I.4 COMMENTARY ON TABLES 1 – 2

Commentary on key interest rates (Table 1) and financial market interest rates (Table 2): January 2024.

I.4.1 Key interest rates

All the rates of the Czech National Bank (CNB) were changed on the basis of the CNB Bank Board's decision with effect from 9 February 2024. They were all lowered by 0.50 percentage point. Specifically, the two-week repo rate fell to 6.25%, the discount rate to 5.25% and the Lombard rate to 7.25%. The key interest rate of the European Central Bank (ECB) was raised to 4.50% in September 2023. The ECB's Lombard rate also increased by 0.25 percentage point (to 4.75%) as of the same date as the ECB's key rate. The ECB's discount rate rose by the same amount to 4.00%.

I.4.2 Financial market interest rates

All the four monitored interest rates on the Czech interbank deposit market fell month on month in January. The 1M PRIBOR recorded the smallest decrease, down by 0.19 percentage point to 6.79%. The 3M PRIBOR dropped from 6.97% in December to 6.63% in January. The 6M PRIBOR declined by 0.44 percentage point to 6.27%. The 1Y PRIBOR recorded the largest decrease, down by 0.72 percentage point to 5.47%. The CZEONIA interest rate (i.e. the rate on unsecured O/N deposits placed by banks and foreign bank branches on the interbank market, including deposits placed in the CNB's deposit facility) picked up by 0.06 percentage point to 6.29%.

The monitored interest rates on the Czech capital market recorded similar changes as on the interbank deposit market between December and January. The yield on the 2Y Czech bond fell by 0.40 percentage point to 4.21%. The yield on the 5Y bond decreased by 0.17 percentage point to 3.79% and that on the 10Y bond also declined, down by 0.09 percentage point to 3.88%. The yield on the 2Y euro area bond edged up by 0.01 percentage point to 2.83%. The yield on the 5Y euro area bond increased by 0.07 percentage point to 2.64%. The yield on the 10Y bond rose slightly by 0.03 percentage point to 2.90%. The largest differential between Czech and euro area bond yields was recorded for the 2Y bond, reaching 1.38 percentage points.

1) Monetary aggregates comprise monetary liabilities of MFIs vis-à-vis non-MFI Czech residents excluding central government. M1 is the sum of currency in circulation and overnight deposits; M2 is the sum of M1, deposits with an agreed maturity of up to two years and deposits redeemable at notice of up to three months; and M3 is the sum of M2, repurchase agreements, money market fund shares/units and debt securities up to two years.

2) Including all resident sectors without general government (S.13) and MFIs sector (S.121, S.122 and S.123 according to ESA2010).

3) Net foreign assets (NFA) represent balance of financial claims and liabilities of the MFI sector vis-à-vis non-residents.

4) Net value of flow data calculated by adjusting the difference between end-of-period levels for the effect of non-transactions-related factors.

II.9 COMMENTARY ON TABLES 3 – 9

Commentary on monetary developments statistics¹ (Tables – 9): January 2024.

The evolution of the annual rate of growth of M3 was characterised by a slight increase or stagnation from January 2023 (6.7% in December 2022) to June 2023 (10.2%). This trend halted in July 2023 when the annual growth rate of M3 declined by 0.4 percentage point month on month. In August, the annual growth rate saw a further modest decline, down by 0.1 percentage point to 9.7%. It recorded a sharper decrease of 1.6 percentage points to 8.1% in September. It remained at this level in October. In the last two months of 2023, the annual rate of growth started to increase gradually, to 9.5% in December. By contrast, the annual growth rate recorded a decrease of 0.8 percentage points to 8.7% in January 2024. As a result of financial transactions, M3 rose by CZK 177.3 billion month on month in January 2024 (up by CZK 538.0 billion year on year), reaching CZK 6,715.7 billion.

II.9.1 Main components of M3

In January 2024, all except one of the individual components of the annual rate of growth of M3 were the same as in the previous month. The contribution of currency in circulation (0.0 percentage point in December 2023 and in January 2024), the contribution of overnight deposits (2.9 percentage points in December 2023 and January 2024) and the contribution of other short-term deposits (5.2 percentage points in December 2023 and January 2024) remained flat. Only the contribution of short-term marketable instruments decreased slightly (from 1.4 percentage points in December 2023 to 0.6 percentage points in January 2024).

Owing to financial transactions, overnight deposits increased month on month (by 0.6%, or CZK 27.9 billion) in January 2024. The largest increases were recorded for deposits of insurance corporations and pension funds and deposits of other government (up by 5.4%, or CZK 1.2 billion, and by 5.0%, or CZK 14.3 billion respectively). The growth was also due to deposits of households and non-financial corporations (up by 0.6%, or CZK 15.3 billion and by 0.2%, or CZK 2.6 billion respectively). Only deposits of other financial intermediaries dampened the increase, as they recorded a decline (down by 4.5%, or CZK 5.6 billion).

