1.4 COMMENTARY ON TABLES 1 – 2

Commentary on key interest rates (Table 1) and financial market interest rates (Table 2): July 2026.

1.4.1 KEY INTEREST RATES

The key interest rates of the Czech National Bank (CNB) were changed on the basis of the CNB Bank Board's decision in June 2026. They were all raised by 0.25 percentage point. Specifically, the 2W repo rate increased to 3.75%, the discount rate to 2.75% and the Lombard rate to 4.75%. The key interest rates of the European Central Bank (ECB) were also increased by 0.25 percentage point by the ECB's Governing Council in June 2026. The deposit facility rate was raised to 2.25%, the main refinancing operations rate to 2.40% and the marginal lending facility rate to 2.65%.

CZEONIA interest rate (i.e. the rate on unsecured O/N deposits placed by banks and foreign bank branches on the interbank market, including deposits placed in the CNB's deposit facility) increased by 0.24 percentage point to 3.39%.

All the monitored interest rates on the Czech capital market recorded more minor changes between June and July compared to the interbank deposit market. The yield on the 2Y bond fell by 0.02 percentage point to 3.90%. The yield on the 5Y bond increased by 0.10 percentage point to 4.26%. The yield on the 10Y bond also increased, rising by 0.09 percentage point to 4.79%.

1.4.2 FINANCIAL MARKET INTEREST RATES

All the monitored interest rates on the Czech interbank deposit market increased in July 2026. The 1M PRIBOR recorded the largest increase, up by 0.16 percentage point to 3.80%. The 3M PRIBOR was up by 0.15 percentage point to 3.83%. The 6M PRIBOR increased by 0.13 percentage point to 3.92%. The 1Y PRIBOR also increased, up by 0.11 percentage point to 4.04%. The

1) Monetary aggregates comprise monetary liabilities of MFIs vis-à-vis non-MFI Czech residents excluding central government. M1 is the sum of currency in circulation and overnight deposits; M2 is the sum of M1, deposits with an agreed maturity of up to two years and deposits redeemable at notice of up to three months; and M3 is the sum of M2, repurchase agreements, money market fund shares/units and debt securities up to two years.

2) Including all resident sectors without general government (S.13) and MFIs sector (S.121, S.122 and S.123 according to ESA2010).

3) Net foreign assets (NFA) represent balance of financial claims and liabilities of the MFI sector vis-à-vis non-residents.

4) Net value of flow data calculated by adjusting the difference between end-of-period levels for the effect of non-transactions-related factors.

2.9 COMMENTARY ON TABLES 3 – 9

Commentary on monetary developments statistics¹ (Tables 3 – 9): July 2026.

Compared to the previous month, the annual rate of growth of M3 declined to 5.7% in July 2026, representing a month-on-month decrease of 0.6 percentage point. As a result of financial transactions, M3 decreased by CZK 1.7 billion month on month but increased by CZK 409.4 billion year on year, reaching CZK 7,605.2 billion.

2.9.1 MAIN COMPONENTS OF M3

The individual components of the annual rate of growth of M3 showed mixed developments in July. The contribution of currency in circulation remained flat for the fourth consecutive month (at 0.3 percentage point from March to July). The contribution of overnight deposits decreased slightly (from 5.3 percentage points in June to 3.9 percentage points in July). By contrast, the contributions of other short-term deposits and short-term marketable instruments increased very slightly, by 0.4 percentage point in both cases (specifically, the contribution of other short-term deposits rose from 0.2 percentage point in June to 0.6 percentage point in July, while the contribution of short-term marketable instruments increased from 0.5 percentage point in June to 0.9 percentage point in July).

Overnight deposits decreased month on month by 1.4%, or CZK 72.6 billion in July. The decline was due mainly to deposits of insurance corporations and pension funds (a decrease of 22.0%, or CZK 6.3 billion). However, deposits of non-financial corporations and deposits of households also decreased slightly (by 5.5%, or CZK 69.8 billion and by 1.0%, or CZK 34.0 billion respectively). The decline in overnight deposits was dampened by the remaining components – deposits of other financial intermediaries and deposits of other government – which recorded solid growth (up by 11.3%, or CZK 19.8 billion and 4.4%, or CZK 17.9 billion, respectively).

