

Monetary Statistics — IX/2021

Czech National Bank — Monetary Statistics — IX/2021

The information are based on monetary statistics of the CNB harmonized with monetary statistics of European System of Central Banks (ESCB) (Tables 3 – 13) and non-harmonised information according to ESCB respectively (Tables 14 – 15), unless otherwise stated.

The data are not seasonally adjusted and the last period data are always preliminary. The published data may be subject to inaccuracy in the last decimal place due to rounding.

The data quoted in this Publication are included in the ARAD time series system: https://www.cnb.cz/cnb/STAT.ARADY_PKG.STROM_SESTAVY?p_strid=AAAG&p_sestuid=&p_lang=EN (Time series database ARAD >> Statistical data >> Money and financial statistics >> Monetary statistics >> Monetary Statistics Publication), with the exception of the data on cost-of-borrowing indicators for euro area countries which are available under this following link: <http://sdw.ecb.europa.eu/reports.do?node=1000004934>.

I.4 COMMENTARY ON TABLES 1 – 2

Commentary on key interest rates (Table 1) and financial market interest rates (Table 2): July 2021.

I.4.1 Key interest rates

The 2W repo rate of the Czech National Bank (CNB) changed in August 2021, up by 0.25 percentage point to 0.75%. The key interest rate of the European Central Bank (ECB) has been at zero since March 2016. The ECB's Lombard rate fell by 0.05 percentage point (to 0.25%) as of the same date as the ECB's key rate. The CNB's Lombard rate also changed in August 2021, up by 0.50 percentage point to 1.75%. The CNB's discount rate has stayed unchanged since March 2020, remaining at 0.05%. The ECB's discount rate decreased to a historical low of 0.50% in September 2019, down by 0.10 percentage point.

I.4.2 Financial market interest rates

All the four monitored interest rates on the Czech interbank deposit market rose in July. The 1M PRIBOR rose by 0.20 percentage point to 0.58%. The 3M PRIBOR was up by 0.21 percentage point to 0.69%. The 6M PRIBOR recorded the largest increase, up by 0.25 percentage point to 0.86%. The 1Y PRIBOR rose by 0.22 percentage point to 1.00%. The CZEONIA interest rate (i.e. the rate on unsecured O/N deposits placed by banks and foreign bank branches on the interbank market, including deposits placed in the CNB's deposit facility) rose to 0.15%.

All the monitored interest rates on the Czech capital market recorded changes of a similar magnitude as on the interbank deposit market between June and July. Specifically, the yield on the 2Y Czech bond rose by 0.15 percentage point to 0.84%. The yield on the 5Y bond increased by 0.08 percentage point to 1.63%. The yield on the 10Y bond rose from 1.67% to 1.72%. The yield on the 2Y euro area bond edged down by 0.03 percentage point to -0.58%. The yield on the 5Y euro area bond fell by 0.10 percentage point to -0.36%. The yield on the 10Y bond recorded the largest change, down by 0.14 percentage point to 0.16%. The largest differential between Czech and euro area bond yields was recorded for the 5Y bond, reaching 1.99 percentage points.

- 1) Monetary aggregates comprise monetary liabilities of MFIs vis-à-vis non-MFI Czech residents excluding central government. M1 is the sum of currency in circulation and overnight deposits; M2 is the sum of M1, deposits with an agreed maturity of up to two years and deposits redeemable at notice of up to three months; and M3 is the sum of M2, repurchase agreements, money market fund shares/units and debt securities up to two years.
- 2) Including all resident sectors without general government (S.13) and MFIs sector (S.121, S.122 and S.123 according to ESA2010).
- 3) Net foreign assets (NFA) represent balance of financial claims and liabilities of the MFI sector vis-à-vis non-residents.
- 4) Net value of flow data calculated by adjusting the difference between end-of-period levels for the effect of non-transactions-related factors.

II.9 COMMENTARY ON TABLES 3 – 9

Commentary on monetary developments statistics¹ (Tables 3 – 9): July 2021.

The evolution of the annual rate of growth of M3 was characterised by an upward trend from May 2020 (7.8%) to September 2020 (10.6%). This trend halted in October when the rate declined by 0.8 percentage point from the previous month to 9.8%. It fluctuated erratically around 10.5% in the subsequent months. It halted at 11.1% in February 2021. It declined slightly in the last five months, to 9.8% in July 2021 (down by 0.8 percentage point compared to June 2021). As a result of financial transactions, M3 increased by CZK 21.5 billion month on month (up by CZK 504.9 billion year on year), reaching CZK 5,660.2 billion.