Other short-term deposits (excluding overnight deposits) also increased month on month (by 10.4%, or CZK 139.0 billion) in January 2024, due to financial transactions. This was due mainly to a sharp increase in deposits of other government (up by 116.8%, or CZK 83.3 billion). However, increases were also recorded for deposits of non-financial corporations (up by 6.0%, or CZK 21.4 billion), households (up by 4.5%, or CZK 32.7 billion) and other financial intermediaries (up by 1.1%, or CZK 1.9 billion). Only deposits of insurance corporations and pension funds saw a slight decrease (down by 2.2%, or CZK 0.3 billion). The annual growth rate of other short-term deposits decreased further by 2.7 percentage points to 27.8% in January. The annual growth rate decreased for deposits with agreed maturity of up to two years (by 3.5 percentage points to 33.8%) and for the annual growth rate of deposits redeemable at notice of up to 3 months (by 0.2 percentage points to 0.4%).

Marketable instruments, which consist of repos, money market fund shares/units and debt securities with maturities of up to two years, increased by CZK 17.9 billion in January 2024, to CZK 234.8 billion.

II.9.2 Main counterparts of M3

The annual rate of growth of loans to the private sector, which are the most important counterpart of M3, stood at 5.3% in January 2024 (down by 0.7 percentage point month on month). The annual growth rate of loans to non-financial corporations, a major component of this indicator, also declined in January, down by 2.8 percentage points to 5.6%. The annual growth rate of loans to households, another major component, decreased gradually or remained flat from March 2022 (10.5%) to March 2023 (5.4%). It rose by 0.8 percentage point month on month to 6.2% in April 2023 (an extraordinary effect due to the purchase of the loan portfolio of Sberbank CZ, a.s. v likvidaci). The rate decreased again in May and continued to fall, reaching 4.9% in September. The annual growth rate deviated only slightly from this level in the following four months, reaching 5.0% in January 2024.

As regards liabilities of monetary financial institutions, decreases were recorded for the annual growth rate of deposits of central government (from 3.9% in December 2023 to -6.5% in January 2024), while the annual growth rate of longer-term financial liabilities increased (from 2.3% in December 2023 to 3.0% in January 2024). As regards assets of

¹ All increases and decreases referred to in this commentary relate only to financial transactions adjusted for non-transaction effects.

monetary financial institutions, decreases were also recorded for the annual growth rate of loans provided to the government sector and purchased securities (from 18.6% in December 2023 to 13.1% in January 2024) and for the growth rate of net foreign assets (from 5.2% in December 2023 to 4.2% in January 2024).

Comment: The interest rates applied by MFIs to CZK-denominated deposits and loans vis-à-vis households and non-financial corporations resident in the Czech Republic. New business refers to any new agreement between the customer and the MFI within given period.

- 1) Including households (S.14) and non-profit institutions serving households (S.15) according to the classification ESA2010.
- 2) For this instrument category the new business are equal to the outstanding amounts (end-of-period stocks).
- 3) Households deposits redeemable at notice include similar deposits of non-financial corporations of which volumes are negligible in this category.
- 4) Since 2019, the amendment to Act No. 190/2004 Coll., on Bonds, as amended, has been fully applied, under which a mortgage loan is a loan, which is secured at least partly by lien (right of pledge) over real estate (property).
- 5) Debit balances on current accounts. The total amount owed by the borrower is included, irrespective of whether is within or beyond any limit agreed beforehand.
- 6) The initial period of fixations is a predetermined period of time at the start of the contract during which the value of the interest rate cannot change. Period up to 3 months includes floating rates.
- 7) Annual percentage rate of charge (APRC) covers total costs of the credit to the client including charges etc.

Comment: The interest rates that are applied by MFIs to CZK-denominated deposits and loans vis-à-vis households and non-financial corporations resident in the Czech Republic. Interest rates on outstanding amounts refer to the stock of all deposits and all loans at a specific moment.

1) Including households (S.14) and non-profit institutions serving households (S.15) according to the classification ESA2010.

2) Including overnight deposits and deposits redeemable at notice presented in Table 10. For this instrument category, new business and outstanding amounts coincide.

3) Since 2019, the amendment to Act No. 190/2004 Coll. on Bonds, as amended, has been fully applied, under which a mortgage loan is a loan, which is secured at least partly by lien (right of pledge) over real estate (property).

4) Consumer credit and other lending include bank overdrafts, revolving loans and credit cards presented in Table 10.