Conversely, other short-term deposits (excluding overnight deposits) increased by 4.4%, or CZK 53.9 billion month on month in July. All components contributed to the increase, with the largest increases recorded for deposits of other financial intermediaries (up by 10.9%, or CZK 8.5 billion). Solid growth was recorded for deposits of insurance corporations and pension funds (up by 7.6%, or CZK 0.9 billion) and non-financial corporations

(up by 6.2%, or CZK 22.6 billion). Last but not least, deposits of households and other government also increased slightly (up by 3.1%, or CZK 20.3 billion and by 1.3%, or CZK 1.5 billion respectively). The annual growth rate of other short-term deposits edged up again in July, by 2.3 percentage points to 3.4%. The annual growth rate increased for deposits with agreed maturity of up to two years (by 3.2 percentage points to 4.2%). By contrast, the annual growth rate of deposits redeemable at notice of up to three months decreased slightly and, after three months, returned to negative territory, falling by 3.0 percentage points to -1.3%.

Marketable instruments, which consist of repos, money market fund shares/units and debt securities with maturities of up to two years, increased by CZK 18.0 billion in July, to CZK 366.6 billion.

2.9.2 MAIN COUNTERPARTS OF M3

The annual growth rate of loans to the private sector, which are the most important counterpart of M3, increased in July compared with the previous month, by 1.6 percentage points to 11.4%. As a result of financial transactions, the volume of these loans rose by CZK 36.9 billion month on month (an increase of CZK 490.4 billion year on year), amounting to CZK 4,772.0 billion. The annual growth rate of loans to non-financial corporations, a major component of this indicator, increased by 3.5 percentage points month on month to 13.3%. This is the highest value recorded since September 2022. The second key component is loans to households, whose year-on-year growth rate decreased marginally by 0.1 percentage point to 10.3%, bringing to an end the moderate upward trend that had persisted from May 2024 to June of this year.

As regards liabilities of monetary financial institutions, a slight increase was recorded in July for the annual growth rate of deposits of central government (from -7.3% in June to -2.2% in July), while the annual growth rate of longer-term financial liabilities edged down (from 14.6% in June to 14.0% in July). As regards assets of monetary financial institutions, the annual growth rate of loans to general government and purchased securities decreased (from 6.4% in June to 5.6% in July), as did the annual growth rate of net external assets (from 2.4% in June to -0.5% in July).

¹ All increases and decreases referred to in this commentary relate only to financial transactions adjusted for non-transaction effects.

Comment: The interest rates applied by MFIs to CZK-denominated deposits and loans vis-à-vis households and non-financial corporations resident in the Czech Republic. New business refers to any new agreement between the customer and the MFI within given period.

- 1) Including households (S.14) and non-profit institutions serving households (S.15) according to the classification ESA2010.
- 2) For this instrument category the new business is equal to the outstanding amounts (end-of-period stocks).
- 3) Households deposits redeemable at notice include similar deposits of non-financial corporations of which volumes are negligible in this category.
- 4) Since 2019, the amendment to Act No. 190/2004 Coll., on Bonds, as amended, has been fully applied, under which a mortgage loan is a loan, which is secured at least partly by lien (right of pledge) over real estate (property).
- 5) Debit balances on current accounts. The total amount owed by the borrower is included, irrespective of whether is within or beyond any limit agreed beforehand.
- 6) The initial period of fixations is a predetermined period of time at the start of the contract during which the value of the interest rate cannot change. Period up to 3 months includes floating rates.
- 7) Annual percentage rate of charge (APRC) covers total costs of the credit to the client including charges etc.

Comment: The interest rates that are applied by MFIs to CZK-denominated deposits and loans vis-à-vis households and non-financial corporations resident in the Czech Republic. Interest rates on outstanding amounts refer to the stock of all deposits and all loans at a specific moment.

- 1) Including households (S.14) and non-profit institutions serving households (S.15) according to the classification ESA2010.
- 2) Including overnight deposits and deposits redeemable at notice presented in Table 10. For this instrument category, new business and outstanding amounts coincide.
- 3) Since 2019, the amendment to Act No. 190/2004 Coll., on Bonds, as amended, has been fully applied, under which a mortgage loan is a loan, which is secured at least partly by lien (right of pledge) over real estate (property).
- 4) Consumer credit and other lending include bank overdrafts, revolving loans and credit cards presented in Table 10.

3.3 COMMENTARY ON TABLES 10 – 11

Commentary on monetary financial institutions interest rates (Tables 10 – 11): July 2026.

3.3.1 INTEREST RATES ON NEW BUSINESS

In July, interest rates on new deposits of households recorded the largest change for deposits with agreed maturity. The interest rate on overnight deposits of households was flat at 1.52%. The interest rate on current account deposits was also unchanged at 0.15%. The interest rate on deposits with agreed maturity grew by 0.22 percentage point to 3.33%. The rate on deposits redeemable at notice rose by 0.02 percentage point to 1.85% (this rate is the only one to include, in addition to the household sector, also similar deposits of non-financial corporations, whose volumes are negligible in this category).