II.9.1 Main components of M3

Individual components of the annual rate of growth of M3 showed mixed developments in July. The contribution of currency in circulation decreased (from 1.0 percentage point in June to 0.9 percentage point in July), as did the contribution of overnight deposits (from 11.1 percentage points in June to 10.5 percentage points in July). Although the contribution of other short-term deposits increased (from -1.6 percentage points in June to -1.4 percentage points in July), it remained negative. The contribution of short-term marketable instruments has been around zero since the end of 2020. It decreased marginally in July (from 0.1 percentage point in June to -0.2 percentage point in July).

Owing to financial transactions, overnight deposits rose by 0.9%, or CZK 39.9 billion, month on month in July. The largest increase was recorded for deposits of other government (up by 8.4%, or CZK 25.4 billion). Deposits of households and non-financial corporations also increased slightly (up by 0.7%, or CZK 21.1 billion, and by 0.4%, or CZK 4.8 billion respectively). By contrast, the increase in overnight deposits was dampened by a decrease in deposits of other financial intermediaries and insurance corporations and pension funds (down by 8.5%, or CZK 10.8 billion, and by 2.5%, or CZK 0.6 billion respectively).

Other short-term deposits (excluding overnight deposits) fell somewhat by 2.1% (CZK 7.7 billion) month on month in July, due to financial transactions. Deposits of insurance corporations and pension funds and deposits of other government recorded the largest decreases (down by 18.9%, or CZK 2.3 billion, and by 15.6%, or CZK 4.2 billion respectively). Deposits of households showed a more moderate decrease (down by 1.4%, or CZK 3.3 billion). By contrast, deposits of other financial intermediaries and non-financial corporations increased (up by 3.2%, or CZK 1.0 billion, and 1.8%, or by CZK 1.2 billion respectively). The annual growth rate of other short-term deposits increased by 1.0 percentage point to -17.1% in July. The annual growth rate increased for deposits redeemable at notice of up to three months (by 2.1 percentage points to 2.2%) and deposits with agreed maturity of up to two years (by 0.2 percentage points to -33.4%).

Marketable instruments, which consist of repos, money market fund shares/units and debt securities with maturities of up to two years, decreased by CZK 9.1 billion month on month due to financial transactions, to CZK 95.6 billion in July.

II.9.2 Main counterparts of M3

The annual rate of growth of loans to the private sector, which are the most important counterpart of M3, increased from 4.6% in June to 4.9% in July. The annual growth rate of loans to non-financial corporations, a major component of this indicator, saw an almost continuous decrease from 4.9% in March 2020 to -0.7% in January 2021. It fluctuated erratically around 0.1% in the subsequent months. It reached 1.2% in July, up by 0.9 percentage point compared to the previous month. The annual growth rate of loans to households, another major component, has been growing slightly since June 2020 (6.2% in May 2020). It amounted to 8.5% in July 2021, up by 0.2 percentage point month on month.

As regards liabilities of monetary financial institutions, the annual rate of growth of longer-term financial liabilities declined slightly from 8.6% in June to 8.3% in July, while the annual rate of growth of deposits of central government declined from -13.9% in June to -6.6% in July. As regards assets of monetary financial institutions, an increase was recorded for the annual growth rate of loans provided to general government and purchased securities (from 24.4% in June to 27.6% in July). By contrast, the annual rate of increase of net external assets grew slightly from 6.3% in June to 5.0% in July.

¹ All increases and decreases referred to in this commentary relate only to financial transactions adjusted for non transaction effects.

Comment: The interest rates applied by MFIs to CZK-denominated deposits and loans vis-à-vis households and non-financial corporations resident in the Czech Republic. New business refers to any new agreement between the customer and the MFI within given period.

- 1) Including households (S.14) and non-profit institutions serving households (S.15) according to the classification ESA2010.
- 2) For this instrument category the new business are equal to the outstanding amounts (end-of-period stocks).
- 3) Households deposits redeemable at notice include similar deposits of non-financial corporations of which volumes are negligible in this category.
- 4) Since 2019, the amendment to Act No. 190/2004 Coll., on Bonds, as amended, has been fully applied, under which a mortgage loan is a loan which is secured at least partly by lien (right of pledge) over real estate (property).
- 5) Debit balances on current accounts. The total amount owed by the borrower is included, irrespective of whether is within or beyond any limit agreed beforehand.
- 6) The initial period of fixations is a predetermined period of time at the start of the contract during which the value of the interest rate cannot change. Period up to 3 months includes floating rates.
- 7) Annual percentage rate of charge (APRC) covers total costs of the credit to the client including charges etc.

