purchase. The MIR source statistics were used in two ways to construct the CBIs. Interest rates on long-term loans provided by banks to non-financial corporations and interest rates on short-term and long-term loans provided by banks to households for house purchase were obtained directly from the MIR statistics. In the case of interest rates on long-term loans provided by banks to non-financial corporations, two additional calculations had to be performed to make this aggregate indicator applicable. This involved accounting for the importance of overdrafts an important source of financing for firms and computing an estimate of the share of long-term loans with original and residual maturity of over one year and interest rate reset in the next twelve months, as these long-term loans are akin to short-term loans.

There are eight indicators: four basic ones and four derived ones. The basic indicators provide an assessment of the costs of borrowing broken down into short-term and long-term loans to households and non-profit organisations serving household for house purchase and to non-financial corporations. These four basic CBIs are used to compile the derived CBIs – short-term CBIs, long-term CBIs, CBIs for non-financial corporations as a whole and CBIs for households and non-profit institutions serving households as a whole. The CBIs cover CZK-denominated loans.

The CBIs are compiled on the basis of the existing MFI interest rate (MIR) and balance sheet statistics. The CBIs for households and non-profit institutions serving households (HH) are calculated using loans for house purchase (new business). Consumer credit and other loans are not included as their interest rates are too volatile across countries and thus not relevant for macroeconomic projections.

² Overdrafts are debit balances on current accounts, revolving loans and card credit.

III.5 TABLE 12 – DERIVED COST-OF-BORROWING INDICATORS IN THE CZECH REPUBLIC AND NETHERLANDS

(in % p. a.)

	2019		2020					
	December		October		November		December	
	CZ	NL ⁵⁾	CZ	NL	CZ	NL	CZ	NL
(1) Households - total ^{1), 2)}	2.49	2.00	2.19	1.87	2.13	1.85	2.10	1.84
(2) Non-financial corporations - total	3.72	1.21	1.98	1.23	2.14	1.10	2.15	1.31
(3) Total short-term cost of borrowing ³⁾	3.75	1.05	1.83	1.16	2.04	1.03	2.01	1.21
(4) Total long-term cost of borrowing ⁴⁾	2.66	2.14	2.35	1.89	2.25	1.86	2.30	1.90

1) MFI interest rate statistics cover CZK-denominated loans only. The rates on outstanding amounts are the rates applied to end of period balances.

2) Households comprise the household sector (S.14) and non-profit institutions serving households (S.15) under ESA2010.

3) Short-term (ST) loans are loans with a floating rate or an initial rate fixation up to one year.

4) Long-term (LT) loans are loans with an initial rate fixation over one year.

5) NL = Netherlands ([link](#) to data).

(in %)

III.5.1 Recent developments in derived cost-of-borrowing indicators in the Czech Republic and Netherlands

All cost-of-borrowing indicators (CBIs) were higher for Czech loans than for Dutch loans in December 2020, with the differential exceeding 0.50 percentage points on average. Only two Dutch CBIs of all CBIs monitored in the Czech Republic and the Netherlands recorded a year-on-year increase in December. Two Czech and three Dutch derived CBIs increased in month-on-month terms. The Dutch short-term CBI was the lowest in December. By contrast, the long-term CBI in the Czech Republic was the highest.

Compared with November, Czech borrowing costs for loans to households declined by 0.03 percentage point. In the Netherlands, this CBI also recorded a month-on-month decrease, down by 0.01 percentage point. In December, this CBI reached 2.10% in the Czech Republic and 1.84% in the Netherlands. The differential between this CBI in the Czech Republic and the Netherlands was 0.26 percentage point. This was the smallest differential among all the monitored CBIs in the Czech Republic and the Netherlands. In year-on-year terms, decreases of 0.39 percentage point and 0.16 percentage point respectively were recorded in the Czech Republic and the Netherlands.