The interest rate on overnight deposits of non-financial corporations decreased by 0.04 percentage point to 1.19%. The rate on current account deposits fell by 0.06 percentage point to 0.72%. The rate on deposits with agreed maturity of up to one year (which as a rule account for 100% of all deposits with agreed maturity in this sector) saw an increase of 0.11 percentage point to 3.23%.

Within interest rates on new loans to households, other loans recorded the biggest change in July. Interest rates on loans to non-financial corporations saw the largest change for loans of over CZK 7.5 million and up to CZK 30 million.

The overall interest rate on consumer credit, loans for house purchase and other loans to households increased by 0.17 percentage point to 5.59%. Consumer credit was remunerated at 7.99%, up by 0.08 percentage point. The interest rate on loans for house purchase rose by 0.11 percentage point to 4.84%. The rate on mortgage loans stood at 4.76%, up by 0.11 percentage point from June. Building society loans were remunerated at 5.85%, up by 0.03 percentage point. The rate on other loans rose by 0.13 percentage point to 5.47%. The interest rate on overdrafts and revolving loans increased by 0.06 percentage point to 14.32%. The rate on credit card loans declined by 0.01 percentage point month on month to 16.84%.

The interest rate on new loans to non-financial corporations (excluding overdrafts, revolving loans and credit cards) increased by 0.09 percentage point to 5.52%.

The rate on loans of up to CZK 7.5 million increased by 0.04 percentage point to 6.29%. Loans of over CZK 7.5 million and up to CZK 30 million were remunerated at 5.56%, i.e. 0.11 percentage point higher than in June. The interest rate on loans of over CZK 30 million increased by 0.06 percentage point, reaching 5.43%. The interest rate on overdrafts, revolving loans and credit card loans increased by 0.05 percentage point to 5.55%.

3.3.2 INTEREST RATES ON OUTSTANDING AMOUNTS

The average interest rates on outstanding amounts of deposits of households changed by just a few basis points in July. Similar changes were recorded for non-financial corporations.

Total deposits of households were remunerated at 1.74%, representing a slight increase compared to June. The interest rate on overnight deposits was flat at 1.52%. The interest rate on deposits redeemable at notice increased to 1.85% and the rate on deposits with agreed maturity picked up to 2.70%.

The interest rate on total deposits of non-financial corporations grew to 1.83%. The interest rate on overnight deposits decreased to 1.19%. The interest rate on deposits with agreed maturity rose to 3.21%.

Interest rates on outstanding amounts of loans to households changed by just a few basis points in July. Rates on outstanding amounts of loans to non-financial corporations saw similar changes.

The overall interest rate on loans to households edged up to 4.73%. The rate on loans for house purchase also grew, reaching 4.05%. The interest rates on consumer credit and other loans increased slightly to 7.05%.

The average interest rate on outstanding amounts of loans to non-financial corporations increased to 5.38%. The interest rate on loans with maturity of up to one year saw an increase to 5.61%. The interest rate on loans with maturity of over one year and up to five years picked up to 5.78%. The rate on loans with maturity of over five years increased to 5.12%.

3.4 COST-OF-BORROWING INDICATORS

The Czech National Bank has been publishing fully harmonised MIR statistics in accordance with Regulation ECB/2013/14 since January 2004. These statistics are used in the CNB's economic and monetary analyses and are reported to the ECB on a monthly basis. Over time, it has been found that in order to estimate the effectiveness of monetary policy pass-through across euro area and EU countries, it is necessary to use an accurate and comparable measure of the borrowing costs for non-financial corporations and households in those countries, in addition to the standard MIR indicators. For this reason, the euro area countries started to publish cost-of-borrowing indicators (CBI) in 2013. The CBIs were created to assess the effectiveness of monetary policy pass-through and economic forecasts and to compare economic conditions across the euro area countries. The Czech Republic voluntarily signed up to the publication of CBIs in June 2014.

The motive for implementing the CBIs was that aggregate indicators cannot be easily compiled for MIR statistics in some cases due to inhomogeneity in the definitions of the underlying instruments. For example, overdrafts² are recorded in the monthly statistics on new loan contracts ("new business"), but they have a higher periodicity and different characteristics. They cannot be left out if this segment is to be fully covered. Because of the difference in definitions, however, interest rates could previously be monitored only separately for individual instruments, not in aggregate form. The CBI calculation algorithm eliminates this shortcoming for certain instruments.