Comment: The interest rates that are applied by MFIs to CZK-denominated deposits and loans vis-à-vis households and non-financial corporations resident in the Czech Republic. Interest rates on outstanding amounts refer to the stock of all deposits and all loans at a specific moment.

1) Including households (S.14) and non-profit institutions serving households (S.15) according to the classification ESA2010.

2) Including overnight deposits and deposits redeemable at notice presented in Table 10. For this instrument category new business and outstanding amounts coincide.

3) Since 2019, the amendment to Act No. 190/2004 Coll. on Bonds, as amended, has been fully applied, under which a mortgage loan is a loan which is secured at least partly by lien (right of pledge) over real estate (property).

4) Consumer credit and other lending include bank overdrafts, revolving loans and credit cards presented in Table 10.

III.3 COMMENTARY ON TABLES 10 – 11

Commentary on monetary financial institutions interest rates (Tables 10 – 11): July 2021.

III.3.1 Interest rates on new business

In July, interest rates on new deposits of households recorded the largest change for deposits with agreed maturity. The interest rate on overnight deposits of households was unchanged at 0.09%. The interest rate on current account deposits also stagnated at 0.04%. The interest rate on deposits with agreed maturity declined by 0.09 percentage point to 0.46%. The rate on deposits redeemable at notice decreased by 0.02 percentage point to 1.12% (this rate is the only one to include, in addition to the household sector, also similar deposits of non-financial corporations, whose volumes are negligible in this category).

The interest rate on overnight deposits of non-financial corporations remained unchanged at 0.04%. The interest rate on current account deposits has remained flat at 0.03% for a year. The rate on deposits with agreed maturity of up to one year (which as a rule account for 100% of all deposits with agreed maturity in this sector) saw an increase of 0.10 percentage point to 0.31%.

Within interest rates on new loans to households, consumer credit recorded the most significant change in July. Interest rates on loans to non-financial corporations saw the largest change for loans of over CZK 30 million.

The overall interest rate on consumer credit, loans for house purchase and other loans increased by 0.20 percentage point to 3.24%. Consumer credit was remunerated at 7.53%, up by 0.22 percentage point. The interest rate on loans for house purchase rose by 0.09 percentage point to 2.28%. The rate on mortgage loans stood at 2.20%, up by 0.08 percentage point from June. The interest rate on building society loans decreased slightly, up by 0.01 percentage point to 3.54%. By contrast, the rate on other loans rose by 0.01 percentage point, to 2.90%. The interest rate on credit card loans declined by 0.10 percentage point month on month to 17.55%. The interest rate on overdrafts and revolving loans increased to 11.73%.

The interest rate on new loans to non-financial corporations (excluding overdrafts, revolving loans and credit cards) picked up by 0.15 percentage point to 1.49%. The rate on loans of up to CZK 7.5 million increased, up by 0.11 percentage point to 3.55%. Loans of over CZK 7.5 million and up to CZK 30 million were remunerated at 2.48%, i.e. 0.13 percentage point higher than in June. The interest rate on loans of over CZK 30 million rose by 0.15 percentage point, reaching 1.34%. Overdrafts, revolving loans and credit card loans were remunerated at 2.61%, up by 0.03 percentage point.

III.3.2 Interest rates on outstanding amounts

The average interest rates on outstanding amounts of household deposits remained unchanged in July, while the rates on deposits of non-financial corporations saw negligible changes.

As in June, total deposits of households were remunerated at 0.23%. The interest rate on overnight deposits stagnated further and stood at 0.09%. The interest rate on deposits redeemable at notice decreased marginally to 1.12% and the rate on deposits with agreed maturity was unchanged at 0.98%.

The interest rate on total deposits of non-financial corporations was 0.06%, unchanged from June. The interest rate on overnight deposits also remained unchanged at 0.04%. The interest rate on deposits with agreed maturity rose slightly to 0.38%.

Interest rates on outstanding amounts of loans to households changed by just a few basis points in July and interest rates on outstanding amounts of loans to non-financial corporations saw more significant changes.