Graph III.4 Interest rates of monetary financial institutions on outstanding amounts (outstanding amounts, loans)

III.3 COMMENTARY ON TABLES 10 – 11

Commentary on monetary financial institutions interest rates (Tables 10 – 11): January 2024.

III.3.1 Interest rates on new business

In January, interest rates on new deposits of households recorded the largest change for overnight deposits. The rate on overnight deposits of households rose by 0.10 percentage point to 1.70%. The interest rate on current account deposits stayed at 0.27%. The rate on deposits with agreed maturity decreased to 5.67%. The rate on deposits redeemable at notice dropped to 2.77% (this rate is the only one to include, in addition to the household sector, also similar deposits of non-financial corporations, whose volumes are negligible in this category).

The interest rate on overnight deposits of non-financial corporations increased by 0.57 percentage point to 2.14%. The rate on current account deposits grew to 1.20%. Deposits with agreed maturity of up to one year (which as a rule account for 100% of all deposits with agreed maturity in this sector) remained flat at 6.10%.

Within interest rates on new loans to households, other loans recorded the biggest change in January. Interest rates on loans to non-financial corporations saw the largest change for loans of up to CZK 7.5 million.

The overall interest rate on consumer credit, loans for house purchase and other loans to households rose to 6.69%. Consumer credit was remunerated at 9.23%, down by 0.06 percentage point. The interest rate on loans for house purchase decreased by 0.15 percentage point to 5.26%. The rate on mortgage loans stood at 5.12%, down by 0.19 percentage point from December. Building society loans were remunerated at a lower rate, down by 0.16 percentage point to 6.67%. The rate on other loans rose by 0.33 percentage point to 6.47%. The interest rate on overdrafts and revolving loans increased by 0.04 percentage point to 15.56%. The rate on credit card loans increased by 0.09 percentage point month on month to 17.27%.

The interest rate on new loans to non-financial corporations (excluding overdrafts, revolving loans and credit cards) decreased by 0.10 percentage point to 8.07%. The rate on loans of up to CZK 7.5 million increased, up by 0.35 percentage point to 8.11%. Loans of over CZK 7.5 million and up to CZK 30 million were remunerated at 7.64%, i.e. 0.01 percentage point lower than in December. The interest rate on loans of over CZK 30 million declined by 0.14 percentage point, reaching 8.13%. The interest rate on overdrafts, revolving loans and credit card loans fell by 0.10 percentage point to 8.61%.

III.3.2 Interest rates on outstanding amounts

The average interest rates on outstanding amounts of deposits of households changed by just a few basis points in January. More pronounced changes were recorded for non-financial corporations.

Total deposits of households were remunerated at 2.31%, representing an increase compared to December. The interest rate on overnight deposits picked up to 1.70%. The interest rate on deposits redeemable at notice fell to 2.77% and the rate on deposits with agreed maturity increased to 4.33%.

The interest rate on total deposits of non-financial corporations grew to 3.26%. The interest rate on overnight deposits increased, reaching 2.14%. The interest rate on deposits with agreed maturity rose slightly to 5.92%.

Interest rates on outstanding amounts of loans to households changed by just a few basis points in January. Rates on outstanding amounts of loans to non-financial corporations recorded larger changes.

The overall interest rate on loans to households increased to 4.12%. The rate on loans for house purchase also grew, reaching 3.23%. The interest rate on consumer credit and other loans was unchanged at 7.32%.

The average interest rate on outstanding amounts of loans to non-financial corporations declined to 7.27%. The rate on loans with maturity of up to one year decreased to 8.82%. The interest rate on loans with maturity of over one year and up to five years dropped to 8.39%. The rate on loans with maturity of over five years decreased to 6.30%.

III.4 COST-OF-BORROWING INDICATORS

The Czech National Bank has been publishing fully harmonised MIR statistics in accordance with Regulation ECB/2013/14 since January 2004. These statistics are used in the CNB's economic and monetary analyses and are reported to the ECB on a monthly basis. Over time, it has been found that in order to estimate the effectiveness of monetary policy pass-through across euro area and EU countries, it is necessary to use an accurate and comparable measure of the borrowing costs for non-financial corporations and households in those countries, in addition to the standard MIR indicators. For this reason, the euro area countries started to publish cost-of-borrowing indicators (CBI) in 2013. The CBIs were created to assess the effectiveness of monetary policy pass-through and economic forecasts and to compare economic conditions across the euro area countries. The Czech Republic voluntarily signed up to the publication of CBIs in June 2014.

The motive for implementing the CBIs was that aggregate indicators cannot be easily compiled for MIR statistics in some cases due to inhomogeneity in the definitions of the underlying instruments. For example, overdrafts² are recorded in the monthly statistics on new loan contracts ("new business"), but they have a higher periodicity and different characteristics. They cannot be left out if this segment is to be fully covered. Because of the difference in definitions, however, interest rates could previously be monitored only separately for individual instruments, not in aggregate form. The CBI calculation algorithm eliminates this shortcoming for certain instruments.