The borrowing costs of non-financial corporations in the Czech Republic saw a month-on-month increase of 0.01 percentage point to 2.15%. This CBI in the Netherlands was 1.31%, i.e. 0.84 percentage points lower than in the Czech Republic. This was the biggest differential among all the monitored CBIs in the Czech Republic and the Netherlands. The month-on-month increase in this Dutch CBI was 0.21 percentage point, the largest monthly change among all the monitored CBIs in the Czech Republic and the Netherlands. In year-on-year terms, an increase of 0.10 percentage point was recorded in the Netherlands, whereas a decrease of 1.57 percentage point was recorded in the Czech Republic. The year-on-year change in this Czech CBI was the second largest among all the Czech and Dutch CBIs.

The total short-term cost of borrowing, which comprises both households and non-financial corporations, decreased by 0.03 percentage point month on month to 2.01% in the Czech Republic. In the Netherlands, this CBI was 0.80 percentage point lower. This was the second biggest differential among all the monitored CBIs in the Czech Republic and the Netherlands. This indicator thus stood at 1.21% in the Netherlands. The month-on-month increase in this Dutch CBI was 0.18 percentage point, the second largest monthly change among all the monitored CBIs in the Czech Republic and the Netherlands. In year-on-year terms, an increase of 0.16 percentage point was recorded in the Netherlands, whereas a decrease of 1.74 percentage point was recorded in the Czech Republic. The year-on-year change in this Czech CBI was the largest among all the Czech and Dutch CBIs.

In the Czech Republic, the long-term cost of borrowing (comprising both households and non-financial corporations) rose by 0.05 percentage point to 2.30% in December. In the Netherlands, this CBI recorded a month-on-month increase of 0.04 percentage point. The long-term CBI in the Netherlands was 1.90%, i.e. 0.40 percentage points lower than in the Czech Republic. This CBI decreased by 0.36 percentage point year on year in the Czech Republic. In the Netherlands, it fell by 0.24 percentage point.

Comment: Investment Funds (IFs) represent Mutual and Investment Funds other than Money Market Funds which are residents in the Czech Republic. Funds of funds and funds of qualified investors are classified under the category of assets or funds in which they primarily invest. Data are published by the 15th calendar day of the second month following the reference period.

(CZK billions)

IV.2 COMMENTARY ON TABLE 13

Commentary on the aggregated balance sheet of investment funds (Table 13): December 2020.

Net assets value: The net assets value of investment funds was CZK 613.9 billion at the end of December. This means an increase of CZK 10.9 billion compared to November (monthly transactions accounted for CZK +6.6 billion). Compared to the same period last year, the net assets value of investment funds rose by 8.7%. The biggest month-on-month change in the net assets value was recorded for other funds, up by CZK 5.2 billion to CZK 90.9 billion.

Investment in bonds: The value of bond holdings was CZK 146.0 billion at the end of December. Compared to the previous month, the total volume of bonds in the funds' portfolio increased by CZK 2.6 billion (monthly transactions accounted for CZK +2.7 billion). The proportion of debt securities in the funds' net assets value was unchanged from the previous month at 23.8%.

Investment in equity securities: During the month under review, the volume of equity securities in the funds' portfolio increased. As of the end of the month, the value of holdings of equity securities amounted to CZK 299.7 billion, of which CZK 135.9 billion was investment in the shares and units of investment funds and CZK 163.8 billion was investment in shares and other equity. The value of equity securities grew by CZK 11.5 billion compared to November (monthly transactions accounted for CZK +7.4 billion). The share of equity securities in the funds' net assets value increased to 48.8% compared to the previous month.

Other investment: The value of funds invested in other assets decreased during the period under review. The total volume of other investment was CZK 208.2 billion in December, of which CZK 50.1 billion was fixed investment and CZK 69.9 billion investment in deposits. The ratio of other investment to the funds' net assets value fell to 33.9% compared to the previous month.

Reporting population: At the end of December 2020, a total of 549 resident investment funds were active in the Czech Republic, of which 62 were equity funds, 60 bond funds, 77 mixed funds, 88 real estate funds, 258 other funds and four funds without an investment policy.