The overall interest rate on loans to households dropped to 3.28%. The interest rate on loans for house purchase declined marginally to 2.40%. The interest rate on consumer credit and other loans decreased to 6.45%.

The average interest rate on outstanding amounts of loans to non-financial corporations rose to 2.68%. The interest rate on loans with maturity of up to one year saw an increase to 2.66%. The interest rate on loans with maturity of one to five years was up to 2.94%. The rate on loans with maturity of over five years also rose, reaching 2.59%.

III.4 COST-OF-BORROWING INDICATORS

The Czech National Bank has been publishing fully harmonised MIR statistics in accordance with Regulation ECB/2013/14 since January 2004. These statistics are used in the CNB's economic and monetary analyses and are reported to the ECB on a monthly basis. Over time, it has been found that in order to estimate the effectiveness of monetary policy pass-through across euro area and EU countries, it is necessary to use an accurate and comparable measure of the borrowing costs for non-financial corporations and households in those countries, in addition to the standard MIR indicators. For this reason, the euro area countries started to publish cost-of-borrowing indicators (CBI) in 2013. The CBIs were created to assess the effectiveness of monetary policy pass-through and economic forecasts and to compare economic conditions across the euro area countries. The Czech Republic voluntarily signed up to the publication of CBIs in June 2014.

The motive for implementing the CBIs was that aggregate indicators cannot be easily compiled for MIR statistics in some cases due to inhomogeneity in the definitions of the underlying instruments. For example, overdrafts² are recorded in the monthly statistics on new loan contracts ("new business"), but they have a higher periodicity and different characteristics. They cannot be left out if this segment is to be fully covered. Because of the difference in definitions, however, interest rates could previously be monitored only separately for individual instruments, not in aggregate form. The CBI calculation algorithm eliminates this shortcoming for certain instruments.

Four basic categories of underlying instruments were used to calculate the CBIs: interest rates on loans provided by banks to non-financial corporations and interest rates on loans provided by banks to households for house purchase. The MIR source statistics were used in two ways to construct the CBIs. Interest rates on long-term loans provided by banks to non-financial corporations and interest rates on short-term and long-term loans provided by banks to households for house purchase were obtained directly from the MIR statistics. In the case of interest rates on long-term loans provided by banks to non-financial corporations, two additional calculations had to be performed to make this aggregate indicator applicable. This involved accounting for the importance of overdrafts an important source of financing for firms and computing an estimate of the share of long-term loans with original and residual maturity of over one year and interest rate reset in the next twelve months, as these long-term loans are akin to short-term loans.

There are eight indicators: four basic ones and four derived ones. The basic indicators provide an assessment of the costs of borrowing broken down into short-term and long-term loans to households and non-profit organisations serving household for house purchase and to non-financial corporations. These four basic CBIs are used to compile the derived CBIs – short-term CBIs, long-term CBIs, CBIs for non-financial corporations as a whole and CBIs for households and non-profit institutions serving households as a whole. The CBIs cover CZK-denominated loans.

The CBIs are compiled on the basis of the existing MFI interest rate (MIR) and balance sheet statistics. The CBIs for households and non-profit institutions serving households (HH) are calculated using loans for house purchase (new business). Consumer credit and other loans are not included as their interest rates are too volatile across countries and thus not relevant for macroeconomic projections.

² Overdrafts are debit balances on current accounts, revolving loans and card credit.

III.5 TABLE 12 – DERIVED COST-OF-BORROWING INDICATORS IN THE CZECH REPUBLIC AND IRELAND

(in % p. a.)

	2020		2021					
	June		April		May		June	
	CZ	IE ⁵⁾	CZ	IE	CZ	IE	CZ	IE
(1) Households - total ^{1), 2)}	2.42	2.79	2.09	2.70	2.15	2.79	2.20	2.77
(2) Non-financial corporations - total	2.38	2.90	1.79	2.65	1.92	2.80	1.79	2.81
(3) Total short-term cost of borrowing ³⁾	2.25	2.84	1.72	2.67	1.78	2.81	1.74	2.81
(4) Total long-term cost of borrowing ⁴⁾	2.59	2.91	2.14	2.65	2.28	2.77	2.20	2.75

1) MFI interest rate statistics cover CZK-denominated loans only. The rates on outstanding amounts are the rates applied to end of period balances.

2) Households comprise the household sector (S.14) and non-profit institutions serving households (S.15) under ESA2010.