Four basic categories of underlying instruments were used to calculate the CBIs: interest rates on loans provided by banks to non-financial corporations and interest rates on loans provided by banks to households for house purchase. The MIR source statistics were used in two ways to construct the CBIs. Interest rates on long-term loans provided by banks to non-financial corporations and interest rates on short-term and long-term loans provided by banks to households for house purchase were obtained directly from the MIR statistics. In the case of interest rates on long-term loans provided by banks to non-financial corporations, two additional calculations had to be performed to make this aggregate indicator applicable. This involved accounting for the importance of overdrafts an important source of financing for firms and computing an estimate of the share of long-term loans with original and residual maturity of over one year and interest rate reset in the next twelve months, as these long-term loans are akin to short-term loans.

There are eight indicators: four basic ones and four derived ones. The basic indicators provide an assessment of the costs of borrowing broken down into short-term and long-term loans to households and non-profit organisations serving household for house purchase and to non-financial corporations. These four basic CBIs are used to compile the derived CBIs – short-term CBIs, long-term CBIs, CBIs for non-financial corporations as a whole and CBIs for households and non-profit institutions serving households as a whole. The CBIs cover CZK-denominated loans.

The CBIs are compiled on the basis of the existing MFI interest rate (MIR) and balance sheet statistics. The CBIs for households and non-profit institutions serving households (HH) are calculated using loans for house purchase (new business). Consumer credit and other loans are not included as their interest rates are too volatile across countries and thus not relevant for macroeconomic projections.

² Overdrafts are debit balances on current accounts, revolving loans and card credit.

III.5 TABLE 12 – DERIVED COST-OF-BORROWING INDICATORS IN THE CZECH REPUBLIC AND FRANCE

(in % p. a.)

	2022		2023					
	December		October		November		December	
	CZ	FR ⁵⁾	CZ	FR	CZ	FR	CZ	FR
(1) Households - total ^{1), 2)}	4.85	2.05	5.40	3.43	5.40	3.52	5.38	3.60
(2) Non-financial corporations - total	8.99	3.14	8.69	4.83	8.77	4.89	8.33	4.86
(3) Total short-term cost of borrowing ³⁾	9.14	3.12	8.90	4.92	8.94	4.91	8.59	4.93
(4) Total long-term cost of borrowing ⁴⁾	5.18	2.45	5.65	3.91	5.73	4.07	5.55	4.06

1) MFI interest rate statistics cover CZK-denominated loans only. The rates on outstanding amounts are the rates applied to end of period balances.

2) Households comprise the household sector (S.14) and non-profit institutions serving households (S.15) under ESA2010.

3) Short-term (ST) loans are loans with a floating rate or an initial rate fixation up to one year.

4) Long-term (LT) loans are loans with an initial rate fixation over one year.

5) FR = France ([link](#) to data).

(in %)

Graph III.6 Long-term and short-term cost-of-borrowing indicators

(in %)

III.5.1 Recent developments in derived cost-of-borrowing indicators in the Czech Republic and France

All monitored cost-of-borrowing indicators (CBIs) were higher for Czech loans than for French loans in December 2023, with the differential exceeding 2.50 percentage points on average. Only two Czech CBIs of all CBIs monitored in the Czech Republic and France recorded a year-on-year decrease in December. Conversely, only two French CBIs of all CBIs monitored in the Czech Republic and France rose in month-on-month terms. The French CBI for households was the lowest in December. By contrast, the short-term CBI in the Czech Republic was the highest.

Compared to November, the cost of borrowing of Czech households dropped by 0.02 percentage point, the second lowest month-on-month differential among all the monitored CBIs in the Czech Republic and France. In France, this CBI was up by 0.08 percentage point month on month. In December, this CBI reached 5.38% in the Czech Republic and 3.60% in France. The differential between this CBI in the Czech Republic and France was 1.78 percentage points. In year-on-year terms, increases of 0.53 percentage points and 1.55 percentage point respectively were recorded in the Czech Republic and France.

The borrowing costs of non-financial corporations in the Czech Republic saw a month-on-month decline of 0.44 percentage point to 8.33%. The month-on-month change in this CBI in the Czech Republic was the largest among all the Czech and French CBIs. The CBI for French non-financial corporations was 4.86%, i.e. 3.47 percentage points lower than in the Czech Republic. This French CBI fell by 0.03 percentage point month on month. In year-on-year terms, this indicator increased by 1.72 percentage point in France and by fell by 0.66 percentage point in the Czech Republic. The year-on-year change in this CBI in France was the second largest among all the Czech and French CBIs.