Four basic categories of underlying instruments were used to calculate the CBIs: interest rates on loans provided by banks to non-financial corporations and interest rates on loans provided by banks to households for house purchase. The MIR source statistics were used in two

ways to construct the CBIs. Interest rates on long-term loans provided by banks to non-financial corporations and interest rates on short-term and long-term loans provided by banks to households for house purchase were obtained directly from the MIR statistics. In the case of interest rates on long-term loans provided by banks to non-financial corporations, two additional calculations had to be performed to make this aggregate indicator applicable. This involved accounting for the importance of overdrafts an important source of financing for firms and computing an estimate of the share of long-term loans with original and residual maturity of over one year and interest rate reset in the next twelve months, as these long-term loans are akin to short-term loans.

There are eight indicators: four basic ones and four derived ones. The basic indicators provide an assessment of the costs of borrowing broken down into short-term and long-term loans to households and non-profit organisations serving household for house purchase and to non-financial corporations. These four basic CBIs are used to compile the derived CBIs – short-term CBIs, long-term CBIs, CBIs for non-financial corporations as a whole and CBIs for households and non-profit institutions serving households as a whole. The CBIs cover CZK-denominated loans.

The CBIs are compiled on the basis of the existing MFI interest rate (MIR) and balance sheet statistics. The CBIs for households and non-profit institutions serving households (HH) are calculated using loans for house purchase (new business). Consumer credit and other loans are not included as their interest rates are too volatile across countries and thus not relevant for macroeconomic projections.

² Overdrafts are debit balances on current accounts, revolving loans and card credit

3.5 TABLE 12 – DERIVED COST-OF-BORROWING INDICATORS IN THE CZECH REPUBLIC AND CYPRUS

(in % p. a.)

	2025		2026					
	June		April		May		June	
	CZ	CY ⁵⁾	CZ	CY	CZ	CY	CZ	CY
(1) Households - total ^{1), 2)}	4.67	3.49	4.56	3.25	4.67	3.28	4.74	3.33
(2) Non-financial corporations - total	4.99	4.03	5.40	3.91	5.25	3.88	5.45	4.01
(3) Total short-term cost of borrowing ³⁾	4.99	4.15	5.34	4.12	5.23	4.01	5.40	4.16
(4) Total long-term cost of borrowing ⁴⁾	4.69	3.35	4.66	3.18	4.71	3.30	4.82	3.34

1) MFI interest rate statistics cover CZK-denominated loans only. The rates on outstanding amounts are the rates applied to end of period balances.

2) Households comprise the household sector (S.14) and non-profit institutions serving households (S.15) under ESA2010.

3) Short-term (ST) loans are loans with a floating rate or an initial rate fixation up to one year.

4) Long-term (LT) loans are loans with an initial rate fixation over one year.

5) CY = Cyprus ([link to data](#)).

3.6 COMMENTARY ON TABLE 12

Commentary on derived cost-of-borrowing indicators in the Czech Republic and Cyprus (Table 12): June 2026.

All cost-of-borrowing indicators (CBIs) were higher for Czech loans than for Cyprus loans in June 2026, with the differential reaching almost 1.50 percentage point on average. Of all the CBIs monitored in the Czech Republic and Cyprus, three Cypriot indicators recorded year-on-year decreases in June. All derived CBIs increased in month-on-month terms. The Cypriot CBI for households was the lowest in June. By contrast, the Czech CBI for non-financial corporations was the highest.

Compared to May, the cost of borrowing of Czech households rose by 0.07 percentage point. In Cyprus, this CBI also recorded a month-on-month increase of 0.05 percentage point. This was the second smallest month-on-month change among all the monitored CBIs in the Czech Republic and Cyprus. This CBI reached 4.74% in the Czech Republic and 3.33% in Cyprus in June. The differential between this CBI in the Czech Republic and Cyprus was thus 1.41 percentage points. In year-on-year terms, an increase of 0.07 percentage point was recorded in the Czech Republic, and a decrease of 0.16 percentage point was recorded in Cyprus.

The CBI for Czech non-financial corporations rose by 0.20 percentage point month on month to 5.45%, the largest month-on-month change among all the CBIs in the Czech Republic and Cyprus. The CBI for Cypriot non-financial corporations was 4.01%, i.e. 1.44 percentage points lower than in the Czech Republic. This CBI rose by 0.13 percentage point month on month in Cyprus. In year-on-year terms, this indicator decreased by 0.02 percentage point in Cyprus, while increasing by 0.46 percentage point in the Czech Republic. The year-on-year

change in this Czech CBI was the largest among all the Czech and Cypriot CBIs.