3) Short-term (ST) loans are loans with a floating rate or an initial rate fixation up to one year.

4) Long-term (LT) loans are loans with an initial rate fixation over one year.

5) IE = Ireland ([link](#) to data).

(in %)

Graph III.6 Long-term and short-term cost-of-borrowing indicators

(in %)

III.5.1 Recent developments in derived cost-of-borrowing indicators in the Czech Republic and Ireland

All cost-of-borrowing indicators (CBIs) were lower for Czech loans than for Irish loans in June 2021, with the differential exceeding 0.50 percentage point. No monitored CBI in the Czech Republic and Ireland recorded a year-on-year increase in June. Only one Irish and one Czech derived CBI increased in month-on-month terms. The Czech short-term CBI was the lowest in June. By contrast, the CBI for non-financial corporations and the short-term CBI in Ireland were the highest.

Compared to May, the cost of borrowing of Czech households rose by 0.05 percentage point. In Ireland, this CBI recorded a month-on-month decrease of 0.02 percentage point. In June, this CBI reached 2.20% in the Czech Republic and 2.77% in Ireland. The differential between this CBI in the Czech Republic and Ireland was 0.57 percentage point. In year-on-year terms, decreases of 0.22 percentage point and 0.02 percentage point respectively were recorded in the Czech Republic and Ireland.

The CBI for Czech non-financial corporations declined by 0.13 percentage point month on month to 1.79%, the largest month-on-month change among all the monitored CBIs in the Czech Republic and Ireland. In Ireland, this CBI was 2.81%, i.e. 1.02 percentage points higher than in the Czech Republic. This was the second biggest differential among all the monitored CBIs in the Czech Republic and Ireland. This CBI rose by 0.01 percentage point month on month in Ireland. In year-on-year comparison, this indicator declined by 0.09 percentage point in Ireland and by 0.59 percentage point in the Czech Republic. The year-on-year change in this Czech CBI was the largest among all the Czech and Irish CBIs.

The total short-term cost of borrowing, which comprises both households and non-financial corporations, decreased by 0.04 percentage point month on month to 1.74% in the Czech Republic. In Ireland, this indicator was 1.07 percentage points higher, the largest differential among all the monitored Czech and Irish CBIs. This indicator thus stood at 2.81% in Ireland. This CBI was flat month on month in Ireland. In year-on-year terms, decreases of 0.03 percentage point and 0.51 percentage point respectively were recorded in Ireland and in the Czech Republic. The year-on-year change in this Czech CBI was the second largest among all the Czech and Irish CBIs.

In the Czech Republic, the long-term cost of borrowing (comprising both households and non-financial corporations) fell by 0.08 percentage point to 2.20% in June, the second biggest month-on-month change among the monitored Czech and Irish CBIs. In Ireland, this CBI also recorded a month-on-month decrease, down by 0.02 percentage point. The long-term CBI in Ireland was 2.75%, i.e. 0.55 percentage point higher than in the Czech Republic. This was the smallest differential among all the monitored CBIs in the Czech Republic and Ireland. This CBI decreased by 0.39 percentage point year on year in the Czech Republic. In Ireland, it fell by 0.16 percentage point.

Comment: Investment Funds (IFs) represent Mutual and Investment Funds other than Money Market Funds which are residents in the Czech Republic. Funds of funds and funds of qualified investors are classified under the category of assets or funds in which they primarily invest. Data are published by the 15th calendar day of the second month following the reference period.

Graph IV.1 Balance sheet total – breakdown by asset items

(CZK billions)

IV.2 COMMENTARY ON TABLE 13

Commentary on the aggregated balance sheet of investment funds (Table 13): June 2021.

Net assets value: The net assets value of investment funds was CZK 671.7 billion at the end of June. This means an increase of CZK 8.2 billion compared to May (monthly transactions accounted for CZK +7.8 billion). Compared to the same period last year, the net assets value of investment funds rose by 18.5%. The biggest month-on-month change in the net assets value was recorded for mixed funds, up by CZK 2.8 billion to CZK 155.0 billion.

Investment in bonds: The value of bond holdings was CZK 164.3 billion at the end of June. Compared to the previous month, the total volume of bonds in the funds' portfolio increased by CZK 3.1 billion (monthly transactions accounted for CZK +2.9 billion). The proportion of debt securities in the funds' net assets value went up to 24.5% compared to the previous month.