The total short-term cost of borrowing, which comprises both households and non-financial corporations, decreased by 0.35 percentage point month on month to 8.59% in the Czech Republic. This was the second largest monthly change among all the monitored CBIs in the Czech Republic and France. In France, this CBI was 3.66 percentage point lower. This was the largest differential among all the monitored CBIs in the Czech Republic and France. This indicator thus stood at 4.93% in France. The month-on-month increase in this French CBI was 0.02 percentage point, the second smallest monthly change among all the monitored CBIs in the Czech Republic and France. In year-on-year terms, an increase of 1.81 percentage points was recorded in France, whereas a decrease of 0.55 percentage point was recorded in the Czech Republic. The year-on-year change in this CBI in France was the largest among all the Czech and French CBIs.

In the Czech Republic, the long-term cost of borrowing (comprising both households and non-financial corporations) decreased by 0.18 percentage point month on month to 5.55% in December. The month-on-month decrease in this French CBI was 0.01 percentage point, the lowest monthly change among all the monitored CBIs in the Czech Republic and France. The long-term CBI in France was 4.06%, i.e. 1.49 percentage points lower than the Czech CBI. This was the smallest differential among all the monitored CBIs in the Czech Republic and France. This CBI increased by 0.37 percentage point year on year in the Czech Republic. In France, it rose by 1.61 percentage points.

Comment: Investment Funds (IFs) represent Mutual and Investment Funds other than Money Market Funds which are residents in the Czech Republic. Funds of funds and funds of qualified investors are classified under the category of assets or funds in which they primarily invest. Data are published by the 15th calendar day of the second month following the reference period.

Graph IV.1 Balance sheet total – breakdown by asset items

(CZK billions)

IV.2 COMMENTARY ON TABLE 13

Commentary on the aggregated balance sheet of investment funds (Table 13): December 2023.

Net assets value: The net assets value of investment funds was CZK 1,189.9 billion at the end of December. This means an increase of CZK 32.9 billion compared to November (monthly transactions accounted for CZK +14.1 billion). Compared to the same period last year, the net assets value of investment funds rose by 32.6%. The biggest month-on-month change in the net assets value was recorded for bond funds, up by CZK 12.5 billion to CZK 357.7 billion.

Investment in bonds: The value of bond holdings was CZK 262.3 billion at the end of December. Compared to the previous month, the total volume of bonds in the funds' portfolio increased by CZK 13.8 billion (monthly transactions accounted for CZK +8.3 billion). The proportion of debt securities in the funds' net assets value went up to 22% compared to the previous month.

Investment in equity securities: During the month under review, the volume of equity securities in the funds' portfolio increased. As of the end of the month, the value of holdings of equity securities amounted to CZK 579.6 billion, of which CZK 204.8 billion was investment in the shares and units of investment funds and CZK 374.8 billion was investment in shares and other equity. The value of equity securities grew by CZK 17.3 billion compared to November (monthly transactions accounted for CZK +1.0 billion). The share of equity securities in the funds' net assets value increased to 48.7% compared to the previous month.

Other investment: The value of funds invested in other assets decreased during the period under review. The total volume of other investment was CZK 437.3 billion in December, of which CZK 70.3 billion was fixed investment and CZK 158.3 billion investment in deposits. The proportion of other investment in the funds' net assets value fell to 36.8% compared to the previous month.

Reporting population: At the end of December 2023, a total of 827 resident investment funds were active in the Czech Republic, of which 92 were equity funds, 73 bond funds, 77 mixed funds, 138 real estate funds, 428 other funds and 19 funds without an investment policy.

Data are published by the last working day of the second month following the reference period.

V.4 COMMENTARY ON TABLES 14 – 15

Commentary on the aggregated balance sheet of financial corporations engaged in lending (Tables 14 – 15): December 2023.

Financial corporations engaged in lending had total assets of CZK 485.4 billion as of 31/12/2023, up by CZK 16.7 billion in quarter-on-quarter terms. Compared to 2022 Q4, total assets increased by CZK 44.5 billion (or 10.1%) year on year.

The largest asset item was loans provided, amounting to CZK 385.5 billion, of which CZK 379.7 billion was provided to residents. Compared to the previous quarter, total loans provided rose by CZK 13.1 billion in 2023 Q4. In year-on-year terms, they increased by CZK 36.4 billion.

The largest part of loans provided to residents consisted of loans to non-financial corporations amounting to CZK 307.6 billion, i.e. 81.0% of total loans to residents. Compared to the previous quarter, loans to non-financial corporations grew by CZK 12.4 billion. In year-on-year terms, they increased by CZK 34.1 billion.