Comment: Financial corporations engaged in lending - corporations classified within sector other financial intermediaries which are predominantly engaged in granting credit or loans or entering into agreements of similar nature, for example financial leasing, factoring, consumer credit, hire purchase, etc., (see Decree No. 314/2013 Coll.).

V.4 COMMENTARY ON TABLES 14 – 15

Commentary on the aggregated balance sheet of financial corporations engaged in lending (Tables 14 – 15): December 2020.

Financial corporations engaged in lending had total assets of CZK 417.4 billion as of 31/12/2020, up by CZK 0.3 billion in quarter-on-quarter terms. Compared to 2019 Q4, total assets fell by CZK 20.4 billion (or 4.7%) year on year.

The largest asset item was loans provided, amounting to CZK 321.1 billion, of which CZK 314.7 billion was provided to residents. Compared to the previous quarter, total loans provided rose by CZK 0.5 billion in 2020 Q4. In year-on-year terms, loans recorded a decrease of 2.6% (CZK 8.5 billion).

The largest part of loans provided to residents consisted of loans to non-financial corporations amounting to CZK 251.0 billion, i.e. 79.8% of loans to residents. Compared to the previous quarter, loans to non-financial corporations grew by CZK 2.2 billion. In year-on-year terms, they decreased by CZK 0.1 billion.

The second largest category of loans to residents consisted of loans to households, totalling CZK 60.4 billion. They were down by CZK 2.1 billion compared to the previous quarter. These loans account for 19.2% of loans granted to residents.

VI. GLOSSARY

Harmonisation of statistics: the Treaty establishing the European Community tasked the European Central Bank (ECB) with ensuring harmonised statistics according to Article 5 of the Statute of the European System of Central Banks. The national central banks of EC Member States therefore collect statistical information according to a uniform definition, from which the ECB then compiles aggregate data for euro area monetary policy. Although Council Regulation No 2533/98, which specifies the requirements for statistical data collection, only concerns euro area countries, the ECB also receives full data sets from the non-participating countries (e.g. the Czech Republic) in order to monitor their economic and financial development.

Monetary statistics: financial macrostatistics of constituent sub-sectors of the sector S.12 based exclusively on the “host country” principle. According to this principle, a resident reporting unit is an institution resident in a given economic territory. The reporting population includes

- 1) institutions incorporated and located in the territory, including subsidiaries of parent companies located outside that territory,
- 2) branches of institutions that have their head office outside that territory.

APRC: annual percentage rate of charge, i.e. the rate including interest expenses and all related costs of the credit to the client (fees etc.).

Investment funds: for the purposes of monetary and banking statistics, investment funds comprise investment funds other than money market funds which are resident in the Czech Republic. These are undertakings the sole object of which is collective investment, i.e. pooling investor funds and investing them under conditions stipulated in the Act on Management Companies and Investment Funds (No. 240/2013 Coll.). Such undertakings may be constituted under the Act either as unit trust managed by an investment company or as investment funds.

Consolidated balance sheet of the MFI sector: the basic statistical tool of monetary statistics. It is based on the residency principle and is obtained by netting out inter-MFI positions on their aggregated balance sheet.

Consumer credit: loans granted to households for personal use in the consumption of goods and services.

Contribution to annual growth rate: the growth rate of a selected component weighted by its share in the total growth rate.

Deposits redeemable at notice: deposits that can be withdrawn by clients only after the expiry of a period of notice agreed in advance, which starts at the moment of notification of the intention to withdraw the deposit.

Deposits with agreed maturity: deposits that cannot be withdrawn by clients before a predefined maturity.

Financial corporations engaged in lending (FCLs): FCLs mean corporations classified within sector S.125 other financial intermediaries which are predominantly engaged in granting credit or loans or entering into agreements of similar nature, for example financial leasing, factoring, consumer credit, hire purchase, etc. (see Decree No. 314/2013 Coll.)