Investment in equity securities: During the month under review, the volume of equity securities in the funds' portfolio increased. As of the end of the month, the value of holdings of equity securities amounted to CZK 342.5 billion, of which CZK 148.7 billion was investment in the shares and units of investment funds and CZK 193.8 billion was investment in shares and other equity. The value of equity securities grew by CZK 8.2 billion compared to May (monthly transactions accounted for CZK +3.4 billion). The share of equity securities in the funds' net assets value increased to 51.0% compared to the previous month.

Other investment: The value of funds invested in other assets decreased during the period under review. The total volume of other investment was CZK 208.2 billion in June, of which CZK 53.2 billion was fixed investment and CZK 67.7 billion investment in deposits. The ratio of other investment to the funds' net assets value fell to 31.0% compared to the previous month.

Reporting population: At the end of June 2021, a total of 596 resident investment funds were active in the Czech Republic, of which 62 were equity funds, 61 bond funds, 77 mixed funds, 97 real estate funds, 295 other funds and four funds without an investment policy.

Comment: Financial corporations engaged in lending - corporations classified within sector other financial intermediaries which are predominantly engaged in granting credit or loans or entering into agreements of similar nature, for example financial leasing, factoring, consumer credit, hire purchase, etc., (see Decree No. 314/2013 Coll.).

V.4 COMMENTARY ON TABLES 14 – 15

Commentary on the aggregated balance sheet of financial corporations engaged in lending (Tables 14 – 15): June 2021.

Financial corporations engaged in lending had total assets of CZK 420.8 billion as of 30 June 2021, up by CZK 0.7 billion in quarter-on-quarter terms. Compared to 2020 Q2, total assets fell by CZK 1.9 billion (or 0.5%) year on year.

The largest asset item was loans provided, amounting to CZK 325.0 billion, of which CZK 318.6 billion was provided to residents. Compared to the previous quarter, total loans provided rose by CZK 2.2 billion in 2021 Q2. Loans remained broadly flat in year-on-year terms.

The largest part of loans provided to residents consisted of loans to non-financial corporations amounting to CZK 255.2 billion, i.e. 80.1% of loans to residents. Compared to the previous quarter, loans to non-financial corporations grew by CZK 3.5 billion. In year-on-year terms, they increased by CZK 4.4 billion.

The second largest category of loans to residents consisted of loans to households, totalling CZK 59.9 billion. They were down by CZK 0.4 billion compared to the previous quarter. These loans account for 18.8% of loans granted to residents.

VI. GLOSSARY

Harmonisation of statistics: the Treaty establishing the European Community tasked the European Central Bank (ECB) with ensuring harmonised statistics according to Article 5 of the Statute of the European System of Central Banks. The national central banks of EC Member States therefore collect statistical information according to a uniform definition, from which the ECB then compiles aggregate data for euro area monetary policy. Although Council Regulation No 2533/98, which specifies the requirements for statistical data collection, only concerns euro area countries, the ECB also receives full data sets from the non-participating countries (e.g. the Czech Republic) in order to monitor their economic and financial development.

Monetary statistics: financial macrostatistics of constituent sub-sectors of the sector S.12 based exclusively on the “host country” principle. According to this principle, a resident reporting unit is an institution resident in a given economic territory. The reporting population includes

- 1) institutions incorporated and located in the territory, including subsidiaries of parent companies located outside that territory,
- 2) branches of institutions that have their head office outside that territory.

APRC: annual percentage rate of charge, i.e. the rate including interest expenses and all related costs of the credit to the client (fees etc.).

Investment funds: for the purposes of monetary and banking statistics, investment funds comprise investment funds other than money market funds which are resident in the Czech Republic. These are undertakings the sole object of which is collective investment, i.e. pooling investor funds and investing them under conditions stipulated in the Act on Management Companies and Investment Funds (No. 240/2013 Coll.). Such undertakings may be constituted under the Act either as unit trust managed by an investment company or as investment funds.

Consolidated balance sheet of the MFI sector: the basic statistical tool of monetary statistics. It is based on the residency principle and is obtained by netting out inter-MFI positions on their aggregated balance sheet.

Consumer credit: loans granted to households for personal use in the consumption of goods and services.

Contribution to annual growth rate: the growth rate of a selected component weighted by its share in the total growth rate.

Deposits redeemable at notice: deposits that can be withdrawn by clients only after the expiry of a period of notice agreed in advance, which starts at the moment of notification of the intention to withdraw the deposit.