The second largest category of loans to residents consisted of loans to households, totalling CZK 68.6 billion. These loans accounted for 18.1% of loans granted to residents.

(in thousands)

VI.2 COMMENTARY ON TABLE 16

Commentary on the aggregated balance sheet of pension funds (Table 16): September 2023.

At the end of September 2023, a total of 44 resident pension funds were active in the Czech Republic, 8 of them transformed funds and 36 participation funds.

The balance sheet total of pension funds amounted to CZK 607.6 billion as of 30 September 2023. This represents a decrease of CZK 0.2 billion compared with the previous quarter. Quarterly transactions stood at CZK -2.5 billion. Compared with the same period last year, the balance sheet total rose by CZK 21.8 billion (or 3.7%) year on year.

Debt securities had the largest share in the structure of pension funds' assets (75.8%). They stood at CZK 460.6 billion at the end of September, a decrease of CZK 2.7 billion compared with the previous quarter. Investments in government bonds accounted for CZK 417.6 billion and investments in bonds of monetary financial institutions for CZK 21.5 billion of the total volume of bonds. As regards the country of the issuer, bonds issued by Czech entities are predominant. Their share in total bonds held was slightly above 90% in the period under review. Deposits and loans provided are another important item on the asset side. They decreased to CZK 95.4 billion in the period under review. This represents 15.7% of total assets.

Equity securities grew by CZK 3.3 billion to CZK 45.8 billion in the period under review. Quarterly transactions amounted to CZK 3.2 billion. Listed shares accounted for CZK 18.7 billion, unlisted shares for CZK 0.4 billion and investment fund shares and units for CZK 26.7 billion of total equity securities.

Pension entitlements, i.e. the capital that pension funds hold in order to meet the future pension claims of their participants, are the largest item on the liabilities side. They amounted to CZK 584.6 billion as of 30 September 2023, a decrease of CZK 4.7 billion compared with the previous quarter and an increase of CZK 9.5 billion on a year earlier.

Resident pension funds had 4,404,683 members at the end of 2022, of which 4,360,068 were active members, 16,228 deferred members and 28,387 retired members. The total number of members dropped by 41,284 compared with 2021. The number of members in transformed funds fell by 214,952, while the number of members in participation funds rose by 173,668.

VII. GLOSSARY

Harmonisation of statistics: the Treaty establishing the European Community tasked the European Central Bank (ECB) with ensuring harmonised statistics according to Article 5 of the Statute of the European System of Central Banks. The national central banks of EC Member States therefore collect statistical information according to a uniform definition, from which the ECB then compiles aggregate data for euro area monetary policy. Although Council Regulation No 2533/98, which specifies the requirements for statistical data collection, only concerns euro area countries, the ECB also receives full data sets from the non-participating countries (e.g. the Czech Republic) in order to monitor their economic and financial development.

Monetary statistics: financial macrostatistics of constituent sub-sectors of the sector S.12 based exclusively on the “host country” principle. According to this principle, a resident reporting unit is an institution resident in a given economic territory. The reporting population includes

- 1) institutions incorporated and located in the territory, including subsidiaries of parent companies located outside that territory,
- 2) branches of institutions that have their head office outside that territory.

APRC: annual percentage rate of charge, i.e. the rate including interest expenses and all related costs of the credit to the client (fees etc.).

Investment funds: for the purposes of monetary and banking statistics, investment funds comprise investment funds other than money market funds which are resident in the Czech Republic. These are undertakings the sole object of which is collective investment, i.e. pooling investor funds and investing them under conditions stipulated in the Act on Management Companies and Investment Funds (No. 240/2013 Coll.). Such undertakings may be constituted under the Act either as unit trust managed by an investment company or as investment funds.

Consolidated balance sheet of the MFI sector: the basic statistical tool of monetary statistics. It is based on the residency principle and is obtained by netting out inter-MFI positions on their aggregated balance sheet.

Consumer credit: loans granted to households for personal use in the consumption of goods and services.

Contribution to annual growth rate: the growth rate of a selected component weighted by its share in the total growth rate.

Deposits redeemable at notice: deposits that can be withdrawn by clients only after the expiry of a period of notice agreed in advance, which starts at the moment of notification of the intention to withdraw the deposit.

Deposits with agreed maturity: deposits that cannot be withdrawn by clients before a predefined maturity.

Financial corporations engaged in lending (FCLs): FCLs mean corporations classified within sector S.125 other financial intermediaries which are predominantly engaged in granting credit or loans or entering into agreements of similar nature, for example financial leasing, factoring, consumer credit, hire purchase, etc. (see Decree No. 314/2013 Coll.)