Type of services:

- 1) financial leasing – it is financial service, when lessee acquires the right to use good in exchange for rental payment over predetermined term. All risk and rewards of ownership are transferred from lessor to lessee. After lapse of predetermined term ownership of good is transferred from lessor to lessee.
- 2) factoring – it is financial service consisting in purchase of short-term receivables (with maturity 30-90 days) before their maturity date. Receivables are transferred on factoring company – factor- by supplier of goods or services.
- 3) other lending – this category encompass granting credit or loans or agreements of similar nature different from financial leasing and factoring. It deals especially with consumer credit, hire purchase, consumption loans, etc.

Growth rate: the percentage change in the monitored variable over the reference period, calculated from the volumes of monthly financial transactions and the outstanding amounts at the beginning of each month.

Household sector: institutional units included in the sectors of households (S.14) and non-profit institutions serving households (S.15) under ESA2010.

Housing loans: loans granted to households for the purpose of purchasing/investing in housing, including building and home improvements.

Interest rate fixation: a period of interest rate fixation, i.e. a period at the beginning of a contract for which the agreed interest rate cannot be changed. Period up to 1 year includes floating rates.

MFI longer-term financial liabilities: comprise deposits with an agreed maturity of over two years, deposits redeemable at a period of notice of over three months, debt securities issued with an original maturity of more than two years and the capital and reserves of the Czech MFI sector.

Monetary aggregates: comprise the monetary liabilities of monetary financial institutions to non-MFI Czech residents except central government. The narrow monetary aggregate M1 includes currency in circulation (excluding cash at banks' cash desks) and overnight deposits. The intermediate monetary aggregate M2 comprises M1, deposits redeemable at a period of notice of up to and including three months and deposits with a maturity of up to and including two years. The broad monetary aggregate M3 comprises M2, money market fund shares/units, debt securities with a maturity of up to two years and repurchase agreements.

Monetary financial institutions (MFIs): financial institutions forming the money-issuing sector. Under Community law, these include the central bank, resident credit institutions, and all other resident financial institutions whose business is to receive deposits and/or close substitutes for deposits from entities other than MFIs and, for their own account (at least in economic terms), to grant credit and/or invest in securities. In the Czech Republic, MFIs include the central bank, banks, money market funds and credit unions.

Money-holding sector: all residents' institutional units except central government (S.1311) and monetary financial institutions (S.121, S.122 and S.123) under ESA2010.

Money-issuing sector: all institutional units included in the sectors of the central bank (S.121) and other monetary financial institutions (S.122 and S.123) under ESA2010.

Money-neutral sector: an institutional sector comprising the central government sector (S.1311) under ESA2010.

Money market funds (MMFs): are collective investment undertakings that have been authorised pursuant to Article 4 of Regulation (EU) 2017/1131 of the European Parliament and of the Council³ and that issue shares/units which are close substitutes for deposits.

Net external assets: comprise external assets of Czech MFIs (such as monetary gold, non-koruna banknotes, securities issued by non-residents and loans granted to non-residents) minus external liabilities of the Czech MFI sector (such as non-residents' holdings of deposits, repurchase agreements, money market fund shares and units, and debt securities with a maturity of up to and including two years issued by MFIs and held by non-residents).

Non-MFIs: all resident sectors excluding MFIs, i.e. general government (S.13), non-financial corporations (S.11), financial institutions other than MFIs (S.124, S.125, S.126, S.127, S.128, and S.129) and households and non-profit institutions serving households (S.14 and S.15) under ESA2010.

Other financial intermediaries (OFIs): entities included in the sectors of other financial intermediaries except insurance corporations and pension funds (S.125), financial auxiliaries (S.126), captive financial institutions and money lenders (S.127), insurance corporations (S.128), and pensions funds (S.129) under ESA2010.

Private sector: a sector comprising all institutional sectors except general government (S.13) and monetary financial institutions (S.121, S.122 and S.123) under ESA2010.

Rates on new business: interest rates agreed by the bank and the client for all agreements negotiated during the reference period.

Rates on outstanding amounts: interest rates applied to end-of-period balances.

³ Regulation (EU) 2017/1131 of the European Parliament and of the Council of 14 June 2017 on money market funds.

Reclassifications: comprise any changes in the MFI balance sheet resulting from changes in the reporting population, corporate restructuring, reclassifications of assets and liabilities, and corrections of reported errors.