In the Czech Republic, the short-term cost of borrowing (comprising both households and non-financial corporations) increased by 0.17 percentage point month on month to 5.40%. The month-on-month change in this Czech CBI was the second largest among all the Czech and Cypriot CBIs. In Cyprus, this CBI was 1.24 percentage points lower. This was the smallest differential among all the monitored CBIs in the Czech Republic and Cyprus. This indicator thus stood at 4.16% in Cyprus. This CBI rose by 0.15 percentage point month on month in Cyprus. In year-on-year terms, the indicator increased by 0.01 percentage point in Cyprus and by 0.41 percentage point in the Czech Republic. The year-on-year change in this Czech CBI was the second largest among all the Czech and Cypriot CBIs.

In the Czech Republic, the long-term cost of borrowing (comprising both households and non-financial corporations) increased by 0.11 percentage point month on month to 4.82% in June. In Cyprus, this CBI increased by 0.04 percentage point, representing the smallest month-on-month change among all the monitored CBIs in the Czech Republic and Cyprus. The long-term CBI in Cyprus was 3.34%, i.e. 1.48 percentage point lower than in the Czech Republic. This was the biggest differential among all the monitored CBIs in the Czech Republic and Cyprus. This CBI increased by 0.13 percentage point year on year in the Czech Republic. In Cyprus, it fell by 0.01 percentage point.

Comment: Investment Funds (IFs) represent Mutual and Investment Funds other than Money Market Funds which are residents in the Czech Republic. Funds of funds and funds of qualified investors are classified under the category of assets or funds in which they primarily invest. Data are published by the 15th calendar day of the second month following the reference period.

Graph 4.1

(CZK billions)

4.2 COMMENTARY ON TABLE 13

Commentary on the aggregated balance sheet of investment funds (Table 13): June 2026.

Net assets value: The net assets value of investment funds was CZK 2,284.0 billion at the end of June. This means an increase of CZK 15.2 billion compared to May (monthly transactions accounted for CZK +11.3 billion). Compared to the same period last year, the net assets value of investment funds rose by 27.9%. The biggest month-on-month change in the net assets value was recorded for equity funds, up by CZK 4.7 billion to CZK 300.0 billion.

Investment in bonds: The value of bond holdings was CZK 445.3 billion at the end of June. Compared to the previous month, the total volume of bonds in the funds' portfolio increased by CZK 2.7 billion (monthly transactions accounted for CZK +1.3 billion). The proportion of debt securities in the funds' net assets value was unchanged from the previous month at 19.5%.

Investment in equity securities: The volume of equity securities in the funds' portfolio increased in the month under review. As of the end of the month, the value of holdings of equity securities amounted to CZK 1,384.3 billion, of which CZK 490.1 billion was investment in the

shares and units of investment funds and CZK 894.2 billion was investment in shares and other equity. The value of equity securities grew by CZK 20.9 billion compared to May (monthly transactions accounted for CZK +13.3 billion). The proportion of equity securities in the funds' net assets value increased to 60.6% compared to the previous month.

Other investment: The value of funds invested in other assets increased in the period under review. The total volume of other investment was CZK 549.0 billion in June, of which CZK 90.3 billion was fixed investment and CZK 117.9 billion investment in deposits. The proportion of other investment in the funds' net assets value rose to 24.0% compared to the previous month.

Reporting population: At the end of June 2026, a total of 855 resident investment funds were active in the Czech Republic, of which 124 were equity funds, 72 bond funds, 79 mixed funds, 190 real estate funds and 390 other funds.

5.4 COMMENTARY ON TABLES 14 – 15

Commentary on the aggregated balance sheet of financial corporations engaged in lending (Tables 14 – 15): June 2026.

Financial corporations engaged in lending had total assets of CZK 554.8 billion as of 30 June 2026, up by CZK 13.4 billion in quarter-on-quarter terms. Compared to 2025 Q2, total assets increased by CZK 25.7 billion (or 4.9%) year on year.

The largest asset item was loans provided, amounting to CZK 456.7 billion, of which CZK 449.2 billion was provided to residents. Compared to the previous quarter, total loans provided rose by CZK 11.8 billion in 2026 Q2. In year-on-year terms, they increased by CZK 30.1 billion.

The largest part of loans provided to residents consisted of loans to non-financial corporations amounting to CZK 365.2 billion, i.e. 81.3% of total loans to residents. Compared to the previous quarter, loans to non-financial corporations rose by CZK 11.8 billion. In year-on-year terms, they increased by CZK 27.7 billion.

The second largest category of loans to residents consisted of loans to households, totalling CZK 82.9 billion. These loans accounted for 18.5% of loans granted to residents.

Graph 6.2

Volume of pension entitlements in transformed and participation funds

(CZK billions)

6.2 COMMENTARY ON TABLE 16

Commentary on the aggregated balance sheet of pension funds (Table 16): March 2026.

At the end of March 2026, a total of 48 resident pension funds were active in the Czech Republic, 8 of them transformed funds and 40 participation funds.