Type of services:

- 1) financial leasing – it is financial service, when lessee acquires the right to use good in exchange for rental payment over predetermined term. All risk and rewards of ownership are transferred from lessor to lessee. After lapse of predetermined term ownership of good is transferred from lessor to lessee.
- 2) factoring – it is financial service consisting in purchase of short-term receivables (with maturity 30-90 days) before their maturity date. Receivables are transferred on factoring company – factor- by supplier of goods or services.
- 3) other lending – this category encompasses granting credit or loans or agreements of similar nature different from financial leasing and factoring. It deals especially with consumer credit, hire purchase, consumption loans, etc.

Growth rate: the percentage change in the monitored variable over the reference period, calculated from the volumes of monthly financial transactions and the outstanding amounts at the beginning of each month.

Household sector: institutional units included in the sectors of households (S.14) and non-profit institutions serving households (S.15) under ESA2010.

Housing loans: loans granted to households for the purpose of purchasing/investing in housing, including building and home improvements.

Interest rate fixation: a period of interest rate fixation, i.e. a period at the beginning of a contract for which the agreed interest rate cannot be changed. Period up to 1 year includes floating rates.

MFI longer-term financial liabilities: comprise deposits with an agreed maturity of over two years, deposits redeemable at a period of notice of over three months, debt securities issued with an original maturity of more than two years and the capital and reserves of the Czech MFI sector.

Monetary aggregates: comprise the monetary liabilities of monetary financial institutions to non-MFI Czech residents except central government. The narrow monetary aggregate M1 includes currency in circulation (excluding cash at banks' cash desks) and overnight deposits. The intermediate monetary aggregate M2 comprises M1, deposits redeemable at a period of notice of up to and including three months and deposits with a maturity of up to and including two years. The broad monetary aggregate M3 comprises M2, money market fund shares/units, debt securities with a maturity of up to two years and repurchase agreements.

Monetary financial institutions (MFIs): financial institutions forming the money-issuing sector. Under Community law, these include the central bank, resident credit institutions, and all other resident financial institutions whose business is to receive deposits and/or close substitutes for deposits from entities other than MFIs and, for their own account (at least in economic terms), to grant credit and/or invest in securities. In the Czech Republic, MFIs include the central bank, banks, money market funds and credit unions.

Money-holding sector: all residents' institutional units except central government (S.1311) and monetary financial institutions (S.121, S.122 and S.123) under ESA2010.

Money-issuing sector: all institutional units included in the sectors of the central bank (S.121) and other monetary financial institutions (S.122 and S.123) under ESA2010.

Money-neutral sector: an institutional sector comprising the central government sector (S.1311) under ESA2010.

Money market funds (MMFs): are collective investment undertakings that have been authorised pursuant to Article 4 of Regulation (EU) 2017/1131 of the European Parliament and of the Council³ and that issue shares/units which are close substitutes for deposits.

Net external assets: comprise external assets of Czech MFIs (such as monetary gold, non-koruna banknotes, securities issued by non-residents and loans granted to non-residents) minus external liabilities of the Czech MFI sector (such as non-residents' holdings of deposits, repurchase agreements, money market fund shares and units, and debt securities with a maturity of up to and including two years issued by MFIs and held by non-residents).

Non-MFIs: all resident sectors excluding MFIs, i.e. general government (S.13), non-financial corporations (S.11), financial institutions other than MFIs (S.124, S.125, S.126, S.127, S.128, and S.129) and households and non-profit institutions serving households (S.14 and S.15) under ESA2010.

Other financial intermediaries (OFIs): entities included in the sectors of other financial intermediaries except insurance corporations and pension funds (S. 125), financial auxiliaries (S.126), captive financial institutions and money lenders (S.127), insurance corporations (S.128), and pensions funds (S.129) under ESA2010.

Private sector: a sector comprising all institutional sectors except general government (S.13) and monetary financial institutions (S.121, S.122 and S.123) under ESA2010.

Rates on new business: interest rates agreed by the bank and the client for all agreements negotiated during the reference period.

Rates on outstanding amounts: interest rates applied to end-of-period balances.

³ Regulation (EU) 2017/1131 of the European Parliament and of the Council of 14 June 2017 on money market funds.

Reclassifications: comprise any changes in the MFI balance sheet resulting from changes in the reporting population, corporate restructuring, reclassifications of assets and liabilities, and corrections of reported errors.

Residents: all domestic and foreign legal entities and natural persons, including branches of foreign banks and foreign owners of buildings and land, whose centre of economic interest is in the given territory. Foreign legal entities and natural persons are considered residents after at least one year of economic activity in the territory, with the exception of foreign bank branches and owners of buildings and land, who become residents at the moment they perform a valid legal act (in the case of foreign owners of buildings and land, this only applies in connection with transactions relating to the building or land in question).