Deposits with agreed maturity: deposits that cannot be withdrawn by clients before a predefined maturity.

Financial corporations engaged in lending (FCLs): FCLs mean corporations classified within sector S.125 other financial intermediaries which are predominantly engaged in granting credit or loans or entering into agreements of similar nature, for example financial leasing, factoring, consumer credit, hire purchase, etc. (see Decree No. 314/2013 Coll.)

Type of services:

- 1) financial leasing – it is financial service, when lessee acquires the right to use good in exchange for rental payment over predetermined term. All risk and rewards of ownership are transferred from lessor to lessee. After lapse of predetermined term ownership of good is transferred from lessor to lessee.
- 2) factoring – it is financial service consisting in purchase of short-term receivables (with maturity 30-90 days) before their maturity date. Receivables are transferred on factoring company – factor- by supplier of goods or services.
- 3) other lending – this category encompasses granting credit or loans or agreements of similar nature different from financial leasing and factoring. It deals especially with consumer credit, hire purchase, consumption loans, etc.

Growth rate: the percentage change in the monitored variable over the reference period, calculated from the volumes of monthly financial transactions and the outstanding amounts at the beginning of each month.

Household sector: institutional units included in the sectors of households (S.14) and non-profit institutions serving households (S.15) under ESA2010.

Housing loans: loans granted to households for the purpose of purchasing/investing in housing, including building and home improvements.

Interest rate fixation: a period of interest rate fixation, i.e. a period at the beginning of a contract for which the agreed interest rate cannot be changed. Period up to 1 year includes floating rates.

MFI longer-term financial liabilities: comprise deposits with an agreed maturity of over two years, deposits redeemable at a period of notice of over three months, debt securities issued with an original maturity of more than two years and the capital and reserves of the Czech MFI sector.

Monetary aggregates: comprise the monetary liabilities of monetary financial institutions to non-MFI Czech residents except central government. The narrow monetary aggregate M1 includes currency in circulation (excluding cash at banks' cash desks) and overnight deposits. The intermediate monetary aggregate M2 comprises M1, deposits redeemable at a period of notice of up to and including three months and deposits with a maturity of up to and including two years. The broad monetary aggregate M3 comprises M2, money market fund shares/units, debt securities with a maturity of up to two years and repurchase agreements.

Monetary financial institutions (MFIs): financial institutions forming the money-issuing sector. Under Community law, these include the central bank, resident credit institutions, and all other resident financial institutions whose business is to receive deposits and/or close substitutes for deposits from entities other than MFIs and, for their own account (at least in economic terms), to grant credit and/or invest in securities. In the Czech Republic, MFIs include the central bank, banks, money market funds and credit unions.

Money-holding sector: all residents' institutional units except central government (S.1311) and monetary financial institutions (S.121, S.122 and S.123) under ESA2010.

Money-issuing sector: all institutional units included in the sectors of the central bank (S.121) and other monetary financial institutions (S.122 and S.123) under ESA2010.

Money-neutral sector: an institutional sector comprising the central government sector (S.1311) under ESA2010.

Money market funds (MMFs): are collective investment undertakings that have been authorised pursuant to Article 4 of Regulation (EU) 2017/1131 of the European Parliament and of the Council³ and that issue shares/units which are close substitutes for deposits.

Net external assets: comprise external assets of Czech MFIs (such as monetary gold, non-koruna banknotes, securities issued by non-residents and loans granted to non-residents) minus external liabilities of the Czech MFI sector (such as non-residents' holdings of deposits, repurchase agreements, money market fund shares and units, and debt securities with a maturity of up to and including two years issued by MFIs and held by non-residents).

Non-MFIs: all resident sectors excluding MFIs, i.e. general government (S.13), non-financial corporations (S.11), financial institutions other than MFIs (S.124, S.125, S.126, S.127, S.128, and S.129) and households and non-profit institutions serving households (S.14 and S.15) under ESA2010.

Other financial intermediaries (OFIs): entities included in the sectors of other financial intermediaries except insurance corporations and pension funds (S. 125), financial auxiliaries (S.126), captive financial institutions and money lenders (S.127), insurance corporations (S.128), and pensions funds (S.129) under ESA2010.

Private sector: a sector comprising all institutional sectors except general government (S.13) and monetary financial institutions (S.121, S.122 and S.123) under ESA2010.

Rates on new business: interest rates agreed by the bank and the client for all agreements negotiated during the reference period.