The balance sheet total of pension funds amounted to CZK 679.3 billion as of 31 March 2026. This represents an increase of CZK 3.7 billion compared with the previous quarter. Quarterly transactions stood at CZK 7.1 billion. Compared with the same period of 2025, the balance sheet total rose by CZK 36.4 billion (or 5.7%) year on year.

Debt securities had the largest share in the structure of pension funds' assets (63.1%). They stood at CZK 428.9 billion at the end of March, a decrease of CZK 6.7 billion compared with the previous quarter. Investments in government bonds accounted for CZK 394.2 billion and investments in bonds of monetary financial institutions for CZK 18.3 billion of the total volume of bonds. As regards the country of the issuer, bonds issued by Czech entities are predominant. Their share in total bonds held was 92% in the period under review. Deposits and loans provided are another important item on the asset side. They increased to CZK 112.3 billion

in the period under review. This represents 16.5% of total assets.

Equity securities grew by CZK 6.7 billion to CZK 129.0 billion in the period under review. Quarterly transactions amounted to CZK 7.3 billion. Listed shares accounted for CZK 58.5 billion, unlisted shares for CZK 0.1 billion and investment fund shares and units for CZK 70.4 billion of total equity securities.

Pension entitlements, i.e. the capital that pension funds hold in order to meet the future pension claims of their participants, are the largest item on the liabilities side. They amounted to CZK 641.8 billion as of 31 March 2026, an increase of CZK 4.9 billion compared with the previous quarter and an increase of CZK 27.8 billion on a year earlier.

Pension management companies had 3,885,201 members' contracts at the end of 2025, of which 3,837,432 were active contracts, 14,974 deferred members' contracts and 32,795 retired members' contracts. The total number of contracts dropped by 99,846 compared with 2024.

Comment: Effective from 2025, data on members in pension savings are reported based on the number of members assigned to each individual contract according to its status (active, deferred or retired), rather than by the number of persons. Each contract is therefore recorded separately. The source data are submitted at the pension management company level, consequently, the publication of indicators on the number of members for participation funds and transformed funds has been discontinued.

7 GLOSSARY

Harmonisation of statistics: the Treaty establishing the European Community tasked the European Central Bank (ECB) with ensuring harmonised statistics according to Article 5 of the Statute of the European System of Central Banks. The national central banks of EC Member States therefore collect statistical information according to a uniform definition, from which the ECB then compiles aggregate data for euro area monetary policy. Although Council Regulation No 2533/98, which specifies the requirements for statistical data collection, only concerns euro area countries, the ECB also receives full data sets from the non-participating countries (e.g. the Czech Republic) in order to monitor their economic and financial development.

APRC: annual percentage rate of charge, i.e. the rate including interest expenses and all related costs of the credit to the client (fees etc.).

Investment funds: for the purposes of monetary and banking statistics, investment funds comprise investment funds other than money market funds which are resident in the Czech Republic. These are undertakings the sole object of which is collective investment, i.e. pooling investor funds and investing them under conditions stipulated in the Act on Management Companies and Investment Funds (No. 240/2013 Coll.). Such undertakings may be constituted under the Act either as unit trust managed by an investment company or as investment funds.

Consolidated balance sheet of the MFI sector: the basic statistical tool of monetary statistics. It is based on the residency principle and is obtained by netting out inter-MFI positions on their aggregated balance sheet.

Consumer credit: loans granted to households for personal use in the consumption of goods and services.

Contribution to annual growth rate: the growth rate of a selected component weighted by its share in the total growth rate.

Deposits redeemable at notice: deposits that can be withdrawn by clients only after the expiry of a period of notice agreed in advance, which starts at the moment of notification of the intention to withdraw the deposit.

Deposits with agreed maturity: deposits that cannot be withdrawn by clients before a predefined maturity.

Financial corporations engaged in lending (FCLs): FCLs mean corporations classified within sector S.125 other financial intermediaries which are predominantly engaged in granting credit or loans or entering into agree-

Monetary statistics: financial macrostatistics of constituent sub-sectors of the sector S.12 based exclusively on the "host country" principle. According to this principle, a resident reporting unit is an institution resident in a given economic territory. The reporting population includes

1. institutions incorporated and located in the territory, including subsidiaries of parent companies located outside that territory,
2. branches of institutions that have their head office outside that territory.

ments of similar nature, for example financial leasing, factoring, consumer credit, hire purchase, etc. (see Decree No. 314/2013 Coll.)