Residents: all domestic and foreign legal entities and natural persons, including branches of foreign banks and foreign owners of buildings and land, whose centre of economic interest is in the given territory. Foreign legal entities and natural persons are considered residents after at least one year of economic activity in the territory, with the exception of foreign bank branches and owners of buildings and land, who become residents at the moment they perform a valid legal act (in the case of foreign owners of buildings and land, this only applies in connection with transactions relating to the building or land in question).

Transaction (flow) data: values related to the whole period which are calculated as the difference between the balances at the end of the current and the previous period adjusted for non-transaction effects, i.e. effects connected with reclassifications, valuation changes and exchange rate variations over the period. These factors result in breaks in time series, thereby affecting the comparability of end-of-period balances. Transaction (flow) data only reflect those changes that arise from transactions, i.e. from accepting financial assets or providing financial liabilities.

Unit trusts other than money market funds:

- 1) Equity funds – funds investing mainly in shares and other equity.
- 2) Bond funds – funds investing mainly in securities other than shares.
- 3) Mixed funds – funds investing in equity and debt securities without a clear preference for either approach.
- 4) Real estate funds – funds investing mainly in real estate.
- 5) Hedge funds – funds applying more or less unlimited investment strategies in order to achieve positive absolute yields, whose managers are remunerated based on the fund's performance in addition to their salary.
- 6) Other funds – investment funds other than equity funds, bond funds, mixed funds, real estate funds or hedge funds.

Funds of funds and funds of qualified investors are classified under the aforementioned categories according to their investment strategies.

VII. TECHNICAL NOTES

VII.1 CALCULATION OF GROWTH RATES

The growth rate for the reference period is calculated from the volumes of monthly financial transactions and the outstanding amounts at the beginning of each month. Monthly transactions are calculated from differences in outstanding amounts adjusted for reclassifications, other revaluations, exchange rate variations and other changes which do not arise from transactions. This data thus reflects only those changes that arise from accepting financial assets or providing financial liabilities. Reclassifications and other non-transaction corrections are introduced into the transaction statistics to preserve the comparability of the gradual monitoring results, thereby enabling calculation of the indices of expected outstanding balances of the monitored variables and determination of their growth rates.

VII.1.1 Method of calculation

- 1) The month-on-month percentage change a_t^M for month t is calculated as: $a_t^M = \left(\frac{F_t^M}{L_{t-1}} \right) * 100$
- 2) The annual growth rate for month t , i.e. the change for the last 12 months ending with month t , is calculated as the product of the twelve coefficients for each previous month: $a_t = \left[\prod_{i=0}^{11} \left(1 + \frac{F_{t-i}^M}{L_{t-1-i}} \right) - 1 \right] * 100$, where

$$F_t^M = (L_t - L_{t-1}) - C_t^M - E_t^M - V_t^M,$$

F_t^M – transactions in month t ,

L_t – outstanding amount at the end of month t ,

C_t^M – reclassifications in month t ,

E_t^M – exchange rate variations in month t ,

V_t^M – valuation changes in month t .

The calculation of the annual growth rate from the month-on-month growth rates thus enables transaction changes and non-transaction effects in the individual months to be taken into account.

- 3) Growth rates for other reference periods are derived from formula (2).

VII.2 CALCULATION OF THE CONTRIBUTION TO THE ANNUAL GROWTH RATE OF A MONITORED VARIABLE (E.G. M3)

If $a_t(M3)$ represents the annual growth rate of M3 for the year ending with month t , and $F_{t-i}(M1)$, $F_{t-i}(M3 - M2)$ and $F_{t-i}(M2 - M1)$ are the monthly transactions of the components M1, M2-M1 and M3-M2 in month $t-i$, the contribution of M1 to the annual growth rate of M3, for example, is calculated as: $\frac{\sum_{i=0}^{11} F_{t-i}(M1)}{\sum_{i=0}^{11} [F_{t-i}(M1) + F_{t-i}(M2 - M1) + F_{t-i}(M3 - M2)]} * a_t(M3)$.