Transaction (flow) data: values related to the whole period which are calculated as the difference between the balances at the end of the current and the previous period adjusted for non-transaction effects, i.e. effects connected with reclassifications, valuation changes and exchange rate variations over the period. These factors result in breaks in time series, thereby affecting the comparability of end-of-period balances. Transaction (flow) data only reflect those changes that arise from transactions, i.e. from accepting financial assets or providing financial liabilities.

Unit trusts other than money market funds:

- 1) Equity funds – funds investing mainly in shares and other equity.
- 2) Bond funds – funds investing mainly in securities other than shares.
- 3) Mixed funds – funds investing in equity and debt securities without a clear preference for either approach.
- 4) Real estate funds – funds investing mainly in real estate.
- 5) Hedge funds – funds applying more or less unlimited investment strategies in order to achieve positive absolute yields, whose managers are remunerated based on the fund's performance in addition to their salary.
- 6) Other funds – investment funds other than equity funds, bond funds, mixed funds, real estate funds or hedge funds.

Funds of funds and funds of qualified investors are classified under the aforementioned categories according to their investment strategies.

VIII. TECHNICAL NOTES

VIII.1 CALCULATION OF GROWTH RATES

The growth rate for the reference period is calculated from the volumes of monthly financial transactions and the outstanding amounts at the beginning of each month. Monthly transactions are calculated from differences in outstanding amounts adjusted for reclassifications, other revaluations, exchange rate variations and other changes which do not arise from transactions. This data thus reflects only those changes that arise from accepting financial assets or providing financial liabilities. Reclassifications and other non-transaction corrections are introduced into the transaction statistics to preserve the comparability of the gradual monitoring results, thereby enabling calculation of the indices of expected outstanding balances of the monitored variables and determination of their growth rates.

VIII.1.1 Method of calculation

- 1) The month-on-month percentage change a_t^M for month t is calculated as: $a_t^M = \left(\frac{F_t^M}{L_{t-1}} \right) * 100$
- 2) The annual growth rate for month t , i.e. the change for the last 12 months ending with month t , is calculated as the product of the twelve coefficients for each previous month: $a_t = \left[\prod_{i=0}^{11} \left(1 + \frac{F_{t-i}^M}{L_{t-1-i}} \right) - 1 \right] * 100$, where

$$F_t^M = (L_t - L_{t-1}) - C_t^M - E_t^M - V_t^M,$$

F_t^M – transactions in month t ,

L_t – outstanding amount at the end of month t ,

C_t^M – reclassifications in month t ,

E_t^M – exchange rate variations in month t ,

V_t^M – valuation changes in month t .

The calculation of the annual growth rate from the month-on-month growth rates thus enables transaction changes and non-transaction effects in the individual months to be taken into account.

- 3) Growth rates for other reference periods are derived from formula (2).

VIII.2 CALCULATION OF THE CONTRIBUTION TO THE ANNUAL GROWTH RATE OF A MONITORED VARIABLE (E.G. M3)

If $a_t(M3)$ represents the annual growth rate of M3 for the year ending with month t , and $F_{t-i}(M1)$, $F_{t-i}(M3 - M2)$ and $F_{t-i}(M2 - M1)$ are the monthly transactions of the components M1, M2-M1 and M3-M2 in month $t-i$, the contribution of M1 to the annual growth rate of M3, for example, is calculated as: $\frac{\sum_{i=0}^{11} F_{t-i}(M1)}{\sum_{i=0}^{11} [F_{t-i}(M1) + F_{t-i}(M2 - M1) + F_{t-i}(M3 - M2)]} * a_t(M3)$.

List of abbreviations and codes

Codes

CBI	cost-of-borrowing indicators
CNB	Czech National Bank
ECB	European Central Bank
ESA2010	European System of National and Regional Accounts
Eurozone	the European Union member states that have adopted the EUR
FCL	financial corporations engaged in lending (financial leasing, hire purchase and provision of personal or commercial finance, factoring and forfaiting)
IF	investment funds excluding money market funds
LTIR	yield of the 10-year bond
M1, M2, M3	monetary aggregates
MFI	monetary financial institutions
MMF	money market funds
NFA	net foreign assets
NISH	non-profit institutions serving households
non-MFI	all institutions excluding MFIs
OFI	other financial intermediaries

Institutional sectors and subsectors according to ESA2010

S.11	non-financial corporations
S.121	central bank
S.122	deposit-taking corporations, except the central bank
S.123	money market funds
S.124	non-MMF investment funds
S.125	other financial intermediaries, except insurance corp. and pension funds
S.126	financial auxiliaries
S.127	captive financial institutions and money lenders
S.128	insurance corporations
S.129	pension funds
S.13	general government
S.1311	central government
S.14	households
S.15	non-profit institutions serving households