Type of services:

1. financial leasing – it is financial service, when lessee acquires the right to use good in exchange for rental payment over predetermined term. All risk and rewards of ownership are transferred from lessor to lessee. After lapse of predetermined term ownership of good is transferred from lessor to lessee.
2. factoring – it is financial service consisting in purchase of short-term receivables (with maturity 30-90 days) before their maturity date. Receivables are transferred on factoring company – factor- by supplier of goods or services.
3. other lending – this category encompasses granting credit or loans or agreements of similar nature different from financial leasing and factoring. It deals especially with consumer credit, hire purchase, consumption loans, etc.

Growth rate: the percentage change in the monitored variable over the reference period, calculated from the volumes of monthly financial transactions and the outstanding amounts at the beginning of each month.

Household sector: institutional units included in the sectors of households (S.14) and non-profit institutions serving households (S.15) under ESA2010.

Housing loans: loans granted to households for the purpose of purchasing/investing in housing, including building and home improvements.

Interest rate fixation: a period of interest rate fixation, i.e. a period at the beginning of a contract for which the

agreed interest rate cannot be changed. Period up to 1 year includes floating rates.

MFI longer-term financial liabilities: comprise deposits with an agreed maturity of over two years, deposits redeemable at a period of notice of over three months, debt securities issued with an original maturity of more than two years and the capital and reserves of the Czech MFI sector.

Monetary aggregates: comprise the monetary liabilities of monetary financial institutions to non-MFI Czech residents except central government. The narrow monetary aggregate M1 includes currency in circulation (excluding cash at banks' cash desks) and overnight deposits. The intermediate monetary aggregate M2 comprises M1, deposits redeemable at a period of notice of up to and including three months and deposits with a maturity of up to and including two years. The broad monetary aggregate M3 comprises M2, money market fund shares/units, debt securities with a maturity of up to two years and repurchase agreements.

Monetary financial institutions (MFIs): financial institutions forming the money-issuing sector. Under Community law, these include the central bank, resident credit institutions, and all other resident financial institutions whose business is to receive deposits and/or close substitutes for deposits from entities other than MFIs and, for their own account (at least in economic terms), to grant credit and/or invest in securities. In the Czech Republic, MFIs include the central bank, banks, money market funds and credit unions.

Money-holding sector: all residents' institutional units except central government (S.1311) and monetary financial institutions (S.121, S.122 and S.123) under ESA2010.

Money-issuing sector: all institutional units included in the sectors of the central bank (S.121) and other monetary financial institutions (S.122 and S.123) under ESA2010.

Money-neutral sector: an institutional sector comprising the central government sector (S.1311) under ESA2010.

Money market funds (MMFs): are collective investment undertakings that have been authorised pursuant to Article 4 of Regulation (EU) 2017/1131 of the European Parliament and of the Council³ and that issue shares/units which are close substitutes for deposits.

Net external assets: comprise external assets of Czech MFIs (such as monetary gold, non-koruna banknotes, securities issued by non-residents and loans granted to non-residents) minus external liabilities of the Czech MFI sector (such as non-residents' holdings of deposits, repurchase agreements, money market fund shares and units,

and debt securities with a maturity of up to and including two years issued by MFIs and held by non-residents).

Non-MFIs: all resident sectors excluding MFIs, i.e. general government (S.13), non-financial corporations (S.11), financial institutions other than MFIs (S.124, S.125, S.126, S.127, S.128, and S.129) and households and non-profit institutions serving households (S.14 and S.15) under ESA2010.

Other financial intermediaries (OFIs): entities included in the sectors of other financial intermediaries except insurance corporations and pension funds (S.125), financial auxiliaries (S.126), captive financial institutions and money lenders (S.127), insurance corporations (S.128), and pensions funds (S.129) under ESA2010.

Private sector: a sector comprising all institutional sectors except general government (S.13) and monetary financial institutions (S.121, S.122 and S.123) under ESA2010.

Rates on new business: interest rates agreed by the bank and the client for all agreements negotiated during the reference period.

Rates on outstanding amounts: interest rates applied to end-of-period balances.

Reclassifications: comprise any changes in the MFI balance sheet resulting from changes in the reporting population, corporate restructuring, reclassifications of assets and liabilities, and corrections of reported errors.

Residents: all domestic and foreign legal entities and natural persons, including branches of foreign banks and foreign owners of buildings and land, whose centre of economic interest is in the given territory. Foreign legal entities and natural persons are considered residents after at least one year of economic activity in the territory, with the exception of foreign bank branches and owners of buildings and land, who become residents at the moment they perform a valid legal act (in the case of foreign owners of buildings and land, this only applies in connection with transactions relating to the building or land in question).