Rates on outstanding amounts: interest rates applied to end-of-period balances.

³ Regulation (EU) 2017/1131 of the European Parliament and of the Council of 14 June 2017 on money market funds.

Reclassifications: comprise any changes in the MFI balance sheet resulting from changes in the reporting population, corporate restructuring, reclassifications of assets and liabilities, and corrections of reported errors.

Residents: all domestic and foreign legal entities and natural persons, including branches of foreign banks and foreign owners of buildings and land, whose centre of economic interest is in the given territory. Foreign legal entities and natural persons are considered residents after at least one year of economic activity in the territory, with the exception of foreign bank branches and owners of buildings and land, who become residents at the moment they perform a valid legal act (in the case of foreign owners of buildings and land, this only applies in connection with transactions relating to the building or land in question).

Transaction (flow) data: values related to the whole period which are calculated as the difference between the balances at the end of the current and the previous period adjusted for non-transaction effects, i.e. effects connected with reclassifications, valuation changes and exchange rate variations over the period. These factors result in breaks in time series, thereby affecting the comparability of end-of-period balances. Transaction (flow) data only reflect those changes that arise from transactions, i.e. from accepting financial assets or providing financial liabilities.

Unit trusts other than money market funds:

- 1) Equity funds – funds investing mainly in shares and other equity.
- 2) Bond funds – funds investing mainly in securities other than shares.
- 3) Mixed funds – funds investing in equity and debt securities without a clear preference for either approach.
- 4) Real estate funds – funds investing mainly in real estate.
- 5) Hedge funds – funds applying more or less unlimited investment strategies in order to achieve positive absolute yields, whose managers are remunerated based on the fund's performance in addition to their salary.
- 6) Other funds – investment funds other than equity funds, bond funds, mixed funds, real estate funds or hedge funds.

Funds of funds and funds of qualified investors are classified under the aforementioned categories according to their investment strategies.

VII. TECHNICAL NOTES

VII.1 CALCULATION OF GROWTH RATES

The growth rate for the reference period is calculated from the volumes of monthly financial transactions and the outstanding amounts at the beginning of each month. Monthly transactions are calculated from differences in outstanding amounts adjusted for reclassifications, other revaluations, exchange rate variations and other changes which do not arise from transactions. This data thus reflects only those changes that arise from accepting financial assets or providing financial liabilities. Reclassifications and other non-transaction corrections are introduced into the transaction statistics to preserve the comparability of the gradual monitoring results, thereby enabling calculation of the indices of expected outstanding balances of the monitored variables and determination of their growth rates.

VII.1.1 Method of calculation

- 1) The month-on-month percentage change a_t^M for month t is calculated as: $a_t^M = \left(\frac{F_t^M}{L_{t-1}} \right) * 100$
- 2) The annual growth rate for month t , i.e. the change for the last 12 months ending with month t , is calculated as the product of the twelve coefficients for each previous month: $a_t = \left[\prod_{i=0}^{11} \left(1 + \frac{F_{t-i}^M}{L_{t-1-i}} \right) - 1 \right] * 100$, where

$$F_t^M = (L_t - L_{t-1}) - C_t^M - E_t^M - V_t^M,$$

F_t^M – transactions in month t ,

L_t – outstanding amount at the end of month t ,

C_t^M – reclassifications in month t ,

E_t^M – exchange rate variations in month t ,

V_t^M – valuation changes in month t .

The calculation of the annual growth rate from the month-on-month growth rates thus enables transaction changes and non-transaction effects in the individual months to be taken into account.

- 3) Growth rates for other reference periods are derived from formula (2).

VII.2 CALCULATION OF THE CONTRIBUTION TO THE ANNUAL GROWTH RATE OF A MONITORED VARIABLE (E.G. M3)

If $a_t(M3)$ represents the annual growth rate of M3 for the year ending with month t , and $F_{t-i}(M1)$, $F_{t-i}(M3 - M2)$ and $F_{t-i}(M2 - M1)$ are the monthly transactions of the components M1, M2-M1 and M3-M2 in month $t-i$, the contribution of M1 to the annual growth rate of M3, for example, is calculated as: $\frac{\sum_{i=0}^{11} F_{t-i}(M1)}{\sum_{i=0}^{11} [F_{t-i}(M1) + F_{t-i}(M2 - M1) + F_{t-i}(M3 - M2)]} * a_t(M3)$.