Transaction (flow) data: values related to the whole period which are calculated as the difference between the balances at the end of the current and the previous period adjusted for non-transaction effects, i.e. effects connected with reclassifications, valuation changes and exchange rate variations over the period. These factors result in breaks in time series, thereby affecting the comparability of end-of-period balances. Transaction (flow) data only reflect those changes that arise from transactions, i.e. from accepting financial assets or providing financial liabilities.

³ Regulation (EU) 2017/1131 of the European Parliament and of the Council of 14 June 2017 on money market funds.

Unit trusts other than money market funds:

1. Equity funds – funds investing mainly in shares and other equity.
2. Bond funds – funds investing mainly in securities other than shares.
3. Mixed funds – funds investing in equity and debt securities without a clear preference for either approach.
4. Real estate funds – funds investing mainly in real estate.
5. Hedge funds – funds applying more or less unlimited investment strategies in order to achieve positive absolute yields, whose managers are remunerated

based on the fund's performance in addition to their salary.

6. Other funds – investment funds other than equity funds, bond funds, mixed funds, real estate funds or hedge funds.

Funds of funds and funds of qualified investors are classified under the aforementioned categories according to their investment strategies.

8 TECHNICAL NOTES

8.1 CALCULATION OF GROWTH RATES

The growth rate for the reference period is calculated from the volumes of monthly financial transactions and the outstanding amounts at the beginning of each month. Monthly transactions are calculated from differences in outstanding amounts adjusted for reclassifications, other revaluations, exchange rate variations and other changes which do not arise from transactions. This data thus reflects only those changes that arise from accepting financial assets or providing financial liabilities. Reclassifications and other non transaction corrections are introduced into the transaction statistics to preserve the comparability of the gradual monitoring results, thereby enabling calculation of the indices of expected outstanding balances of the monitored variables and determination of their growth rates.

8.1.1 METHOD OF CALCULATION

1. The month-on-month percentage change a_t^M for month t is calculated as: $a_t^M = \left(\frac{F_t^M}{L_{t-1}} \right) * 100$
2. The annual growth rate for month t, i.e. the change for the last 12 months ending with month t, is calculated as the product of the twelve coefficients for each previous month: $a_t = \left[\prod_{i=0}^{11} \left(1 + \frac{F_{t-i}^M}{L_{t-1-i}} \right) - 1 \right] * 100$

$$F_t^M = (L_t - L_{t-1}) - C_t^M - E_t^M - V_t^M$$

F_t^M – transactions in month t,

L_t – outstanding amount at the end of month t,

C_t^M – reclassifications in month t,

E_t^M – exchange rate variations in month t,

V_t^M – valuation changes in month t.

The calculation of the annual growth rate from the month-on-month growth rates thus enables transaction changes and non-transaction effects in the individual months to be taken into account.

3. Growth rates for other reference periods are derived from formula (2).

8.2 CALCULATION OF THE CONTRIBUTION TO THE ANNUAL GROWTH RATE OF A MONITORED VARIABLE (E.G. M3)

If $a_t(M3)$ represents the annual growth rate of M3 for the year ending with month t, and $F_{t-i}(M1)$, $F_{t-i}(M2 - M1)$ and $F_{t-i}(M3 - M2)$ are the monthly transactions of the components M1, M2-M1 and M3-M2 in month t-i, the contribution of M1 to the annual growth rate of M3, for example, is calculated as: $\frac{\sum_{i=0}^{11} F_{t-i}(M1)}{\sum_{i=0}^{11} [F_{t-i}(M1) + F_{t-i}(M2 - M1) + F_{t-i}(M3 - M2)]} * a_t(M3)$.

LIST OF ABBREVIATIONS AND CODES

Codes

CBI	cost-of-borrowing indicators
CNB	Czech National Bank
ECB	European Central Bank
ESA2010	European System of National and Regional Accounts
Eurozone	the European Union member states that have adopted the EUR
FCL	financial corporations engaged in lending (financial leasing, hire purchase and provision of personal or commercial finance, factoring and forfaiting)
IF	investment funds excluding money market funds
LTIR	yield of the 10-year bond
M1, M2, M3	monetary aggregates
MFI	monetary financial institutions
MMF	money market funds
NFA	net foreign assets
NISH	non-profit institutions serving households
non-MFI	all institutions excluding MFIs
OFI	other financial intermediaries

Institutional Sectors and Subsectors According to ESA2010

S.11	non-financial corporations
S.121	central bank
S.122	deposit-taking corporations, except the central bank
S.123	money market funds
S.124	non-MMF investment funds
S.125	other financial intermediaries, except insurance corp. and pension funds
S.126	financial auxiliaries
S.127	captive financial institutions and money lenders
S.128	insurance corporations
S.129	pension funds
S.13	general government
S.1311	central government
S.14	households
S.15	non-profit institutions serving households
